USER MANUAL

LTF Dojang Hub

User manual for clubs, coaches and the federation

Club admins · Coaches · LTF Admin · LTF Finance

App version 0.13.0 Edition October 2026 English

LTF Dojang Hub – User manual
Edition October 2026, for app version 0.13.0.

Published for the clubs of the Luxembourg Taekwondo Federation (LTF). Available in English, German, French and Luxembourgish.

All screenshots were taken from a demonstration installation filled with invented clubs, people and amounts. Any resemblance to real people is coincidental.

Words in **blue boxes** are the exact labels you see on screen. Numbered red circles in the screenshots are explained in the list under each picture.

The app keeps improving. If something on your screen looks different from this manual, the screen is right – and please tell the LTF so the next edition can be updated.

Welcome

LTF Dojang Hub is the shared online desk of the Luxembourg Taekwondo Federation and its clubs. Clubs keep their member list, order licenses, take the roll in training, bill membership fees and run their shop. The federation checks licenses, prints license cards and keeps its books. Everyone shares one calendar. It is a management tool for the staff of the clubs and the federation. A club admin can create a login for a member aged 16 or over. Parents do not sign in.

The public page is black and red. It reads **One federation.** **Every club.** **Every athlete.** . **Sign in** opens the sign-in page. Someone who is already signed in sees **Open dashboard** in that place. Inside the app, **Welcome back,** follows the light or dark theme.

1.1 Who this manual is for

The manual is organised by **what you do**, not by screen. Read the first two chapters, then jump to the chapter for your role.

If you are…	Read
a coach	Getting started (p. 8), then Coaches (p. 15), Teams and competition (p. 45) and Calendar (p. 50)
a club admin (president, secretary, treasurer, volunteer)	chapters 2 to 11 – start with The club year at a glance (p. 58)
working at the LTF office	LTF Admin (p. 59) or LTF Finance (p. 65)
the technical administrator	Modules (technical administrator) (p. 70)

Parents do not need this manual: they have no login. A member aged 16 or over can be given a login by the club, and the club still looks after their data.

1.2 How to read this manual

- Words in a blue box, such as **Sign out**, are the **exact labels on screen**.
- Paths such as **Club management** › **Finance** › **Billing** tell you where to click, from the menu on the left to the tab at the top.
- Numbered steps are things to do, in that order. A line with a tick tells you what you should see afterwards.
- Red numbered circles in a screenshot are explained in the list under the picture.

> TIP
>
> Tips save you time.

WATCH OUT

“Watch out” boxes protect you from mistakes that are hard to undo.

GOOD TO KNOW

“Good to know” boxes explain why the app behaves the way it does.

2

Getting started

All you need is a web browser on a computer, tablet or phone. There is nothing to install.

2.1 Signing in

Open the address the LTF gave you. The sign-in page appears.

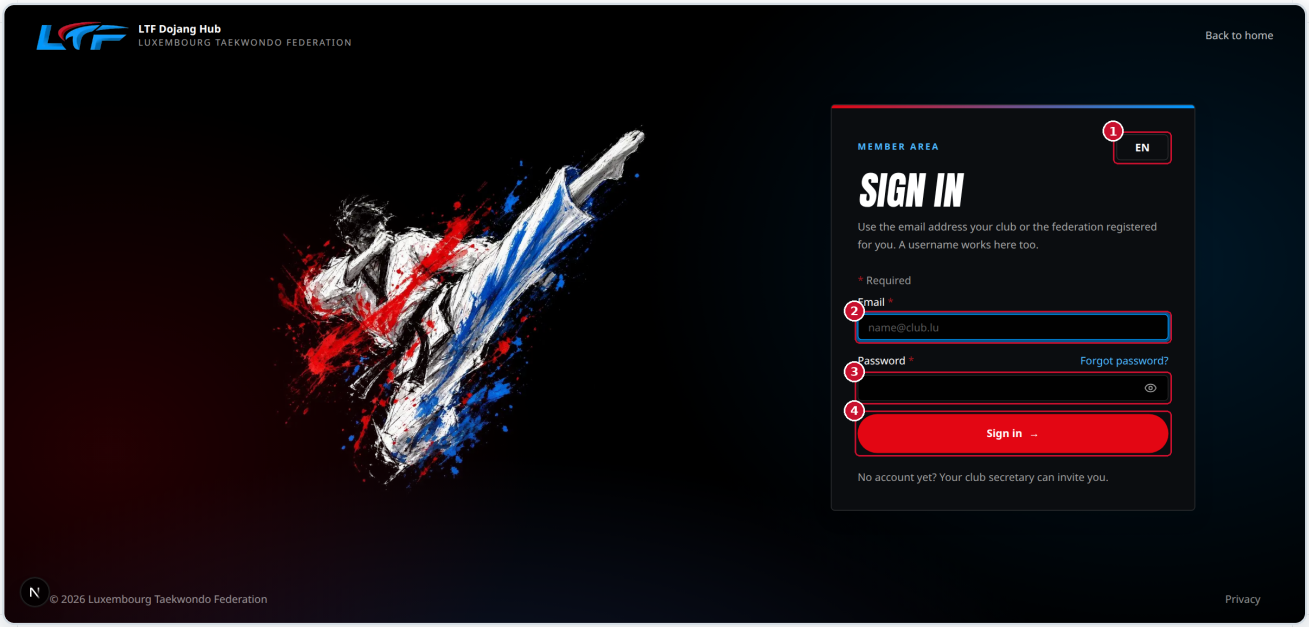

Figure 1 · The sign-in page

1. **Language** – English, Français, Deutsch, or Lëtzebuergesch. The button shows the current language until you open it.
2. **Username**
3. **Password**
4. **Submit** – signs you in.

▶ To sign in:

1. Type your username in **Username**. Your username is in the welcome email, for example `anne.reding`.
2. Type your password in **Password**.
3. Click **Submit**.

✔ You arrive on the start page for your role, for example the club overview or the federation overview.

The sign-in page uses the same black-and-red brand as the public page. **Forgot password?** sits with the form. See Forgotten password (p. 10).

> GOOD TO KNOW
>
> There is no public sign-up. Logins are created when someone is made a club admin or a coach (see Club admins (p. 57) and Coaches tab (p. 54)), by the LTF, or when a club admin creates one for a member aged 16 or over.
>
> Parents do not get a login.

2.2 Your first password

A new invitation opens **Set up your account**. The page names your role and organisation, for example **You're being set up as Club Admin for TKD Club Uelzecht (Demo).**.

1. Check **Username** and **Name**. They are already filled in.
2. Type the email you will use in **Email**.
3. Type a password in **Password** and again in **Confirm password**.
4. Click **Save and continue**.

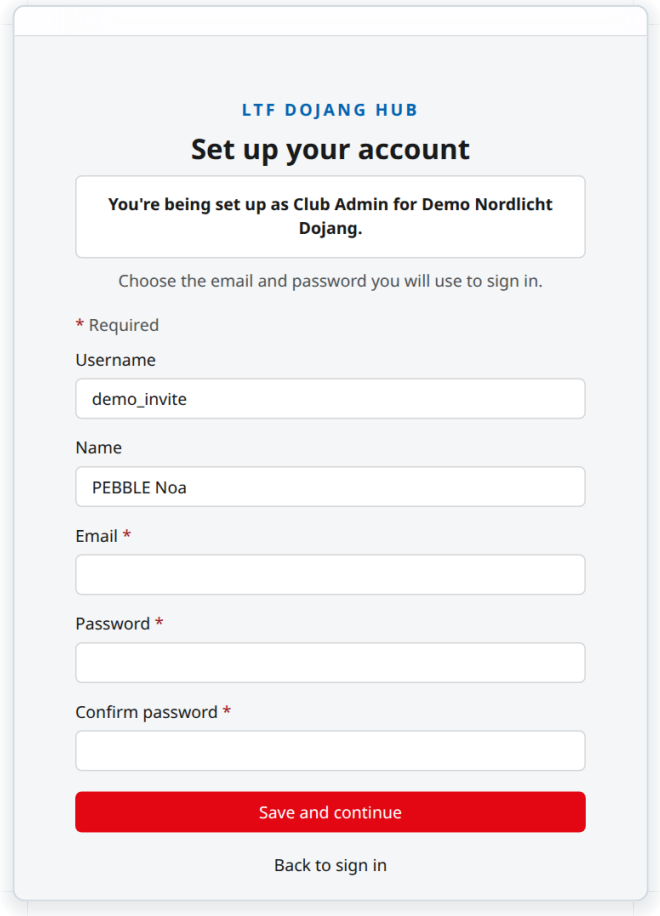

Figure 2 · A new account: email and password

✔ The page shows **Your account is ready!**. Click **Sign in now**.

A link for someone who already has a password opens **Set your password** instead, with **Username** filled in.

1. Type a new password in **New password** and again in **Confirm password**.
2. Click **Set password**, then **Continue to login**.

> TIP
> Let your browser or password manager save the username together with the new password. The page fills in the username for exactly that reason.

During first-run setup (p. 70) these links are not emailed. The technical administrator copies each person's link. Afterwards a club admin or the LTF can send it again. See Club admins (p. 57).

2.3 Verifying your email

If the sign-in page says your email isn't verified yet, open the verification email and click its link. No email? Click **Verify your email** under the sign-in button, type your email address and click **Resend verification email**.

2.4 Forgotten password

On the sign-in page, click **Forgot password?**. **Reset your password** asks for the email on the account. Click **Send reset link**. If that address is known, a reset link is sent. The reply is the same either way, so the page does not reveal whether an account exists.

No email? Ask your club admin or the LTF. On the club-admins list the row menu offers **Send invitation to set password** when that person has not chosen a password yet, or **Send password reset email** when they already have one. If the message cannot be sent, the link is shown on screen as **Password reset link**. The technical administrator can also use **Send password reset** in the ops console.

2.5 Privacy and your data

The app has a page where you manage your own consent and data rights. It is not in the menu, so you open it by its address.

1. Sign in.
2. In the browser's address bar, replace everything after the app's address with `/en/settings/privacy`, `/fr/settings/privacy`, `/de/settings/privacy`, or `/lb/settings/privacy`, and press Enter.

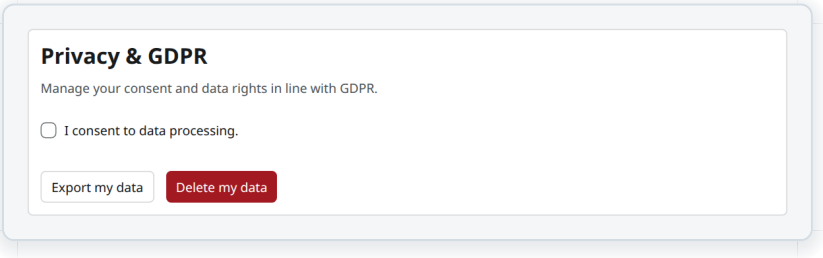

Figure 3 · The privacy page

The page **Privacy & GDPR** has three controls:

- **I consent to data processing.** – tick or clear the box. The change is saved at once.
- **Export my data** – shows your data on the page, under **Export preview**: your login details and, if your login is linked to a member record, that member's name, grade and club, the licenses, the license and grade history and the photo details. The data is only shown on screen, not downloaded as a file.
- **Delete my data** – deletes your login.

WATCH OUT

Delete my data does not ask for confirmation. It deletes your login at once and signs you out. If the login is linked to a member record, the profile photo is removed, the notes on the grade history are cleared, and the private addresses on that member record are removed. The same private addresses are removed when an administrator deletes that login. Addresses that belong to someone else, such as a parent stored as a contact, stay. Invoices already issued keep the address that was printed on them. The member record and its licenses stay with the club.

GOOD TO KNOW

This page is being reviewed. For now its text is in English only, also when you use the app in French, German, or Luxembourgish.

2.6 The screen at a glance

Every page has the same frame: the menu on the left, a bar across the top and the work area in the middle.

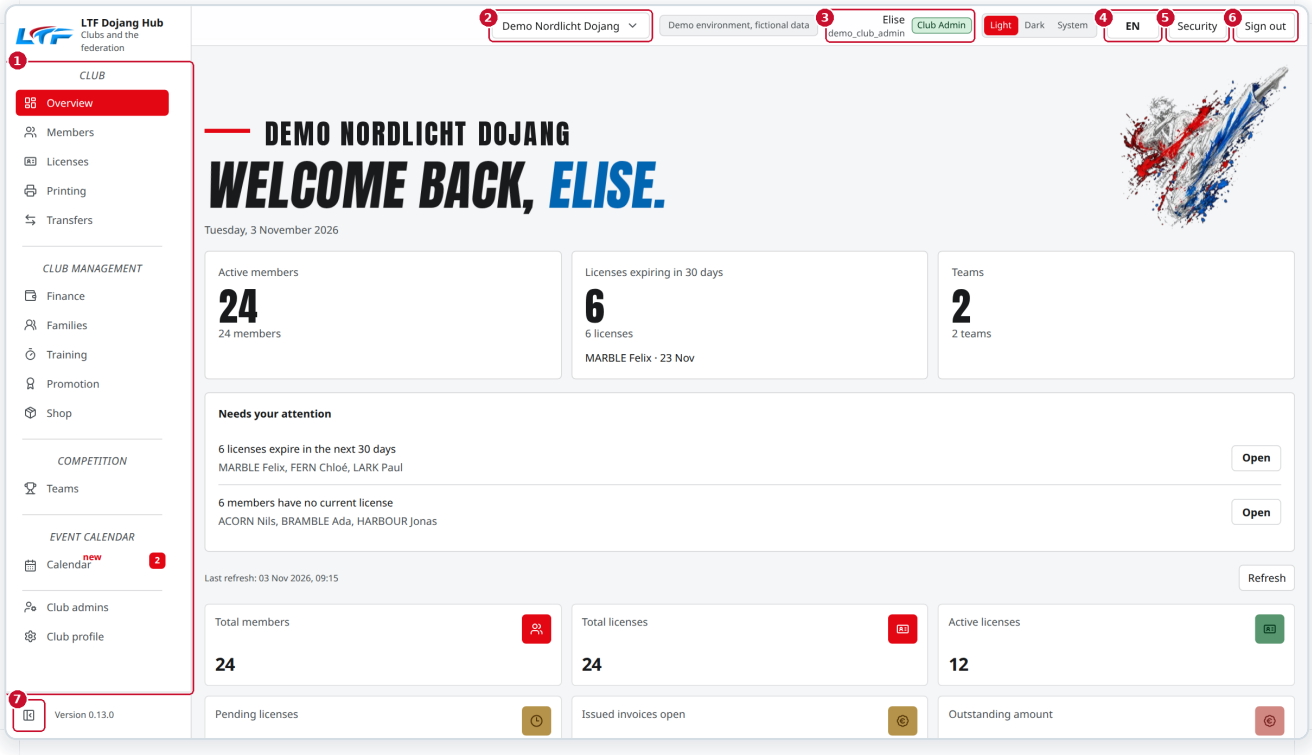

Figure 4 · The club overview with the main parts of the screen

1. **Menu**. It stays in place while you move between pages. Groups include **Club**, **Club management**, **Competition** and **Event calendar**. Federation pages use **LTF management**. You only see what your role and your club's modules allow.
2. **Club control** – opens a small panel, **Selected club**. When the list is long, type in **Search clubs**. Every page then shows the club you pick.
3. Your name, your username and your **role badge**, for example **Club Admin**.
4. **Language** – **Language**. English, Français, Deutsch, or Lëtzebuergesch, at any time.
5. **Security** – authenticator, recovery codes, passkeys, password, and email codes.
6. **Sign out**
7. **Collapse sidebar** – makes the menu narrow to give tables more room. The app version is shown next to it.

Editing a record opens in a panel at the side of the page. The list stays behind it. On a list, row actions sit in **Row actions**. Click a column heading to sort.

The header also has **Theme**: **Light**, **Dark** or **System**. The public pages stay black and red. Inside the app, this choice sets the light or dark theme, including the welcome line.

> TIP
>
> On a phone the menu folds away. Tap the menu button at the top left to open it.

2.7 Roles: who can do what

Your role decides which menu you see. One login can hold more than one desk, for example club admin of your club and LTF admin. With more than one, the header shows **Desks**. Open it and choose another. A view-only desk is labelled **View only**. It can open its lists. Save, delete, and import stay off, and the control says **View only on this desk**. With one desk, the header stays a plain role label.

A superuser opens **Ops console** from the header. That button selects the Ops desk. **Desks** lists that desk as **Superuser**, together with the other desks. Choosing a club, LTF, or finance desk opens that desk. **Open federation dashboard** stays only when that list cannot already open the federation dashboard.

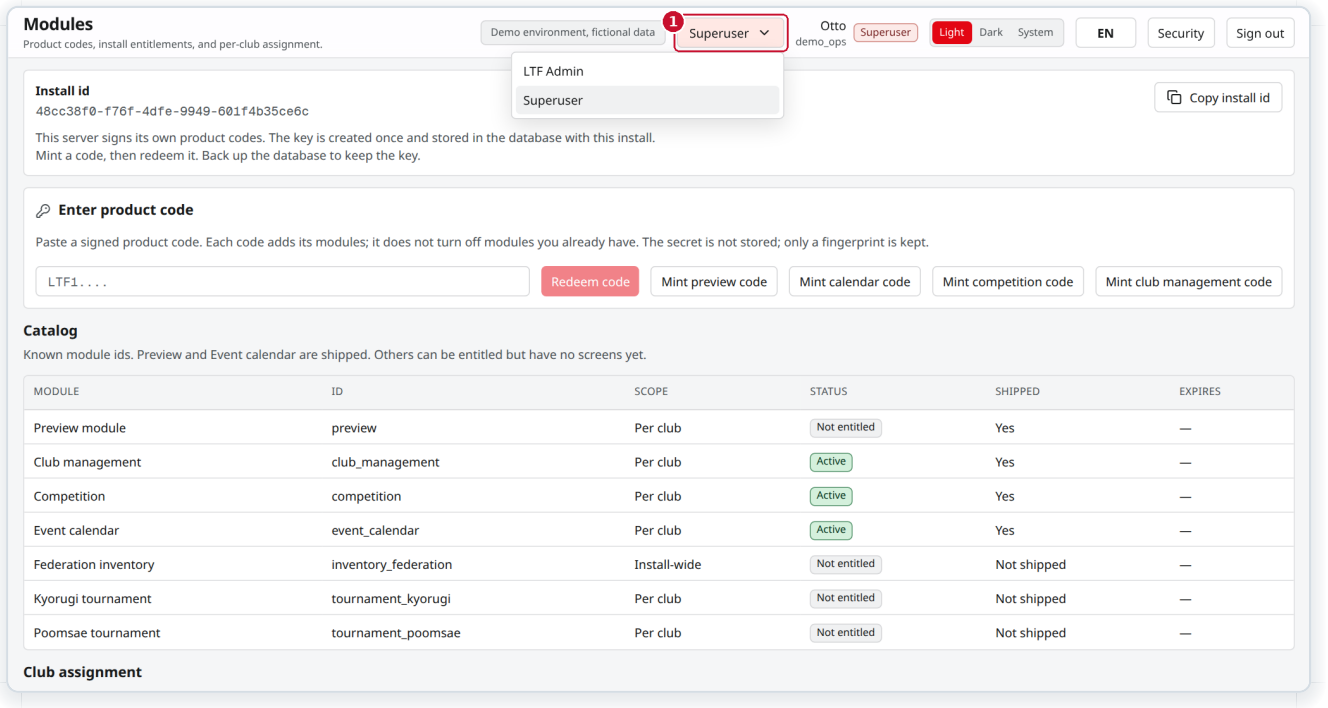

Figure 5 · The desk list, open on the Ops console

1 **Desks** – Ops is the **Superuser** row. The other rows are the other desks.

Staff desks (LTF admin, LTF finance, club admin, and ops) ask for an authenticator app. For the first 14 days a notice asks you to set it up. After that the desk stays closed until you do.

The language menu offers English, Français, Deutsch, and Lëtzebuergesch. English is the default.

Role badge	Typical person	Main work
Coach	coach	sees the training week, takes the roll, sees the calendar

Role badge	Typical person	Main work
Club Admin	president, secretary, treasurer, volunteer	runs the club: members, licenses, money, training, shop
LTF Admin	federation office	clubs, licenses, cards, transfers, national team, federation calendar
LTF Finance	federation treasurer	federation orders, invoices, payments, books
Superuser	technical administrator	modules, users, system health

GOOD TO KNOW

Parents do not have a login. A member aged 16 or over can sign in after a club admin or the LTF creates a login. Nothing is emailed until you send a link yourself. The club keeps the data and answers questions.

What each club role sees in the club menu:

Page	Coach	Club admin
Training	yes [1]	yes
Teams	when the competition module is on	when the competition module is on
Calendar	yes	yes
Overview, Members, Licenses, Print jobs, Transfers, Promotion	– [2]	yes
Finance, Families, Shop	–	yes
Club admins, Club profile	–	yes

[1] Coaches see the week, take the roll and choose who taught the class. The timetable, holidays, rates and promotion rules are for club admins. [2] These pages appear in a coach's menu but are not set up for coaches yet. A coach who is also a club admin uses them as a club admin.

GOOD TO KNOW

Recording payments is even stricter: it needs a current committee office. See Who may record payments (p. 30).

2.8 Modules: why some menus are missing

Parts of the app are switched on per club by the LTF as modules:

- **Club management** adds Finance, Families, Training, Promotion and Shop under Club management.
- **Event calendar** adds Calendar under Event calendar.
- **Competition** (Competition) adds Teams under Competition. See Teams and competition (p. 45).

If your club has no module, you still have the Club pages: members, licenses, printing and transfers. Ask the LTF if you are missing a module you need.

The LTF sets a yearly price for club management and the calendar. An unpaid invoice does not switch a module off. Club admins can read the estimate on the club profile. See Club fees (p. 66) and Profile (p. 53).

A bundle is at least two of those modules at one flat price. Under **Already on**, a bundle appears only when that bundle itself was bought. A bundle that only contains a module you already have stays in the list under **Modules and bundles**, and it says **Competition is already on**. It does not show that module's end date, and it cannot be ordered again.

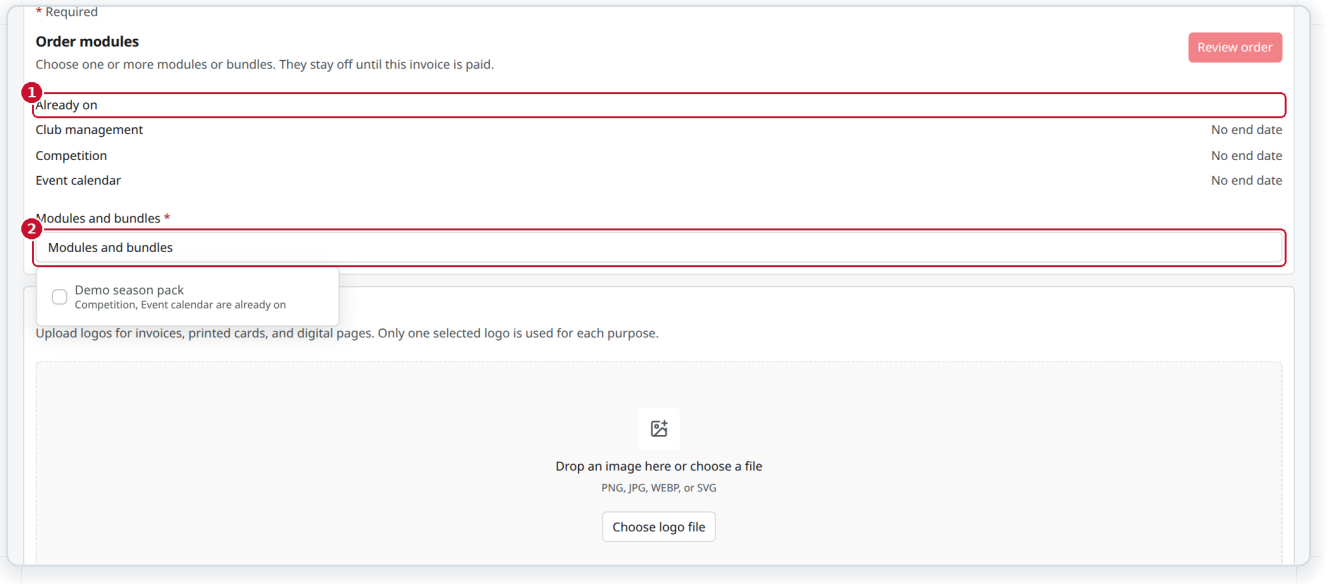

Figure 6 · Already on, and a bundle that cannot be ordered again

1. **Already on** – modules already switched on, and a bundle only after that bundle was bought.
2. **Modules and bundles** – a bundle that overlaps a module already on stays here, and it cannot be ticked.

3

Coaches

Coach

A club admin makes you a coach in **Club profile** › **Coaches**. You then get a login with the **Coach** badge.

> GOOD TO KNOW
>
> The coach role is still being built. This chapter describes what works for coaches today: the training week, the roll and the calendar. When the competition module is on, coaches also open **Teams** (see Teams and competition (p. 45)). More coach features are planned.

3.1 Your week

Open **Training**. The tab **This week** lists every class of the week with its status and coaches.

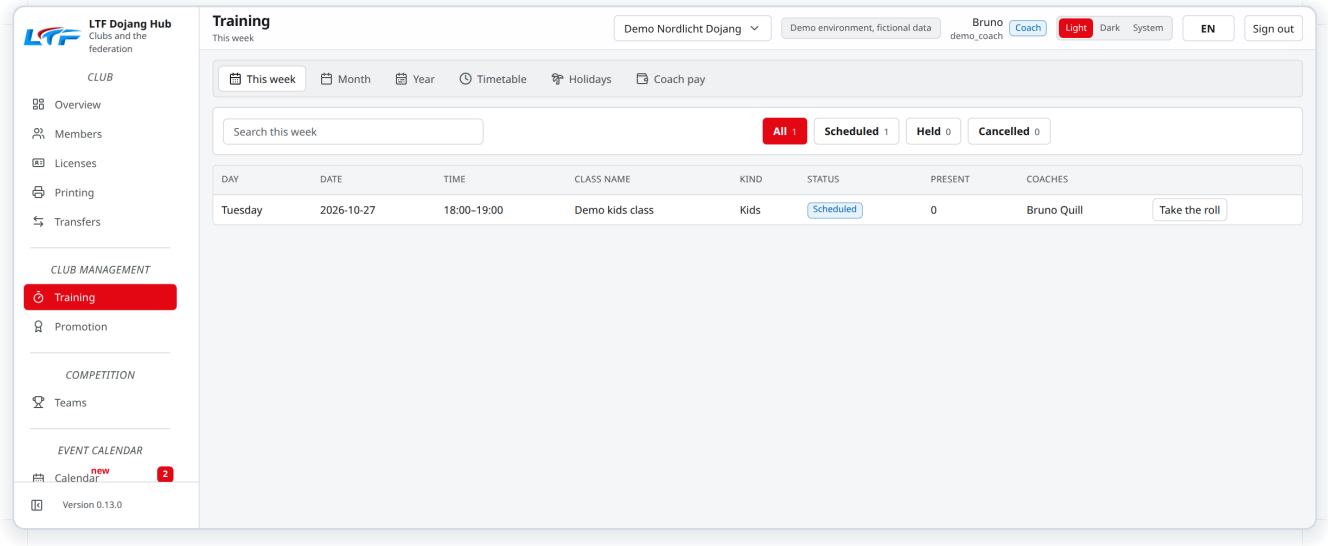

Figure 7 · A coach's training week

3.2 Taking the roll

Do this during or right after the class. It takes less than a minute.

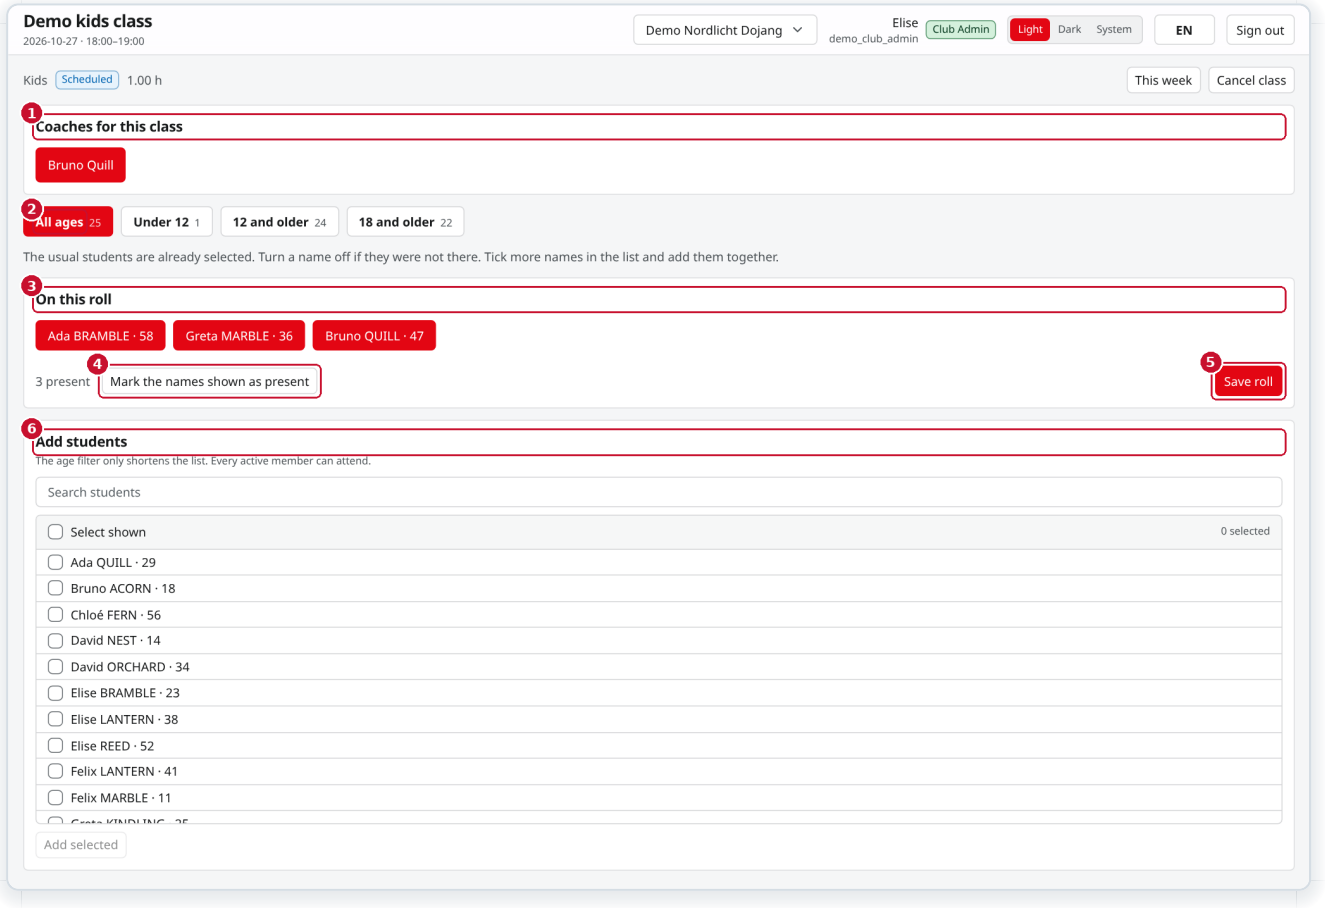

Figure 8 · Taking the roll for a class

1. **Coaches for this class** – add or remove the coaches who actually taught.
2. Age filters such as **All ages** – they only shorten the list; every active member may attend.
3. **On this roll** – the students marked present.
4. **Mark the names shown as present** – ticks everyone in the current list in one go.
5. **Save roll**
6. **Add students** – search for anyone else who came.

1. In **Training** › **This week**, click **Take the roll** next to the class.
2. The usual students are already on the roll. Click a name to take it off if that student was absent.
3. Under **Add students**, tick anyone else who came. Search by name if the list is long.
4. Check **Coaches for this class**.
5. Click **Save roll**.

✔ The class now shows as **Held** and its hours count towards each student's next belt (see Promotion (p. 43)) and towards coach pay.

> TIP
>
> Take the roll on a phone at the side of the mat. The page is made for small screens.

3.3 Calendar for coaches

Coaches see public club events and also **Internal** ones, so the club can share coach meetings with its coaches and admins only. See Calendar (p. 50).

4

Club admin: members and licenses

Club admin

4.1 Club overview

Overview is your dashboard. It opens with **Welcome back,** and your first name. **Needs your attention** lists what needs you, or **Nothing needs your attention right now.** when nothing does. The page also counts members, licenses and open invoices, and its **Action queue** lists things that need you, each with a button that opens the right page.

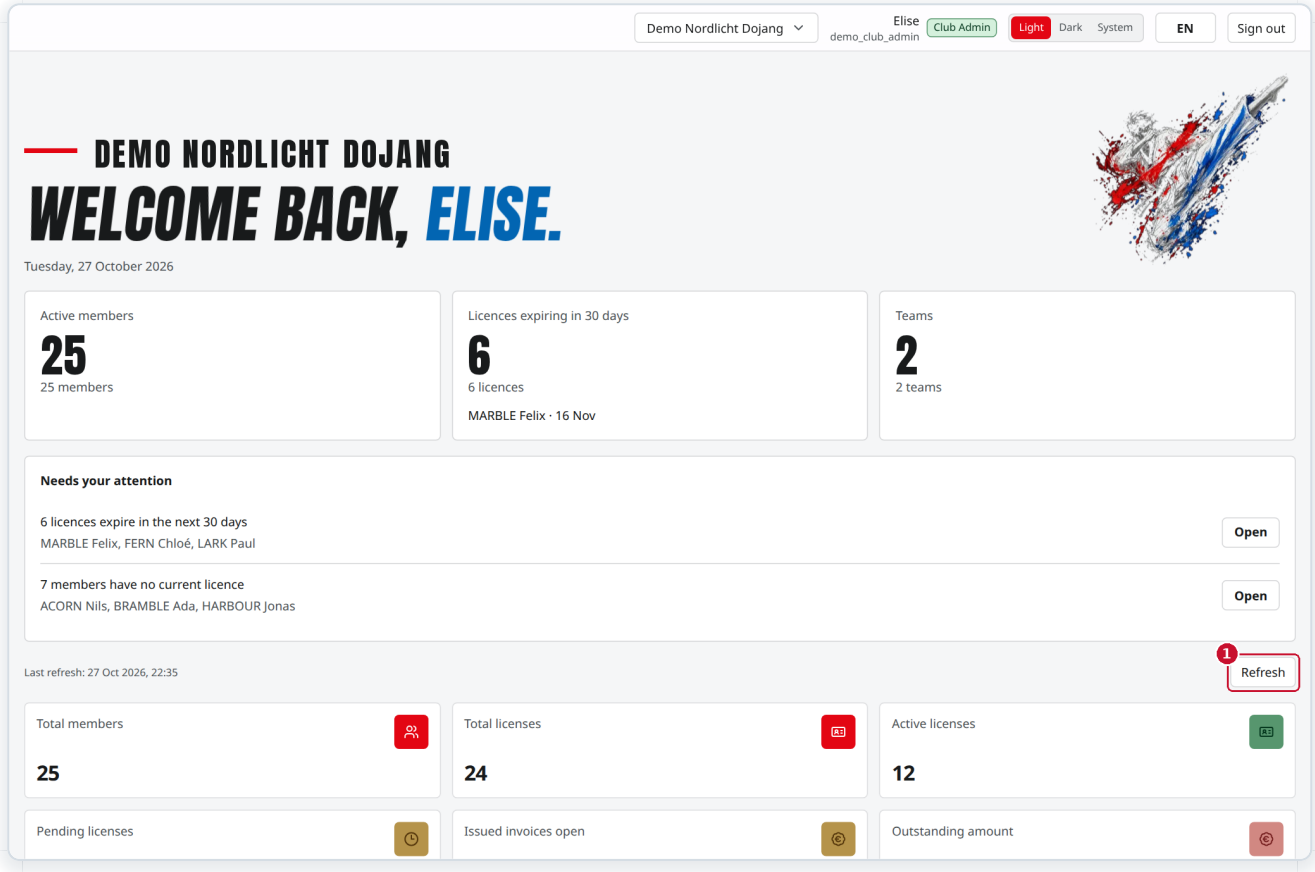

Figure 9 · The club overview

1. **Refresh** – reloads the numbers.
2. **Action queue** – when it says “All clear”, nothing is waiting.

4.2 The members list

Members lists everyone in your club.

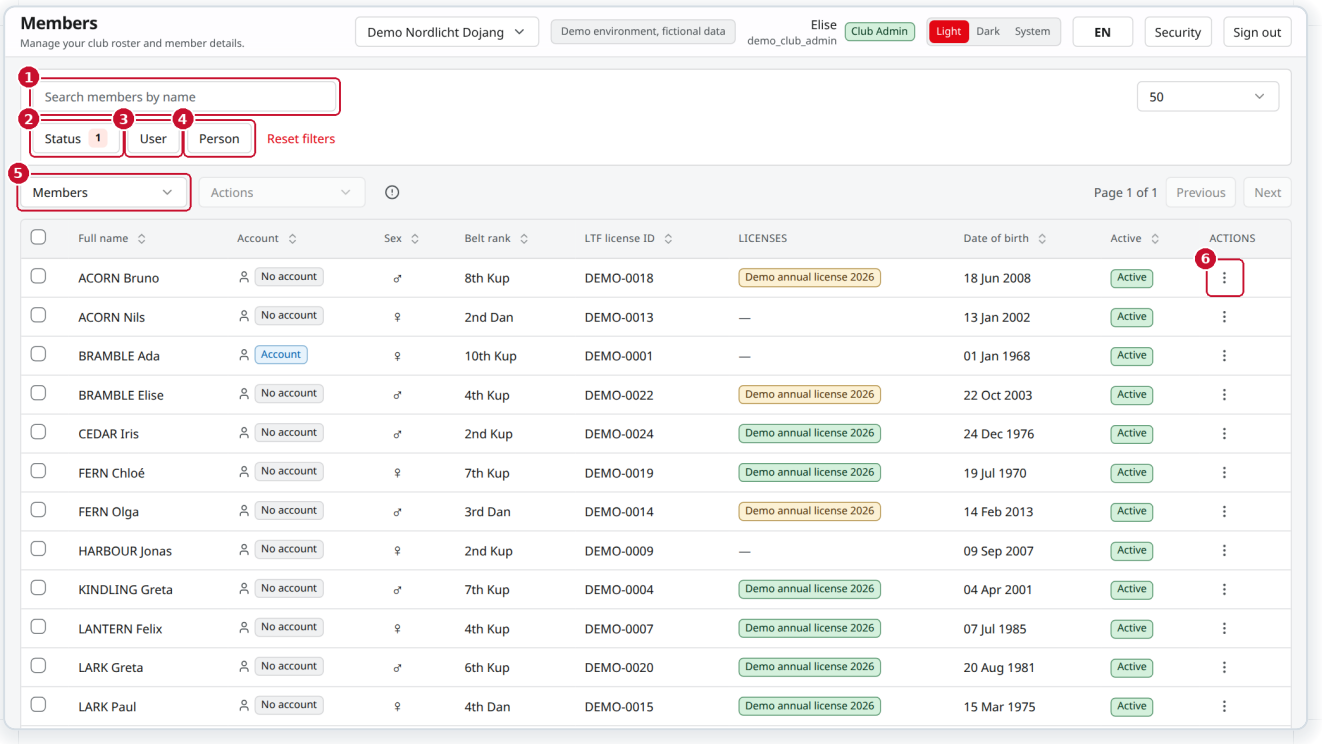

Figure 10 · The members list

1. Search by name.
2. **Status** – **Active**, **Inactive**, or **All**. The number is how many filters in that group are on.
3. **User**
4. **Person** – the team filter when competition is on.
5. The **Members** menu: create or import members.
6. **Row actions** – **Edit** or **Delete** for this row. **Edit** opens a side panel.

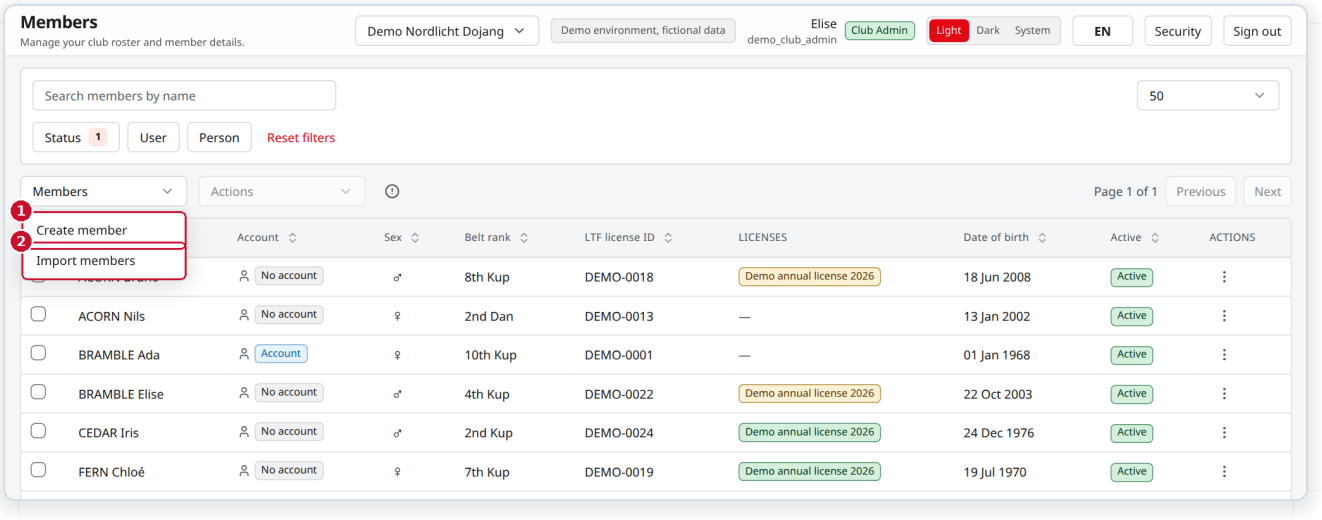

Figure 11 · The members menu: create or import

The **Sex** column is a small ♂ or ♀, not a large badge. Click a column heading to sort. **Members** and the row menu open as small panels.

Search stays on the page. The other filters open from **Status**, **User**, and **Person**. **User** is **No account**, **Waiting**, **Account**, or **Disabled**. On the LTF list, **Person** is **All**, **Club members**, or **LTF staff**. On the club list, **Person** is the team filter when competition is on, including **Not on a team**. **Reset filters** returns

them to the usual start. A tick stays when you search, filter, or change page, until you **Clear selection** or finish the action. **Selected: 2** includes rows that are not on this page. The same ticks stay on the club and LTF member lists, the club and LTF license lists, the LTF clubs list, ops users, parked members, and club billing. Rows per page can be 50, 150, 300, or all. License tables have an **Expires** column. A date within 30 days is a warning. A date already past is muted.

Click a name to open the member. The **Actions** menu works on all ticked members at once:

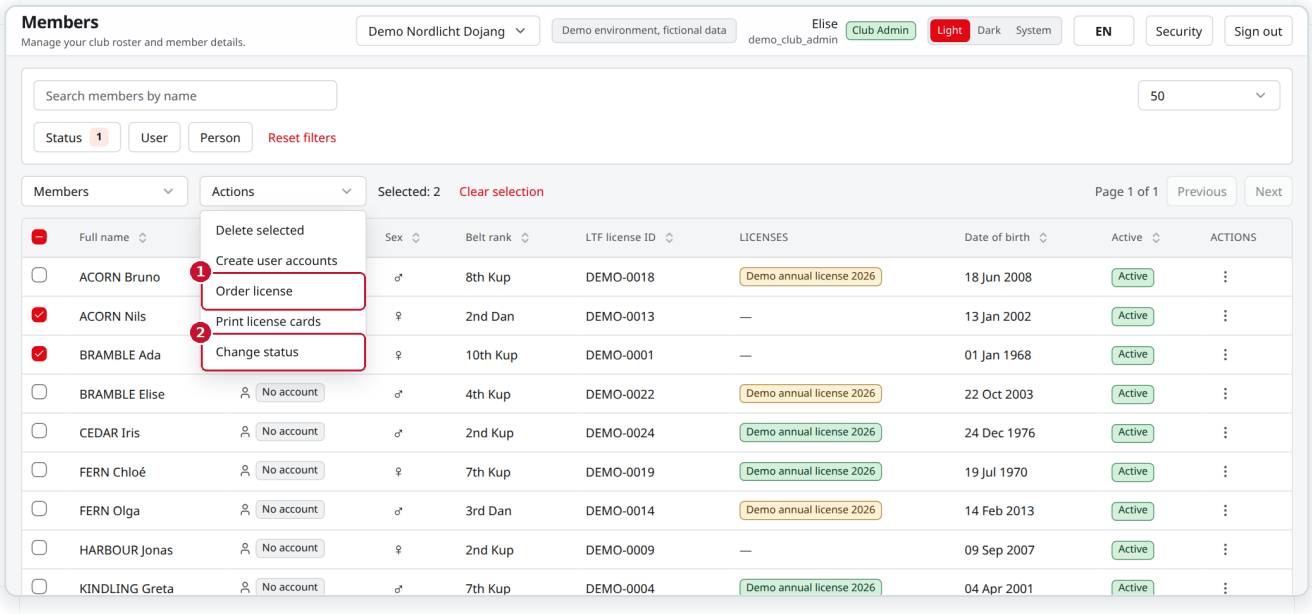

Figure 12 · Actions for selected members

1. **Order license** – see Ordering licenses (p. 24).
2. **Change status** – make members active or inactive.

> WATCH OUT
>
> Prefer making a member **inactive** to deleting. Deleting also deletes the member's licenses; an inactive member keeps their history.

4.3 Adding a member

1. In **Members**, open **Members** and click **Create member**. The form opens in a side panel. The list stays behind it.
2. Fill in **First name**, **Last name**, **Sex** and **Date of birth**.
3. Choose the **LTF license prefix**. The LTF license number itself is created automatically when you save. Fill in **WT license ID** only if the athlete already has a World Taekwondo license.
4. Set the belt grade after saving, on the **Grades** tab.
5. Click **Create member**.

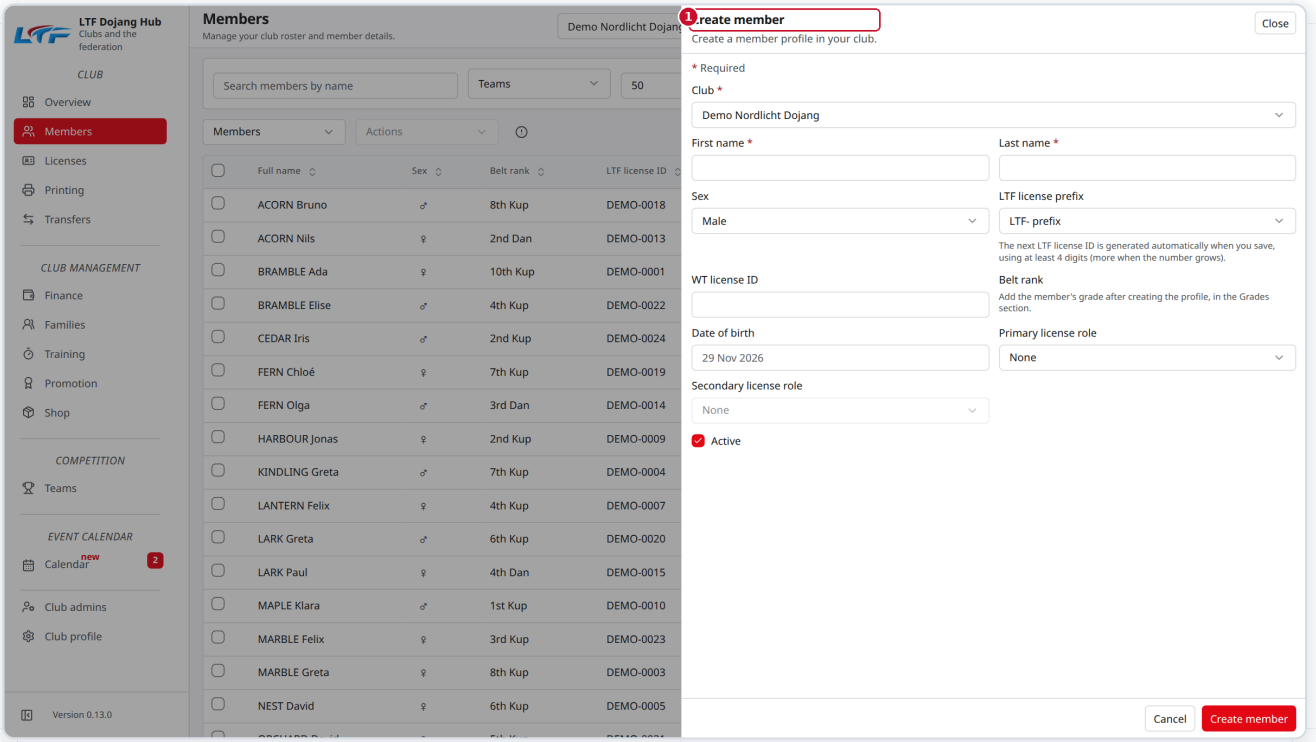

Figure 13 · Creating a member

4.4 Importing members from a spreadsheet

Use this once, when your club starts with the app, or to add a whole group.

1. Save your list as a CSV file (one row per person, one column per field).
2. In **Members**, open **Members** and click **Import members**.
3. **Source and options**: under **Existing members**, leave **Create new only (skip existing)** or choose **Create new and update existing** when the file should refresh people already in the club.
   Existing members are matched by LTF license ID, then WT license ID, then last name, first name, and date of birth
   Choose the **Date format** used in your file and click **Choose CSV file**. Click **Continue to mapping**.
4. **Field mapping**: for each field of the app, pick the matching column of your file.
   Auto-map matching fields does most of the work. All fields marked **Required** must be mapped.
5. **Preview and resolve**: click **Preview**. Each row is **Ready**, **Duplicate**, **Invalid** or **Skipped**. The same **Existing members** choice is on this step. Fix your file or change the action for a row.
6. **Confirm import**: click **Run import**.
7. **Import result** shows what was created, updated and skipped. The success line reads **Import succeeded. Created 12, updated 3, skipped 1.**.

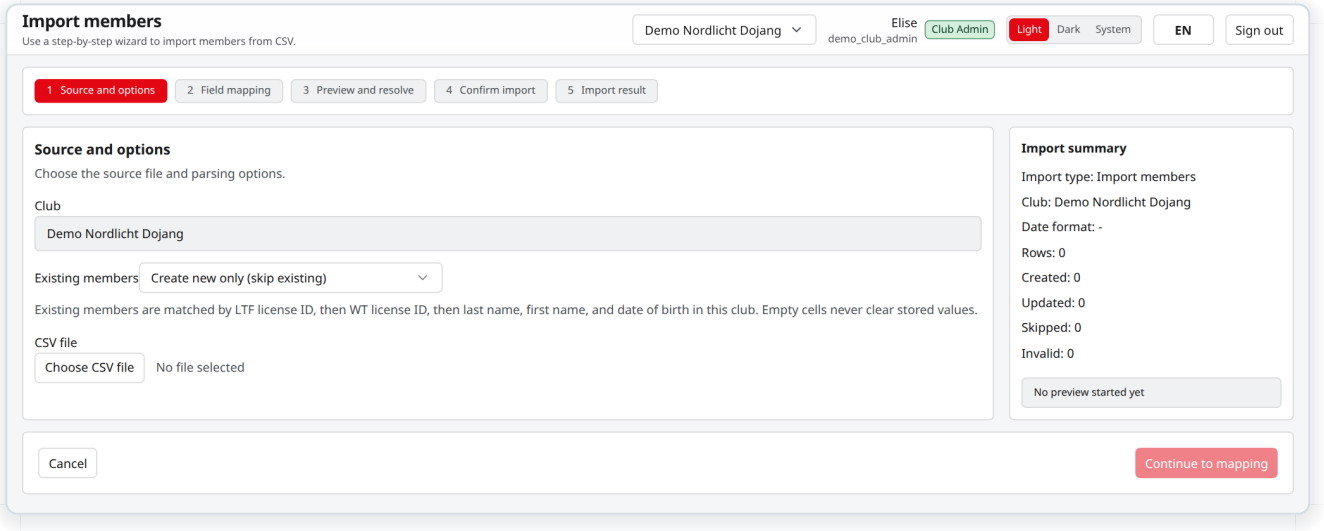

Figure 14 · Step 1 of the import wizard

> TIP
>
> If your file has a membership end date column, use **Use membership end dates by year** to import current members as active and skip people who left years ago.

> GOOD TO KNOW
>
> This is the club's own import, for a club that already uses the app. The federation's first import of every club is a different page, First-run setup (p. 70), and only the technical administrator sees it. Empty cells never wipe a value that is already stored.

4.5 The member record

A member's page has six tabs.

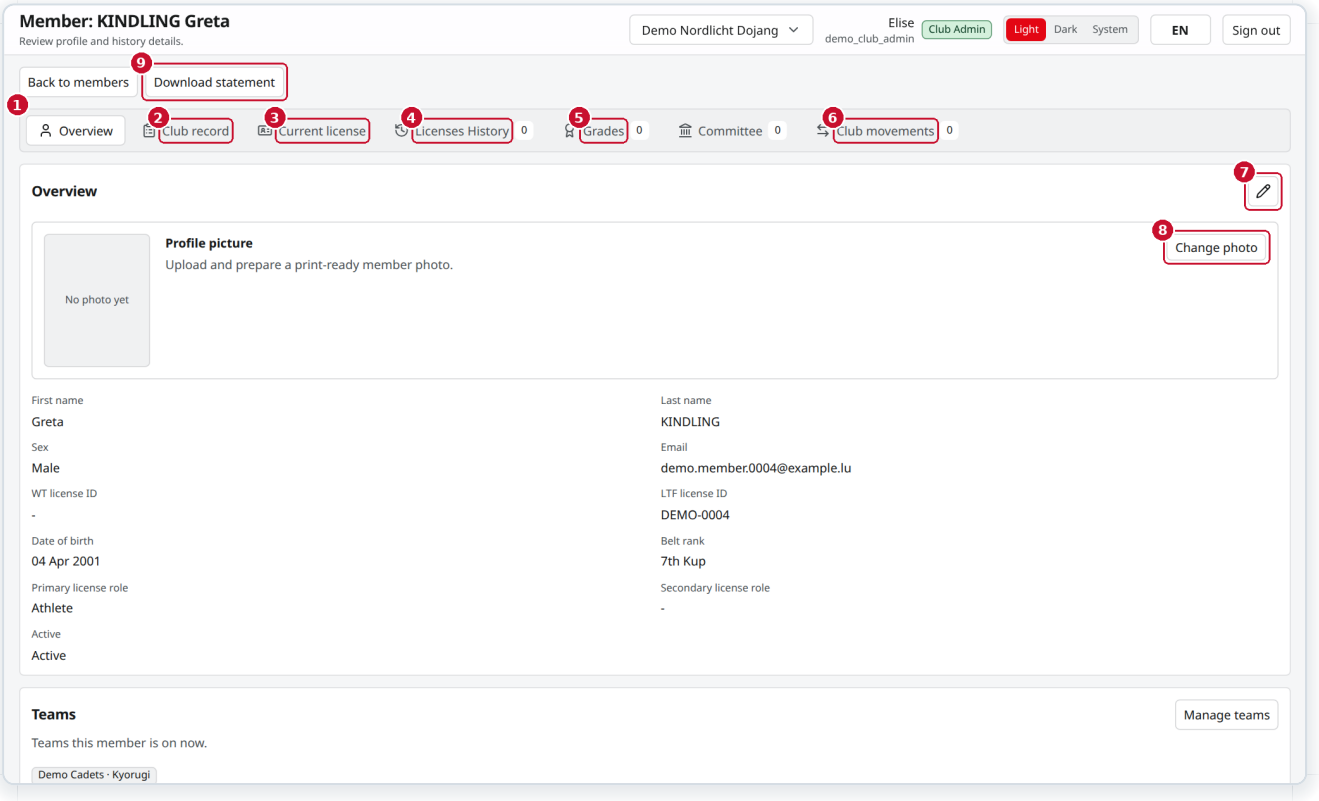

Figure 15 · A member's page

1. **Overview** – name, birth date, license numbers, belt.
2. **Club record** – what only the club needs (below).
3. **Current license** – this year's license and its card preview.
4. **Licenses History**
5. **Grades**
6. **Club movements** – transfers between clubs.
7. Edit the overview data. **Edit** opens a side panel.
8. **Change photo** – opens the photo editor (see A member's photo (p. 23)).
9. **Download statement** – a PDF of the member's invoices and payments.

If the athlete is on the national team, the overview shows **National team** with the squad and the season. That badge is read-only. The club does not open the federation's staff file, and coach names are not listed on this page. The squad itself is kept by the LTF. See National team (p. 63).

When the competition module is on, the overview also shows **Teams** and **Equipment**. Height and weight are recorded on the team sheet, not as a tab here. See Height and weight (p. 46) and Equipment sizes (p. 47).

The club record

Club record holds the details the club needs for daily life. Everything is optional; fill in what you use.

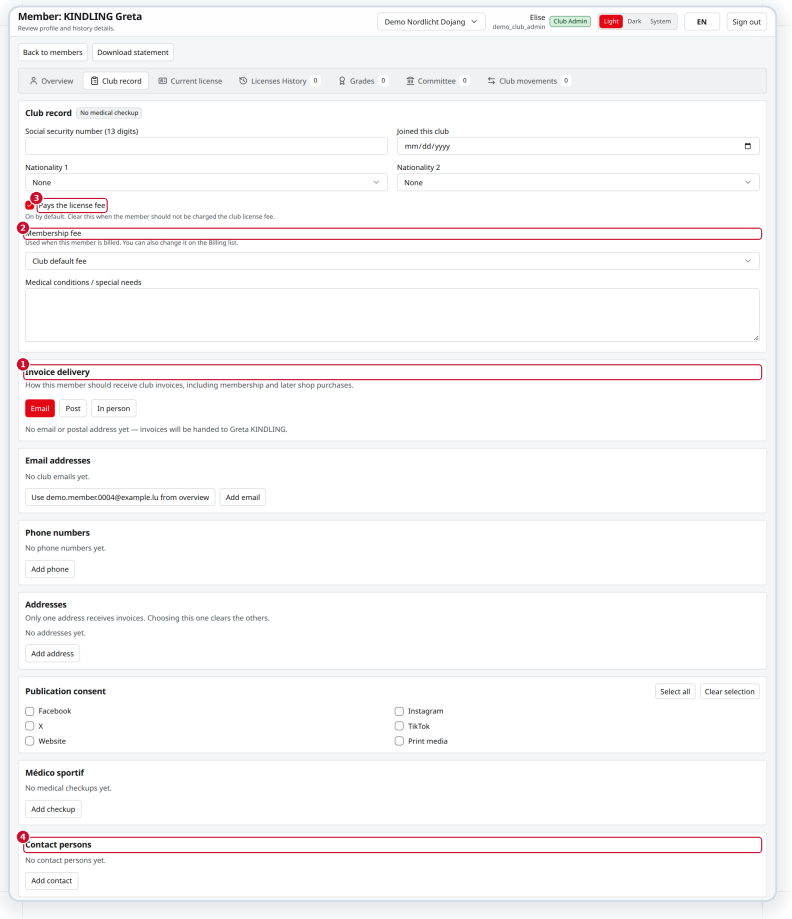

Figure 16 · The club record

1. **Pays the license fee** – clear this for a member who should not pay the club's license fee.
2. **Membership fee** – which membership fee is charged; **Club default fee** if left alone.
3. **Invoice delivery** – **Email**, **Post** or **In person**.
4. **Contact persons** – parents, guardians, emergency contacts.

It also contains **Social security number (13 digits)**, **Joined this club**, two nationalities, **Medical conditions / special needs**, **Email addresses**, **Phone numbers**, **Addresses**, **Publication consent** and the **Médico sportif** dates. Click **Save club record** when you are done.

For an address in Luxembourg, type a street or a postcode and pick a suggestion. The list is the official Luxembourg address register. Choosing one fills **Street**, **House number**, **Postal code** and **City / locality** as separate fields. The street box keeps only the street name. A house number may include a letter, for example 12A.

Tick **Send invoices here** on the address that should receive invoices.
Only one address receives invoices. Choosing this one clears the others.

> TIP
>
> For a child, add the parent under **Contact persons** and tick **Also use this parent for the other children in the family** to reuse the same parent for brothers and sisters.

A member's photo

The photo is printed on the license card, so a good photo saves a reprint.

1. Open the member and click **Change photo**.

2. Drop a picture into the box, click **Choose file**, or click **Use camera** and then **Take photo**.
3. Use **Zoom** and drag the picture until the face fills the 8:10 frame. The **Live preview** shows the result.
4. If you like, click **Remove background** and pick a colour under **Background color**.
5. Tick **I consent to storing and using this photo for app display and physical card printing.**.
6. Click **Save photo**.

> TIP
>
> A plain wall, good light and a straight look into the camera give the best result. JPEG, PNG and HEIC photos up to 10 MB are accepted.

4.6 Ordering licenses

Every athlete needs a yearly LTF license. You order licenses for several members at once; the LTF then invoices your club.

1. In **Members**, tick the members who need a license.
2. Open **Actions** and click **Order license**.
3. Choose the **Year**. Depending on federation policy you can order for this year or pre-order for next year.
4. Under **Available to order**, click a license type marked **Available**.
5. Check **Members in this order**. Members who already have this license are listed under **Already licensed**; click **Remove members who already have this license** or **Remove members who cannot order** if needed.
6. Click **Create order for 2026**.

✔ The page shows **Order created**. The licenses are **Pending** until the LTF has received your payment and activated them.

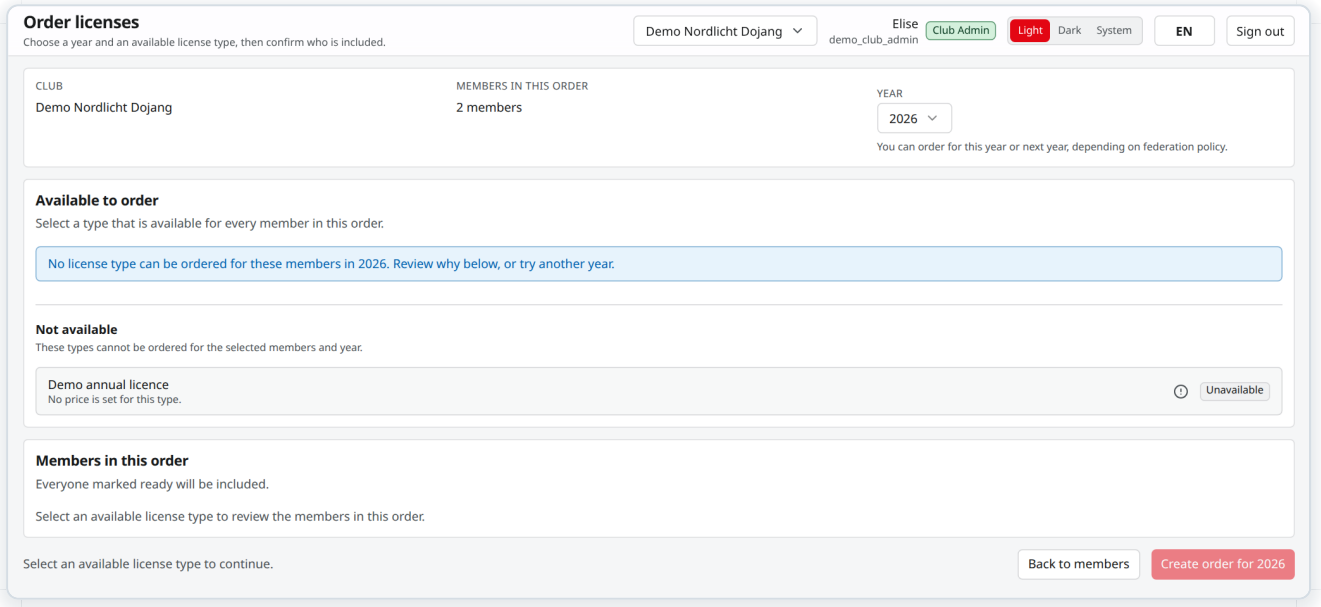

Figure 17 · Ordering licenses for two members

> GOOD TO KNOW
>
> A license type you cannot choose shows why, for example **The ordering window is closed.** or **No price is set for this type.** . Ordering windows and prices are set by the LTF.

The order and its invoice appear in **Finance** › **Orders** and **Invoices** . On those lists, and on **Payments** , search stays on the page. **Status** opens as a small panel. On the club lists, **Accounting** opens the same way. **Reset filters** returns them to all. Those lists do not tick rows. Pay the federation invoice as explained in Paying the LTF (p. 34).

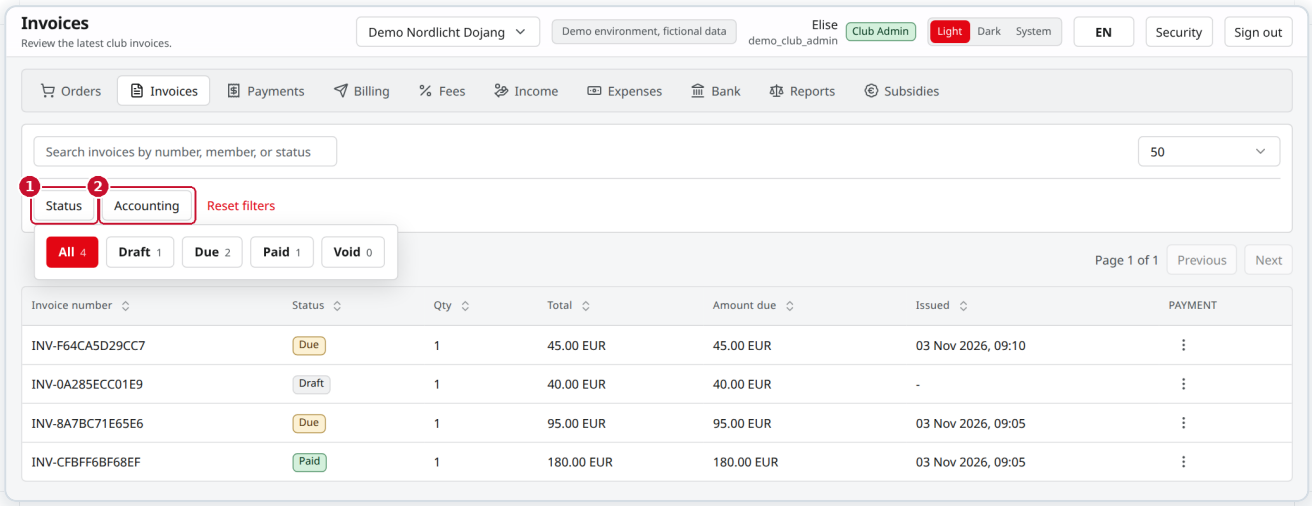

Figure 18 · Invoices: Status and Accounting open as panels

1. **Status**
2. **Accounting**

4.7 The licenses list

Licenses shows every license of the club with its status: **Active** , **Pending** or **Expired** . Search by member, year or status. Click a column heading to sort. The **Expires** column uses the same dates as the rest of the app. A date within 30 days is a warning. A date already past is muted. Ticks on this list stay when you search, filter, or change page. On the federation's own license list, edit and delete sit in the row menu and the form opens in a side panel. See Members, licenses and transfers (p. 61).

A club admin creates a login for the club's own members with **Create user accounts** . An LTF admin can do it for every member, including someone with no club. **Confirm** says what will be created and who is skipped. **No email will be sent.** There is no login under 16. A missing date of birth has to be saved first. Inactive members are skipped. After the accounts exist, a file of first-login links downloads.
This file holds the first-login links. Anyone who has it can use a link until it expires. Delete the file when you are finising a login does not make that file. The members list and the member card show **No account** , **Waiting for first login** , **Account** , or **Disabled** .

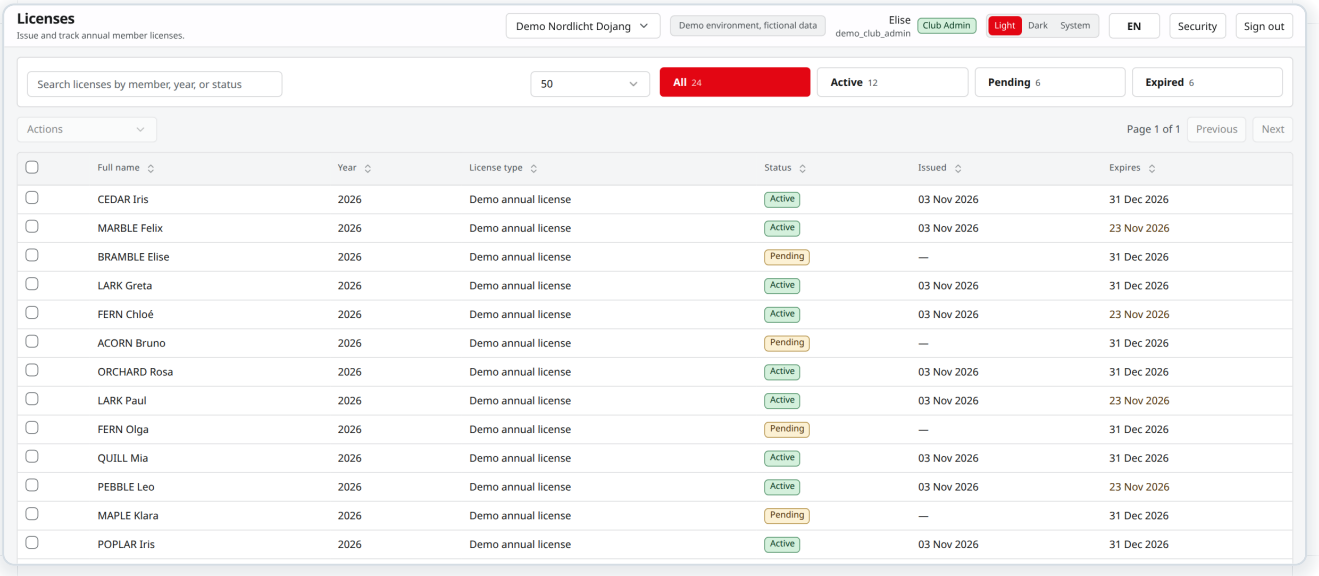

Figure 19 · The licenses list

4.8 Printing license cards

Printing lists the club's card print jobs. The same section also opens **Printer profiles**, where a printer's X/Y offset is stored.

1. Open **Printing**.
2. Open the row menu. When a job shows **Succeeded**, click **Preview PDF** to open the PDF, or **Download PDF** to save `license-cards_<club>_<job>_<date>.pdf`. Print the file at 100 % (no “fit to page”).
3. The same menu holds **Execute**, **Retry** and **Cancel**. **Delete** is last. Confirm to remove a draft, succeeded, failed or cancelled job. Cancel a queued or running job before deleting it.

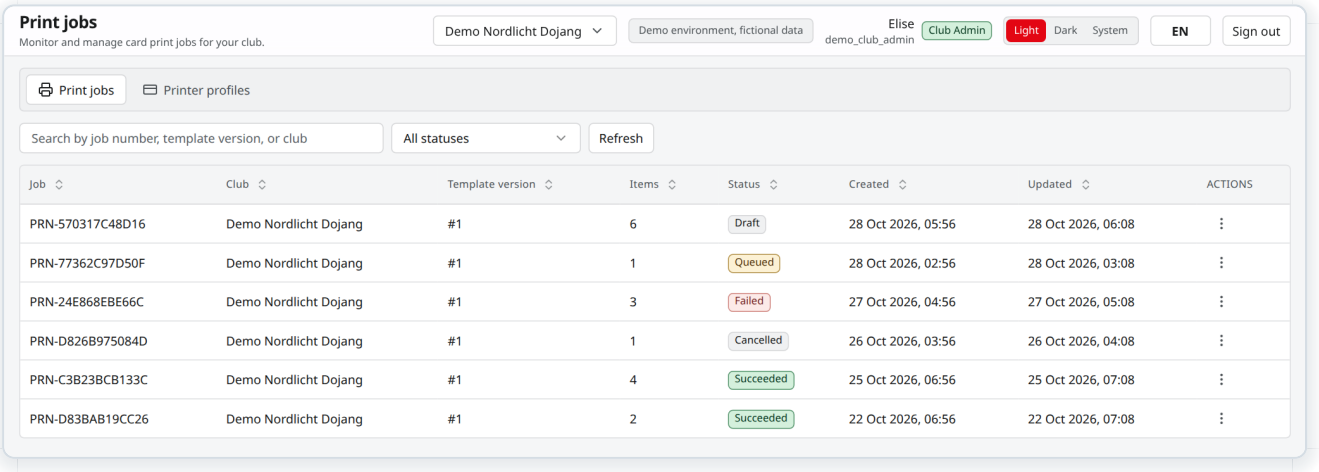

Figure 20 · Print jobs

> TIP
>
> If the print sits a few millimetres off, ask the LTF for a printer profile with the right X/Y offset instead of changing the card design.

4.9 Transfers between clubs

A member who moves to another club is **sent** by the old club and **accepted** by the new one. The license and history move with the member.

▶ To send a member to another club:

1. Open **Transfers**.
2. Click the member in the left column, then click the destination club on the right. Type in the search boxes to find them faster.
3. Enter a **Fee (EUR)** if your club charges one, or leave it at 0 for a free transfer, and add a note.
4. Click **Send request**.

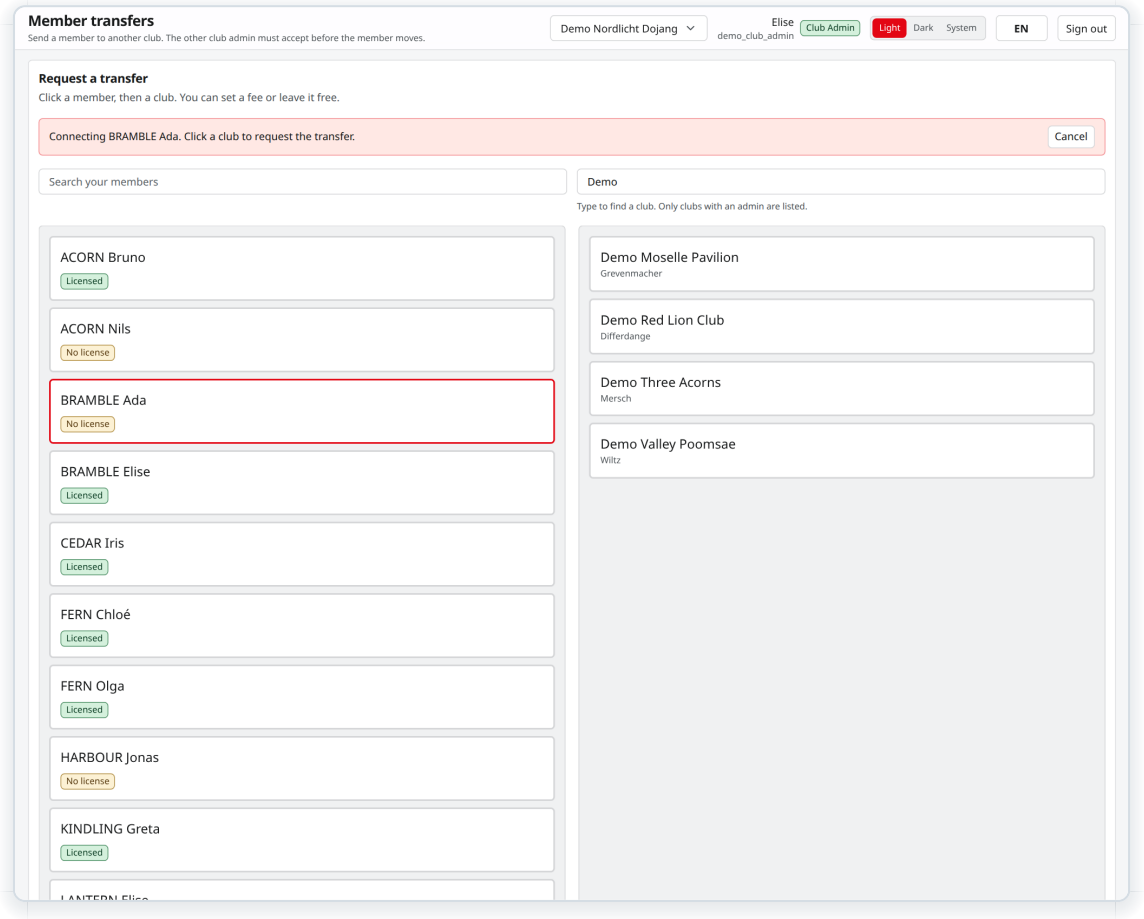

Figure 21 · Choosing a member and the new club

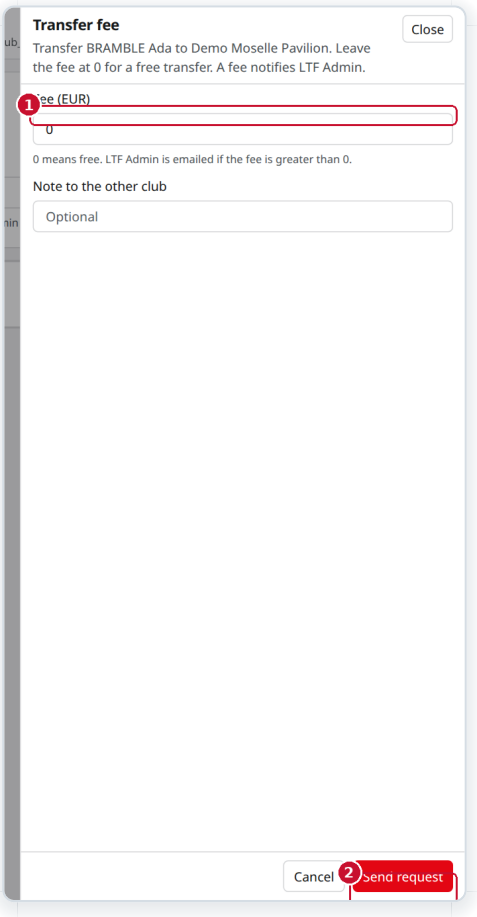

Figure 22 · The transfer fee, before the request is sent

▶ To answer a request from another club:

1. Open **Transfers**. Incoming requests are listed under **Requests and messages** › **Incoming**.
2. Click the request. Read the messages; write one with **Send** if you have a question.
3. Click **Accept transfer** or **Reject**.

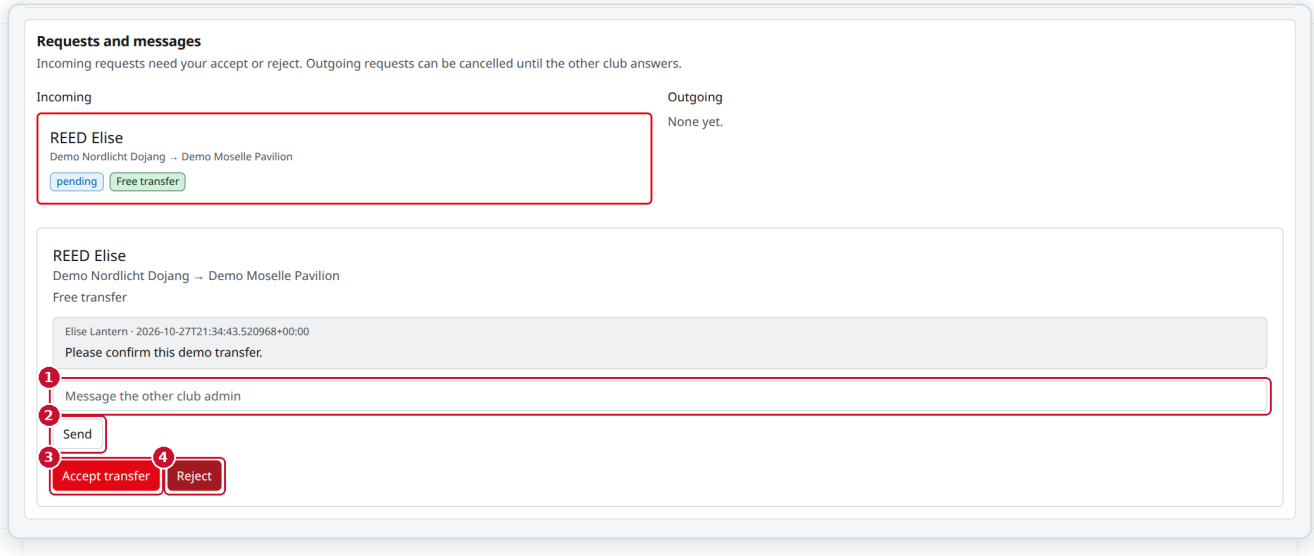

Figure 23 · Answering an incoming transfer

1. Write a message to the other club.
2. **Send**
3. **Accept transfer**
4. **Reject**

> GOOD TO KNOW
>
> The sending club can cancel its own request until the other club has answered. Only clubs that have a club admin can receive transfers.

5

Club admin: money

Club admin | Club management module

Under **Finance** you find the club's books. The tabs across the top are: **Orders**, **Invoices**, **Payments**, **Billing**, **Fees**, **Income**, **Expenses**, **Bank**, **Reports** and **Subsidies**.

> GOOD TO KNOW
>
> The club's books contain two kinds of invoices: **LTF invoices** (licenses your club buys from the federation) and **club invoices** (membership fees and shop sales you bill to your members). The **Accounting** filter on **Invoices** switches between them.

5.1 Who may record payments

Payments and other changes to the club's books need a **current committee office**:
Only the president, vice president, treasurer, secretary general, or secretary can record payments.
Make sure the committee is up to date in **Club profile** › **Committee** (see Committee (p. 55)).

5.2 Families and rebates

A family groups members who live together so they get one invoice and family rebates.

1. Open **Families**. Type a **Family name** and click **Create family**.
2. Open the family and add the members **in rebate order**: rank 1 pays full price, rank 2 gets the second-member rebate, and so on.
3. Under **Receives the bill**, choose who receives the bill, or click **Add a parent or guardian** for a parent who is not a member.
4. Choose the **Invoice delivery**. **Email if possible, otherwise post** is a safe default.

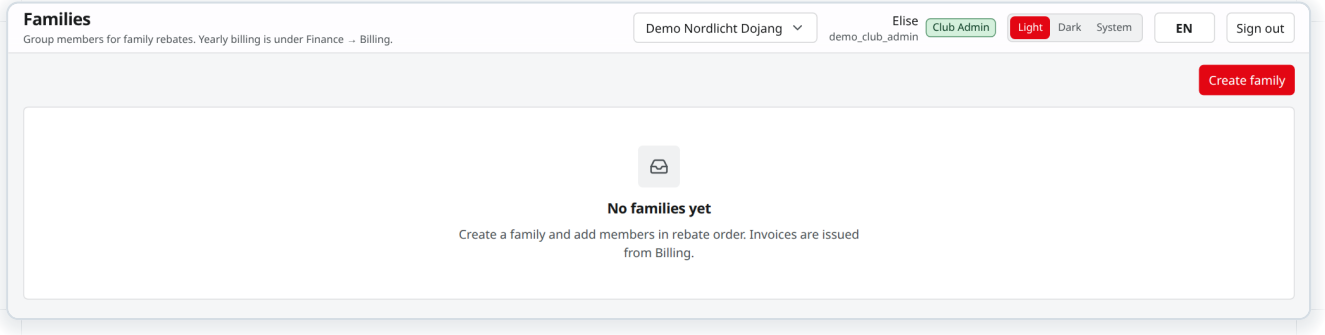

Figure 24 · Families

Use **Invoice preview** to check the amounts before you bill.

5.3 Membership fees

Fees is the price list. Set it up once; it carries over to the next year.

1. Under **Membership fees**, type a **Fee name** (for example “Adults”) and an **Amount (EUR)**, then click **Add membership fee**. Add one fee per kind of dues, such as children, adults, family.
2. When a price changes, do **not** create a new fee: open the fee, enter the new amount and **Applies from** date and click **Save new amount**.
3. Under **License fee**, set the amount you charge members for their LTF license, or leave 0.00.
4. Under **Billings for the year**, click **Add another billing** only if you bill the membership fee more than once a year (for example a spring bill). Then choose under **License fee billing** which bill carries the license fee – see When the license fee is charged (p. 33).
5. Under **Family rebates**, click **Add rebate rule** for rank 2, 3... Choose **Percent** or **Fixed amount**. Tick **Also apply to every following member** so that every further child gets the same rebate.

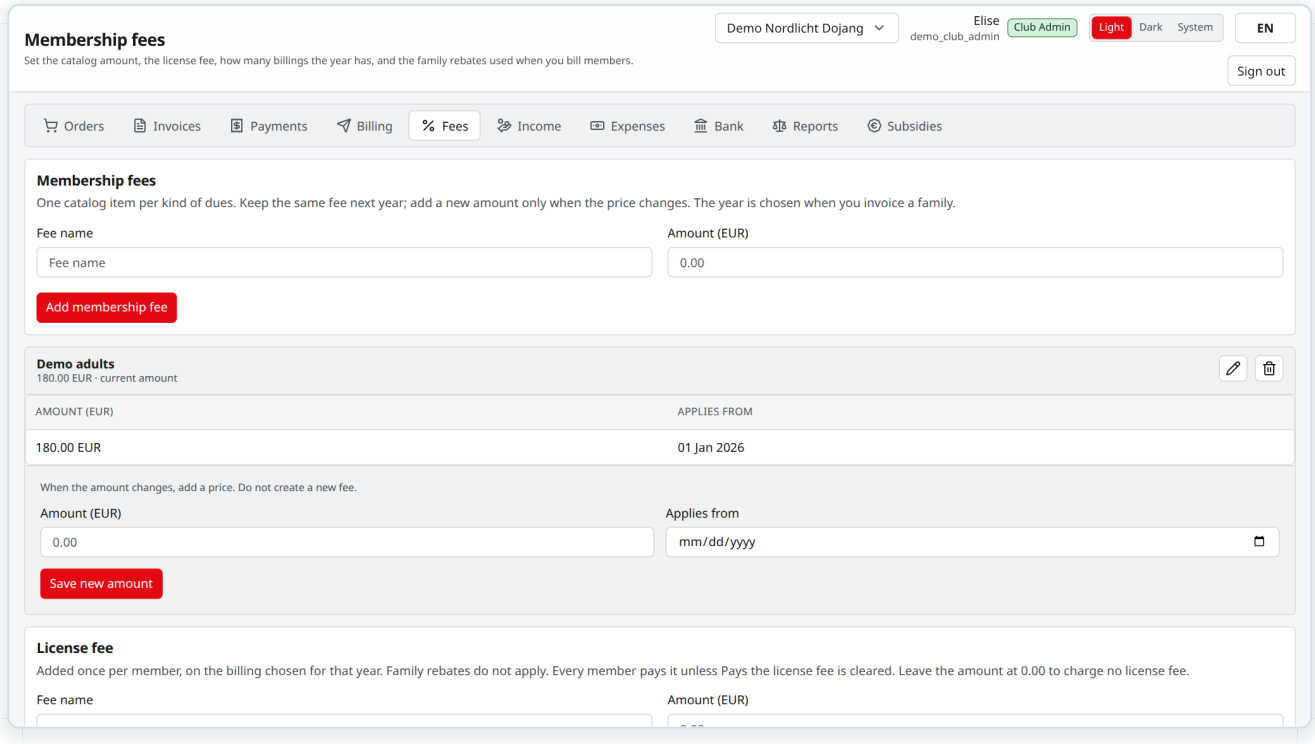

Figure 25 · Membership fees

> GOOD TO KNOW
>
> The license fee is added once per member and season, on the bill chosen under **License fee billing**. Family rebates never reduce it.

5.4 Billing the year

Once fees and families are ready, billing the whole club takes a few clicks.

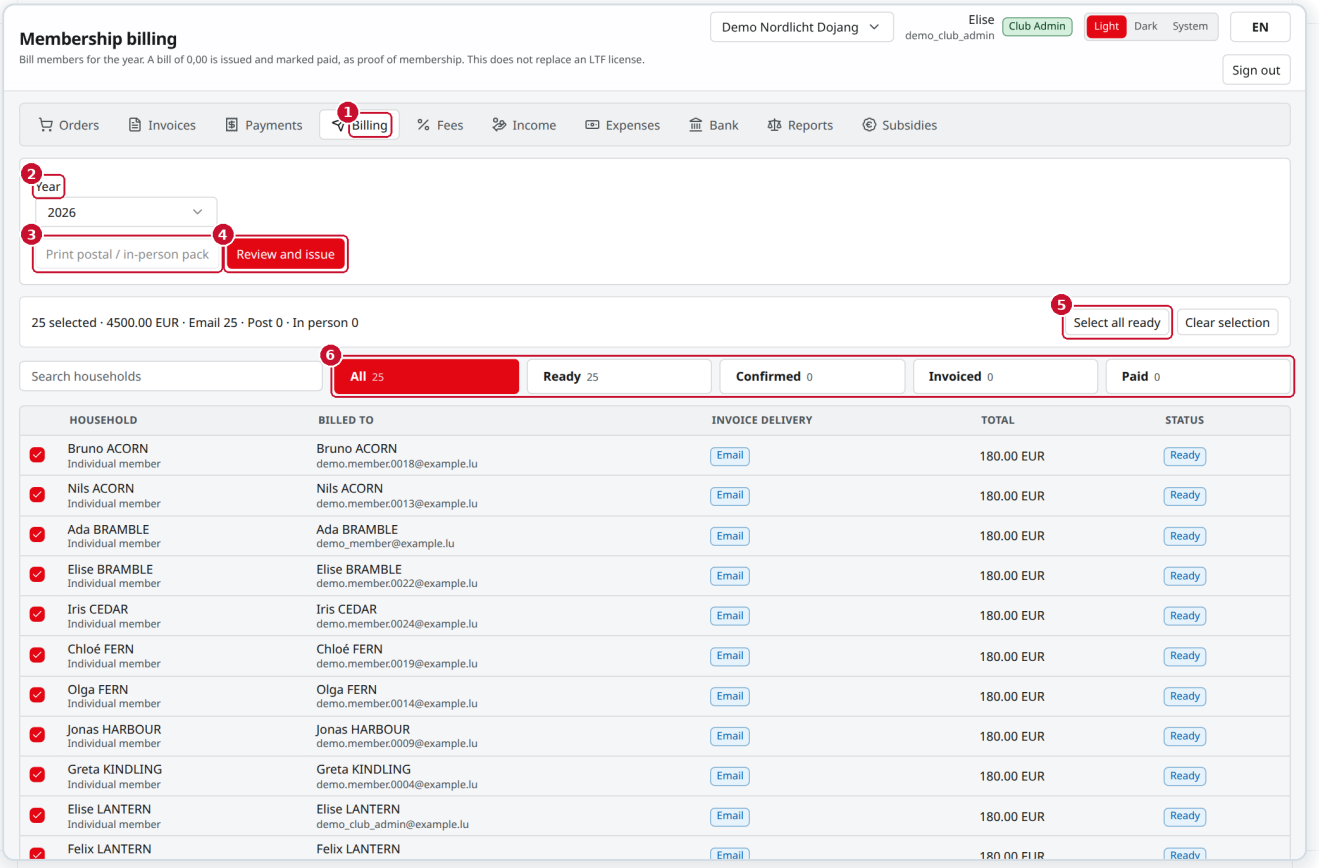

Figure 26 · Membership billing

1. The **Billing** tab.
2. **Year** and, if your club bills more than once, the billing.
3. **Print postal / in-person pack** – a PDF of all invoices to post or hand over.
4. **Review and issue**
5. **Select all ready**
6. Status filter.

1. Open **Finance** › **Billing** and choose the **Year**.
2. Look for households marked **Blocked**. The reason is shown in the row: usually **Choose who receives the bill.** (for a child) or a missing membership fee. Fix them in **Families** or **Fees**.
3. Click **Select all ready**.
4. Click **Review and issue**, check the totals in the confirmation and click **Issue invoices**.
5. Email invoices are sent at once. For the rest, click **Print postal / in-person pack** and print the PDF. The total in the email is the same total as on the PDF. A paid invoice says the amount paid. An invoice that is not paid says the amount due. A reminder states the amount still due.

✔ The households now show **Invoiced**. They turn **Paid** when you record the payment.

> GOOD TO KNOW
>
> A member with a fee of 0.00 gets a bill of 0,00 marked paid, as proof of membership. This does not replace an LTF license.

5.5 When the license fee is charged

The Taekwondo season runs from September to September, like the Luxembourg school year. The license fee is normally charged with the **first bill of the season**. In the app, however, billings are counted per calendar year (**Year**), so the first bill of the season is not always **Billing 1** .

- **One bill a year** (usually in autumn): it opens the season and carries the license fee. There is nothing to set.
- **Two bills a year**: the spring bill covers the second half of the running season, and the autumn bill opens the new season. The autumn bill is then the **second** bill of the calendar or financial year, and it is the one that should carry the license fee.

Example: a club bills in February and in October 2026.

Bill	In the app	Season	License fee?
February 2026	**Billing 1** , label “Spring”	second half of 2025/26	no – already charged in October 2025
October 2026	**Billing 2** , label “Autumn”	start of 2026/27	yes

▶ To set this up:

1. Open **Finance** › **Fees** and pick the **Year** under **Billings for the year** .
2. Click **Add another billing** and enter a **Label** for the new bill, for example “Autumn”.
3. Under **License fee billing** , choose **Billing 2** .

> GOOD TO KNOW
>
> The app describes this rule in two places. **Billing** says the license fee is added “on each member's first bill”; **Fees** says “on the billing chosen for that year”. Both mean the same bill: the one chosen under **License fee billing** , which is the first bill of the season. A member who joins after that billing has started pays the license fee on the next bill. Invoices already issued stay as they are.

5.6 Recording a payment

1. Open **Finance** › **Invoices** and click **Record payment** next to the invoice.
2. Check the **Payment date** . It defaults to today.
3. **Transaction communication** is pre-filled with the invoice number, so it matches the bank transfer.
4. Choose the **Payment method** and click **Record payment** .

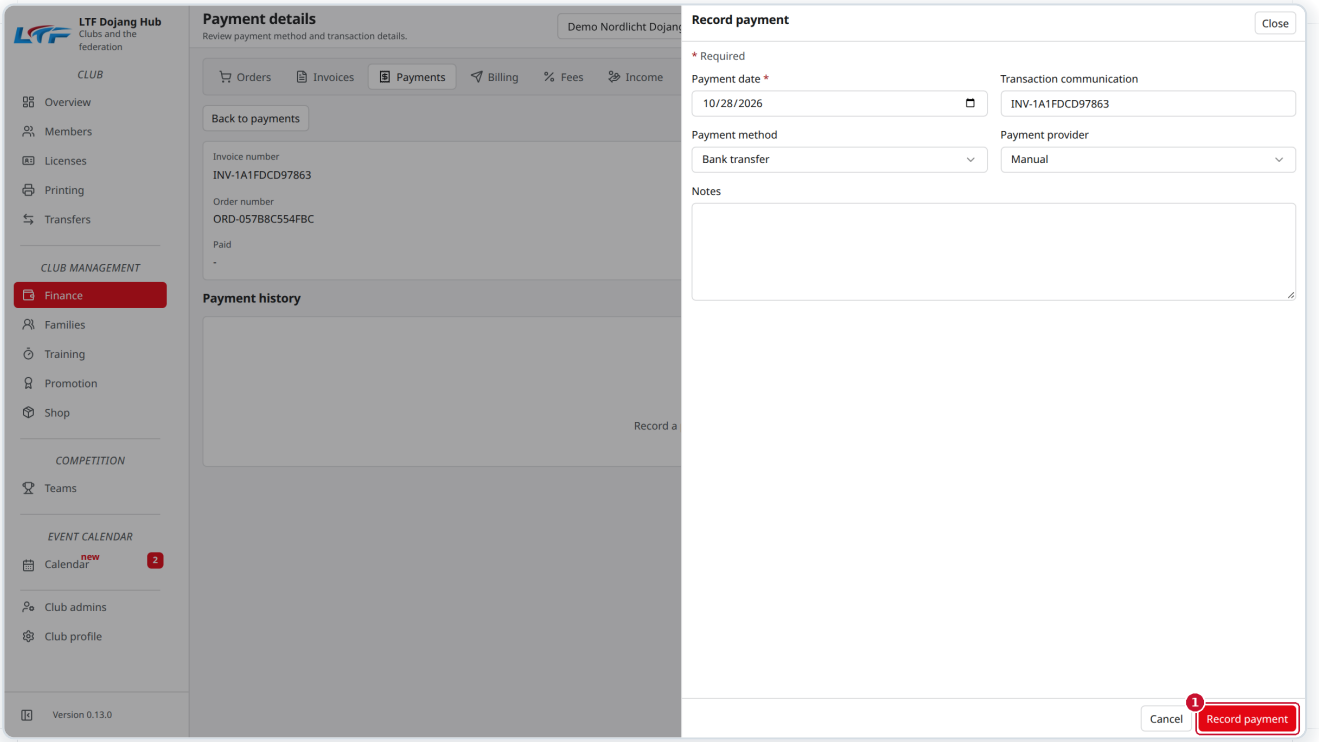

Figure 27 · Recording a payment

> TIP
>
> Ask parents to put the invoice number in the transfer communication. It makes bank matching (below) almost automatic.

5.7 Paying the LTF

LTF invoices for your license orders are in **Invoices** with the **Accounting** filter set to LTF.

Pay by bank transfer and put the invoice number in the communication. LTF Finance records the payment and activates the licenses.

Or pay by card. On an issued LTF invoice that still has an amount open, open the row menu or the invoice and click **Pay now**. You leave the app for the card provider's page (Stripe). That page shows one line for this LTF invoice, with the invoice number and the amount still open, and the fields for the card. Confirm the payment there. The provider sends you back to this app, the licenses are activated, and the page reads **Payment successful**.

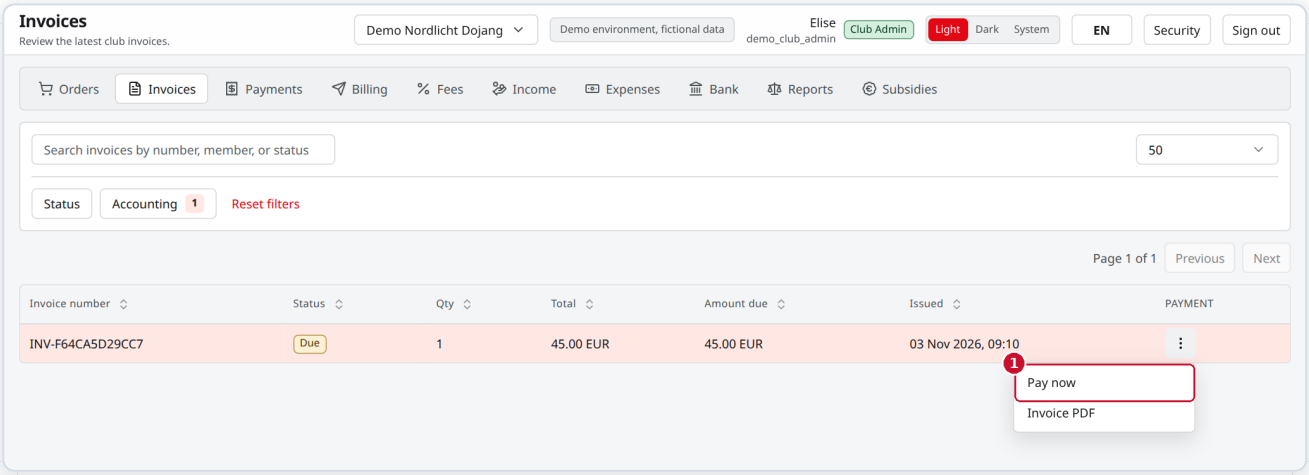

Figure 28 · Pay now, in the row menu of an LTF invoice

If you use the provider's back link and do not pay, you return here and the page reads **Payment cancelled**. Nothing is charged and the licenses stay as they were. A club invoice sent to a member is not paid on this page. Parents have no login. A member login does not open this card payment.

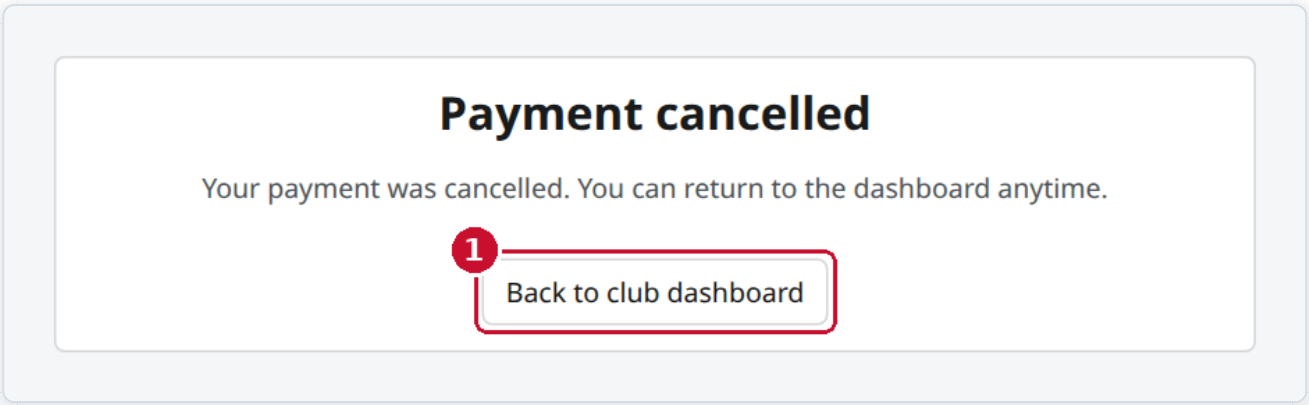

Figure 29 · Payment cancelled, with the way back to the club

On both pages, the button under the title is the way back. It names the desk you left:

- **Back to club dashboard** – the usual label when a club admin started from the club's invoices
- **Back to LTF dashboard**
- **Back to finance dashboard**
- **Back to your account**
- **Back to ops**

Club invoices that you send to your own members are not paid with this button. Record those yourself. See Recording a payment (p. 33).

> GOOD TO KNOW
>
> If the card page does not open, the screen says **Unable to start payment.** . The invoice is unchanged. Pay it by bank transfer.

5.8 Other income and expenses

- **Income**: click **Record income** for subsidies, donations, sponsoring and other income. Attach a **Receipt** if you have one.

- **Expenses**: the page for the club's own expenses. Its subtitle reads **Record this club's expenses for the annual books and reports.** Click **Record expense**. The form confirms that the expense goes to your club's accounts, not the federation's: **Book an expense against this club's accounts.** Fill in **Expense date**, **Category**, **Description**, **Payee** and **Amount**. Tick **Already paid** if the money has left the account and choose the **Payment method**. You can attach a **Receipt** (PDF or image).

Wrong entry? Open it and use **Void income** or **Void expense**. Voided entries stay visible for the auditors.

5.9 Bank reconciliation

Bank compares your bank statement with the books. No bank connection is used: you upload a file.

1. Download a CSV or CAMT.053 statement from your online banking.
2. In **Bank**, click under **Statement file** to choose the file, then click **Import statement**.
3. Open the statement. Match each line to a payment, income or expense, or mark bank-only items such as fees as ignored.

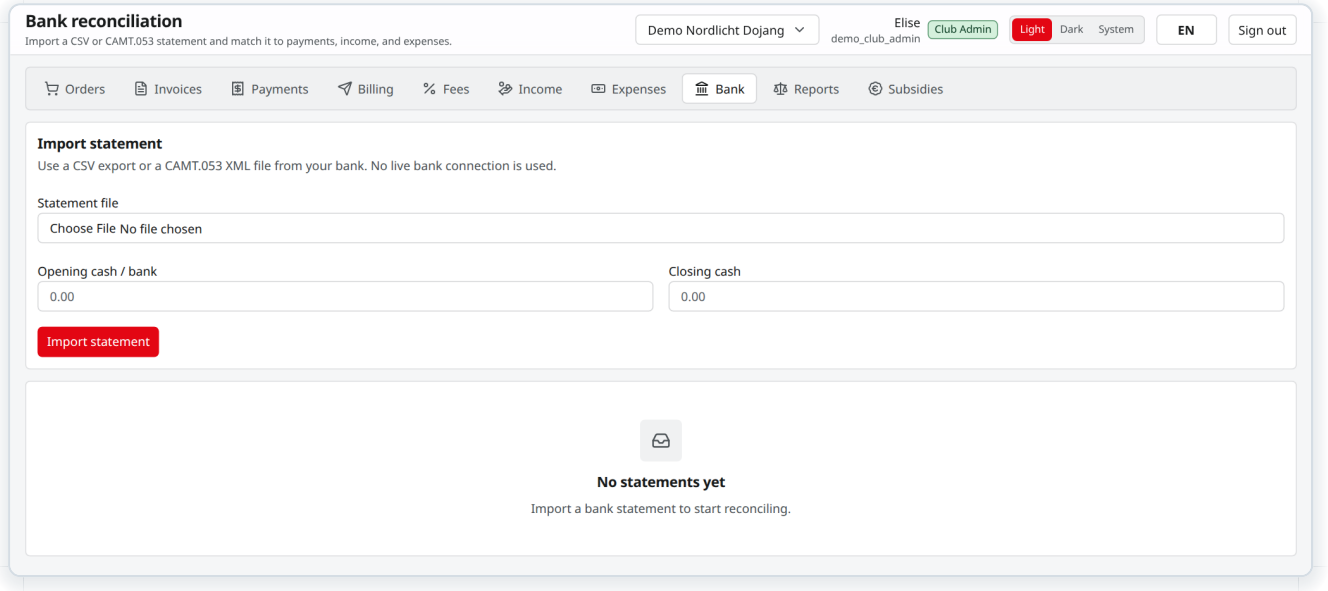

Figure 30 · Bank reconciliation

5.10 Reports for the general assembly

Reports prepares the income statement, the cash movement and a budget comparison for a **Financial year**. Enter the **Opening cash** once per year and click **Save opening cash**. **Export Excel** downloads everything as a spreadsheet for the auditors.

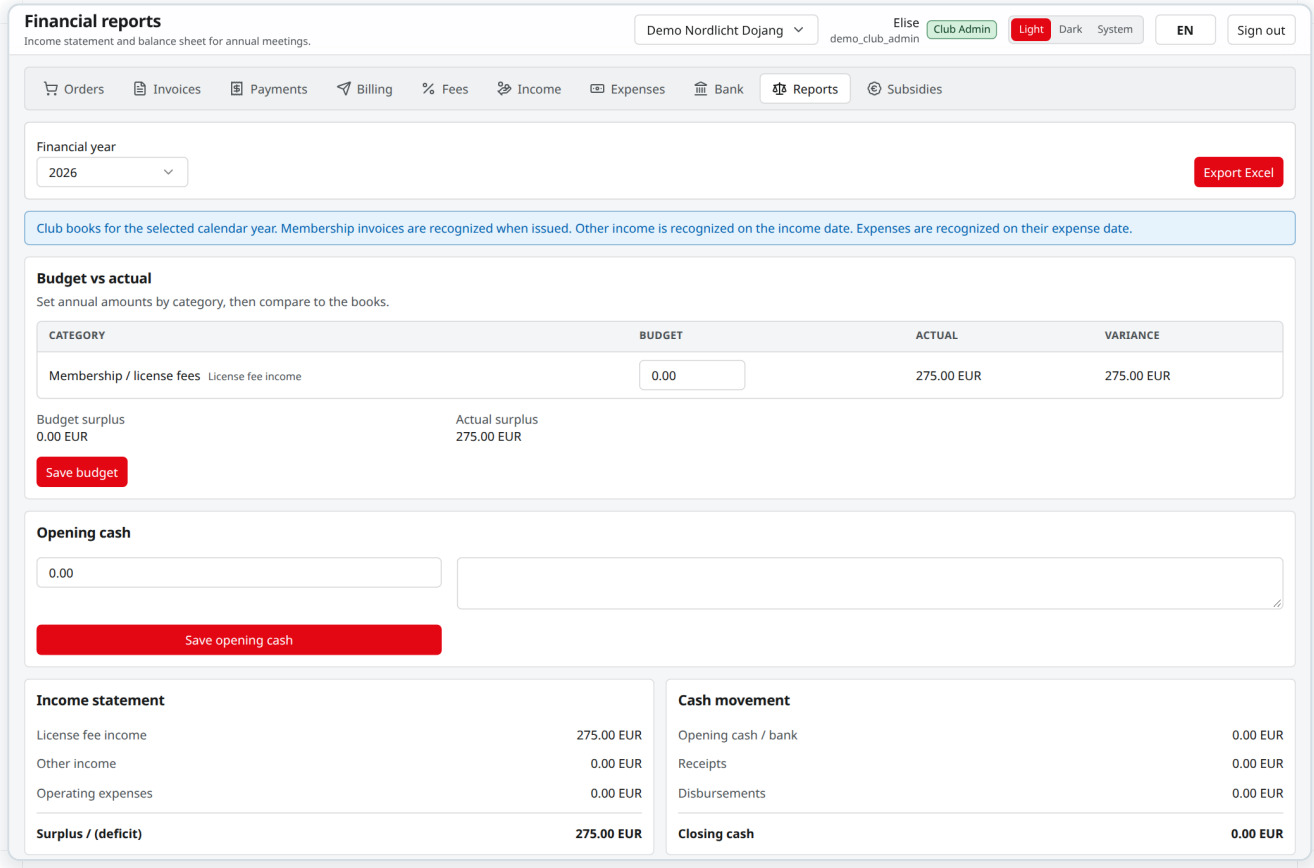

Figure 31 · Financial reports

5.11 Subsidies

Subsidies prepares the yearly MyGuichet file for the ministry and fills extraordinary grant forms. The app does not send anything: you still file the application yourself.

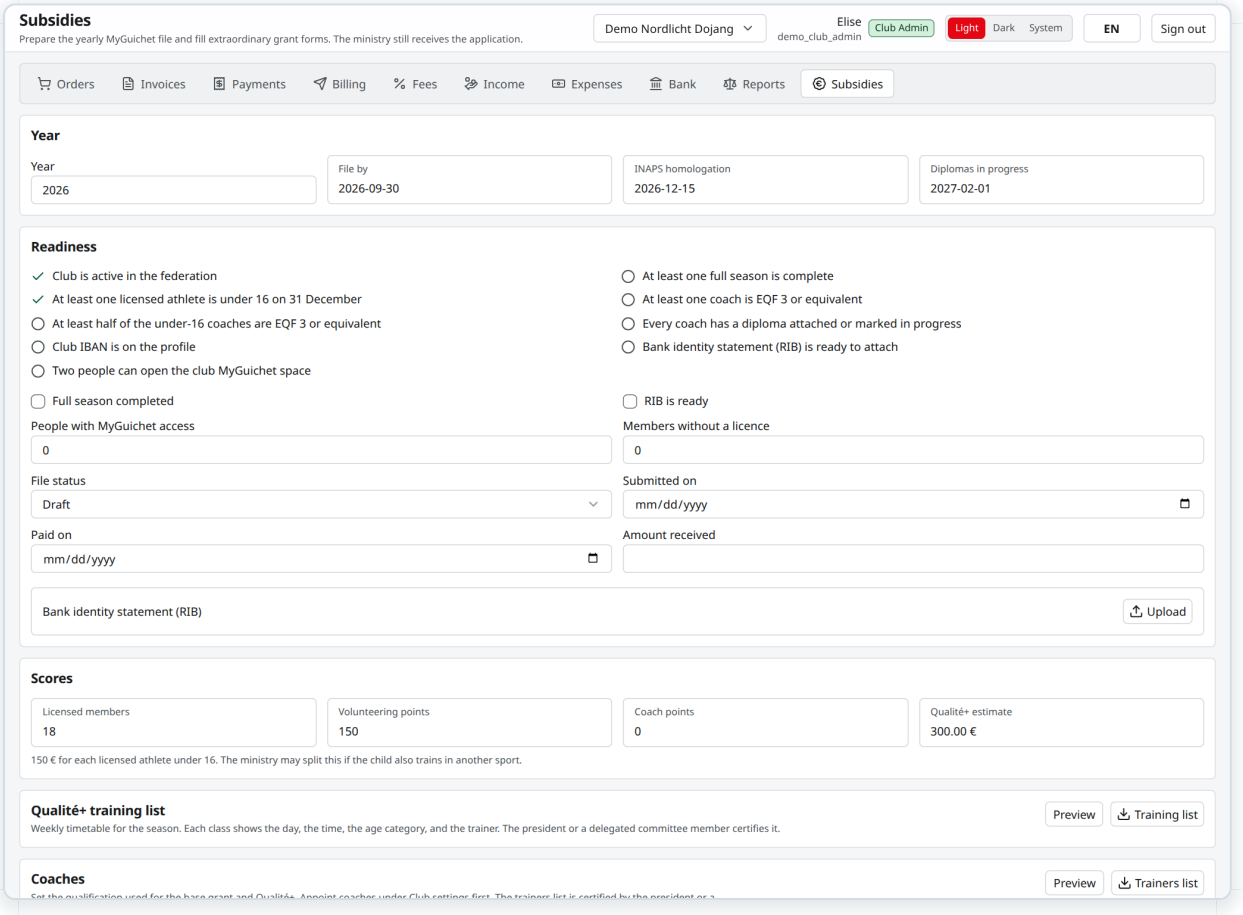

Figure 32 · The subsidies page

1. Choose the **Year**. The default filing deadline is 30 September.
2. Work through **Readiness** until every point is green.
3. Upload the **Bank identity statement (RIB)**.
4. Under **Coaches**, set each coach's **Qualification** and upload the diploma. Coaches are appointed in **Club profile** › **Coaches**.
5. Download the **Training list** and the **Trainers list**. The president or a delegated committee member certifies them.
6. Under **Athletes under 16**, type each child's national number and export the **Youth list CSV**.
7. Copy the **Headcount for MyGuichet** table into MyGuichet.
8. After filing, record **Submitted on**, and later **Paid on** and **Amount received**. The next time a president, vice president, treasurer or secretary opens the page, the amount is added to club income.

The scores are calculated as follows:

Score	Rule used by the app
Volunteering points	fewer than 50 licensed members: 150 · 50 to 200: 300 · more than 200: 500
Coach points	per coach, by qualification: EQF 1 and 2 = 20 · EQF 2 bis and 3 = 40 · EQF 4 = 60 · EQF 5 and 6 = 100
Qualité+ estimate	€150 per licensed athlete under 16

For trips to a championship or an international cup, use **Extraordinary grants**: choose the **Type**, add athletes and officials, enter travel, stay and entry costs, click **Save request** and then **Download filled form**.

An official must be an adult with a license for that year. **Adults only, 18 or older on 31 December.** The list offers the members who hold a license for the year, and only the adults among them can be officials. Saving a person who has no license for the year is refused.

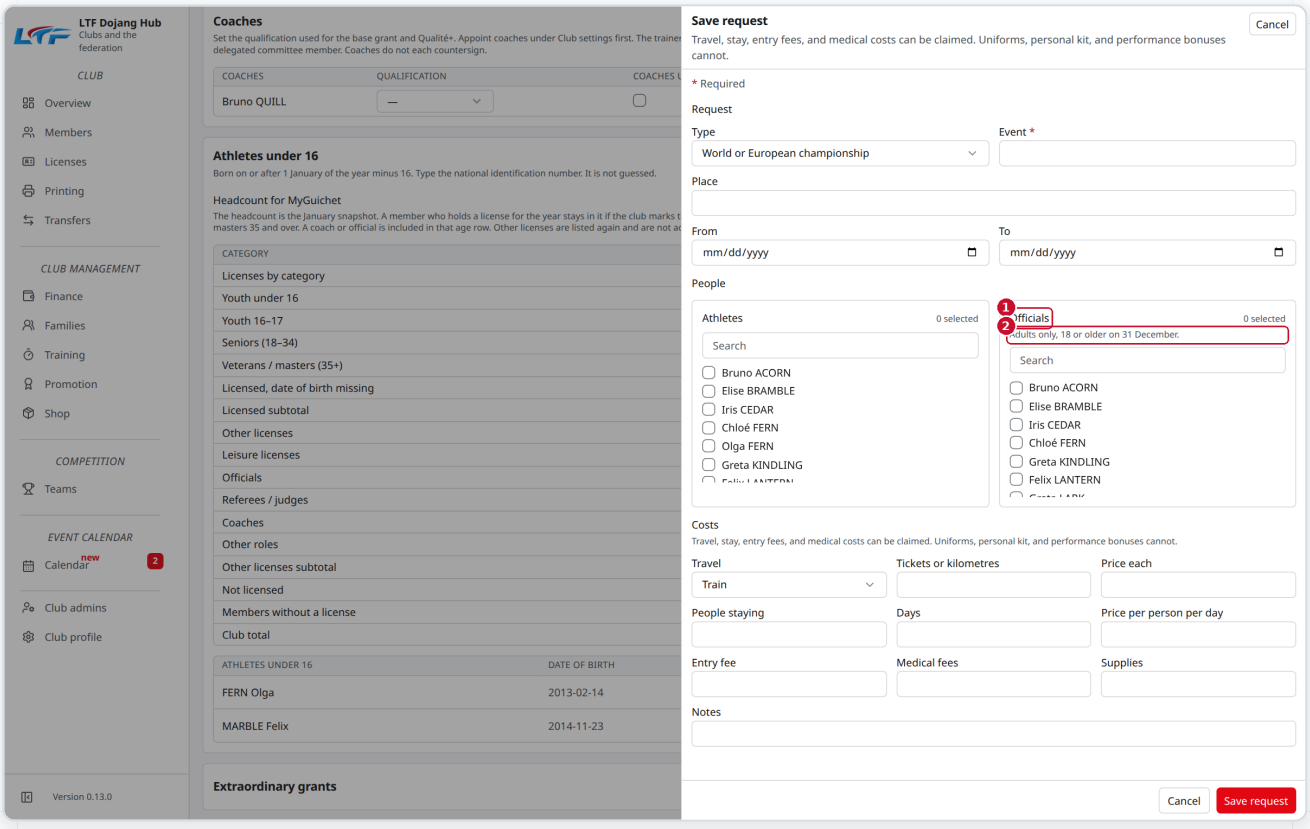

Figure 33 · Officials on an extraordinary grant: licensed adults only

1. **Officials**
2. **Adults only, 18 or older on 31 December.**

6

Club admin: training and promotion

Club admin | Coach | Club management module

Training has six tabs: **This week**, **Month**, **Year**, **Timetable**, **Holidays** and **Coach pay**.

6.1 The week

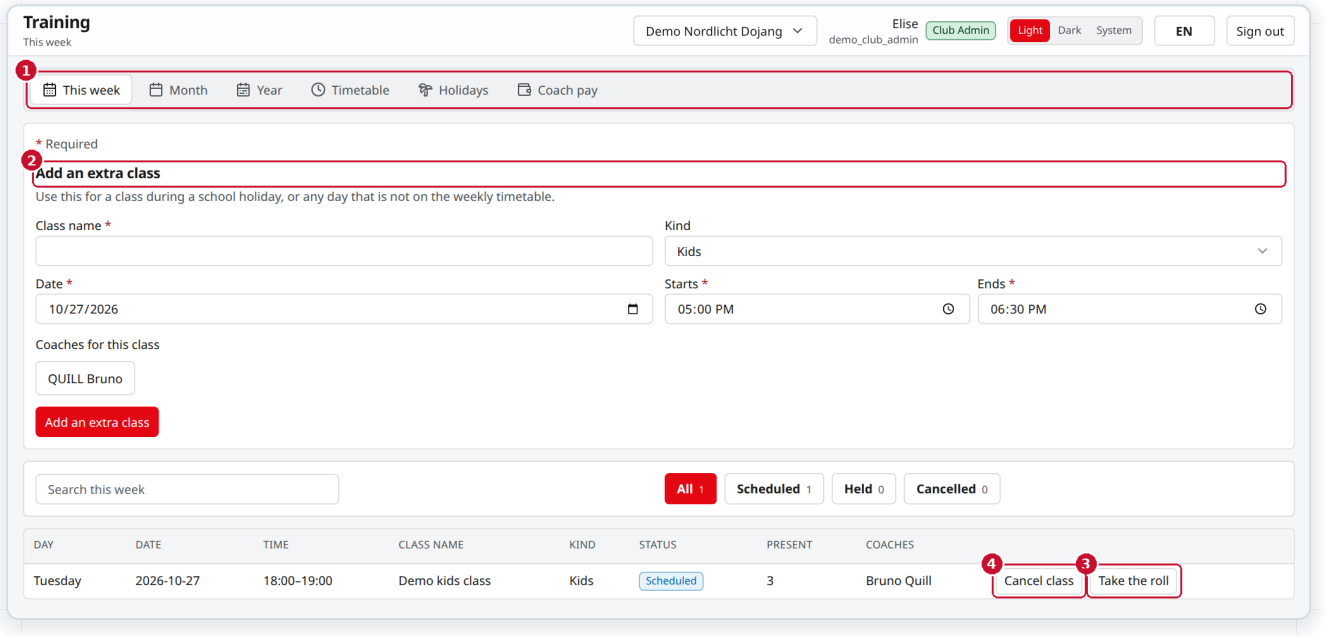

Figure 34 · The training week

1. The training tabs.
2. **Add an extra class** – for a class on a school holiday or any extra date.
3. **Take the roll** – see Taking the roll (p. 15).
4. **Cancel class** – for example when the hall is closed. Club admins only.

6.2 Setting up the timetable

Do this once at the start of the season. Each class then repeats every week until the end date.

1. Open **Timetable**.
2. Under **Add class**, enter **Class name**, **Kind**, **Day**, **Starts** and **Ends**, and the season **From** / **To**. Choose the training venue from club settings. The place is optional. A class saved earlier with only a place name keeps that name.
3. Keep **Skip Luxembourg public holidays** and **Skip school holidays** ticked if the club pauses then.
4. Tick **Counts for under 16** for classes that belong on the Qualité+ training list.
5. Choose the **Usual coaches** and the **Usual students**. The regulars are pre-selected on every roll.

6 Click **Add class**.

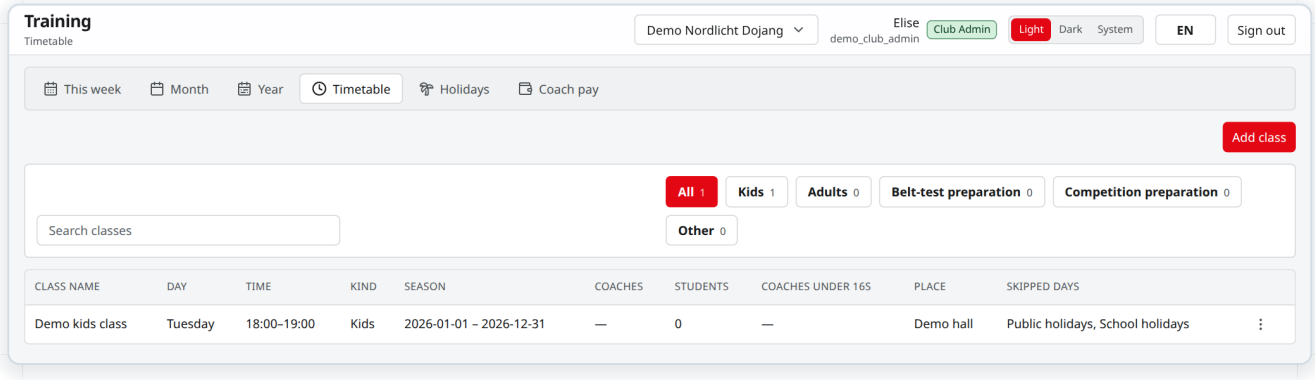

Figure 35 · Adding a weekly class

6.3 Holidays

Holidays lists Luxembourg's **Public holidays** for the year. Add your **School holidays** with **Add school holiday**. Classes that skip holidays are left out automatically on those days.

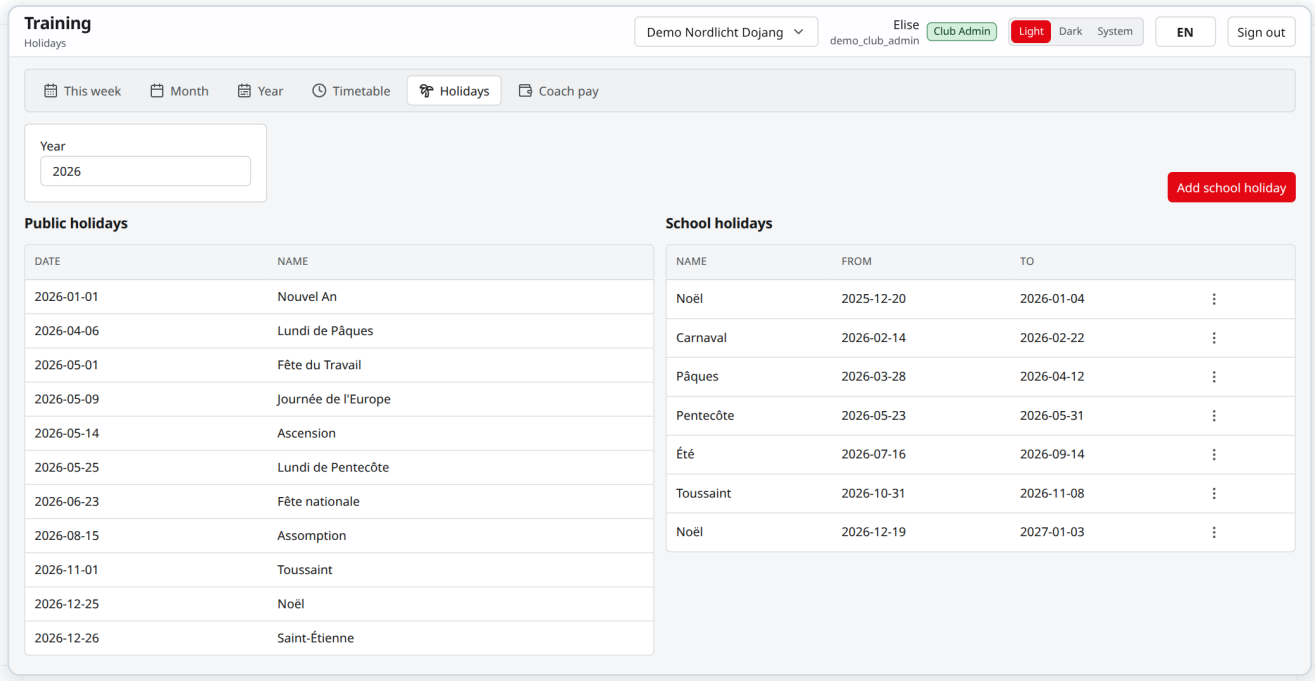

Figure 36 · Public and school holidays

6.4 Month and year views

Month shows the classes as a calendar; **Year** shows one mark per class over the whole season. Open a day to take the roll.

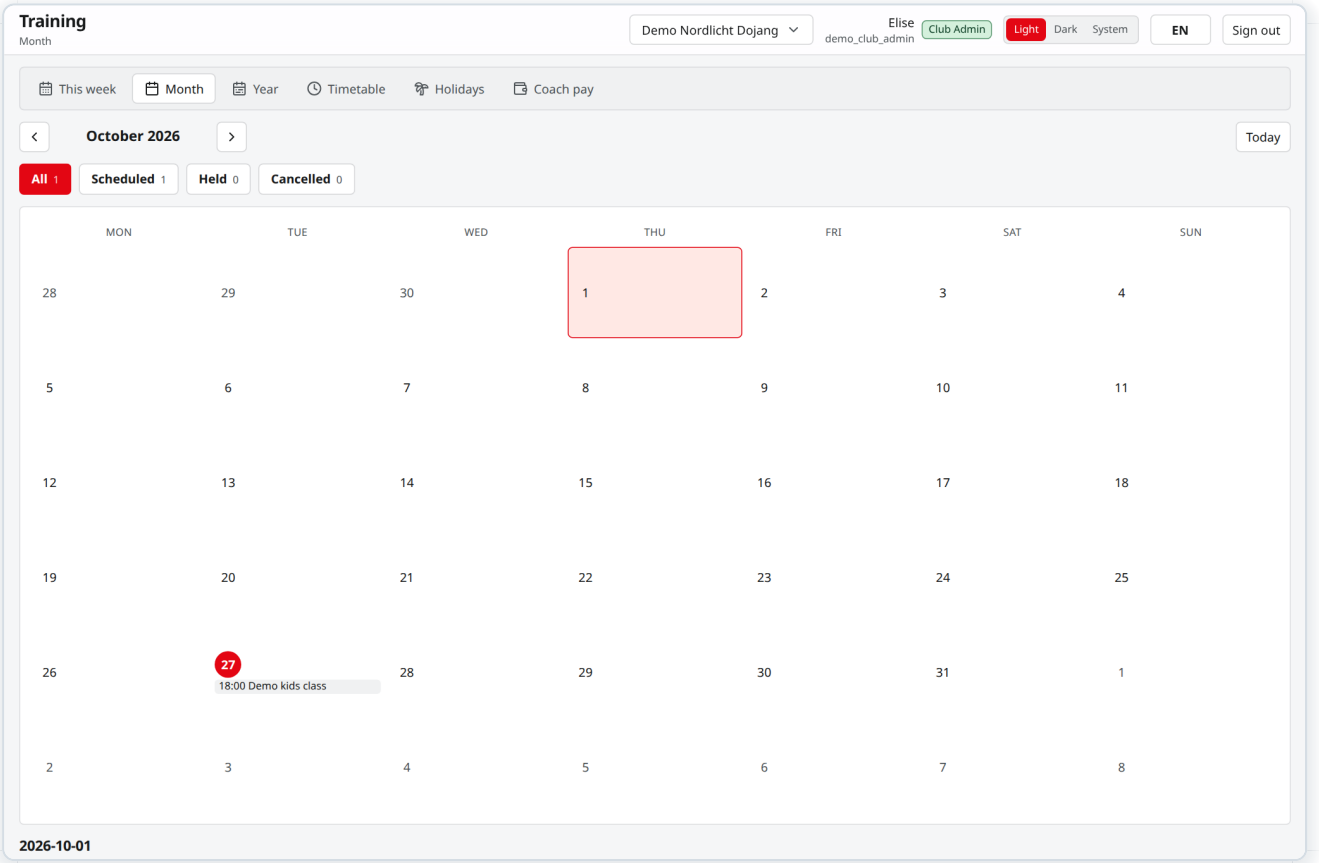

Figure 37 · The month view

6.5 Coach pay

Coach pay adds up what each coach is owed.

1. Set **How often** and the paydays, then click **Save paydays**.
2. Under **Coach rates**, choose for each coach **Hour** or **Training unit**, enter the **Rate (€)** and click **Save rate**.
3. Under **Tournaments, fuel, and hotel**, add a row for a tournament, fuel or a hotel the club pays.

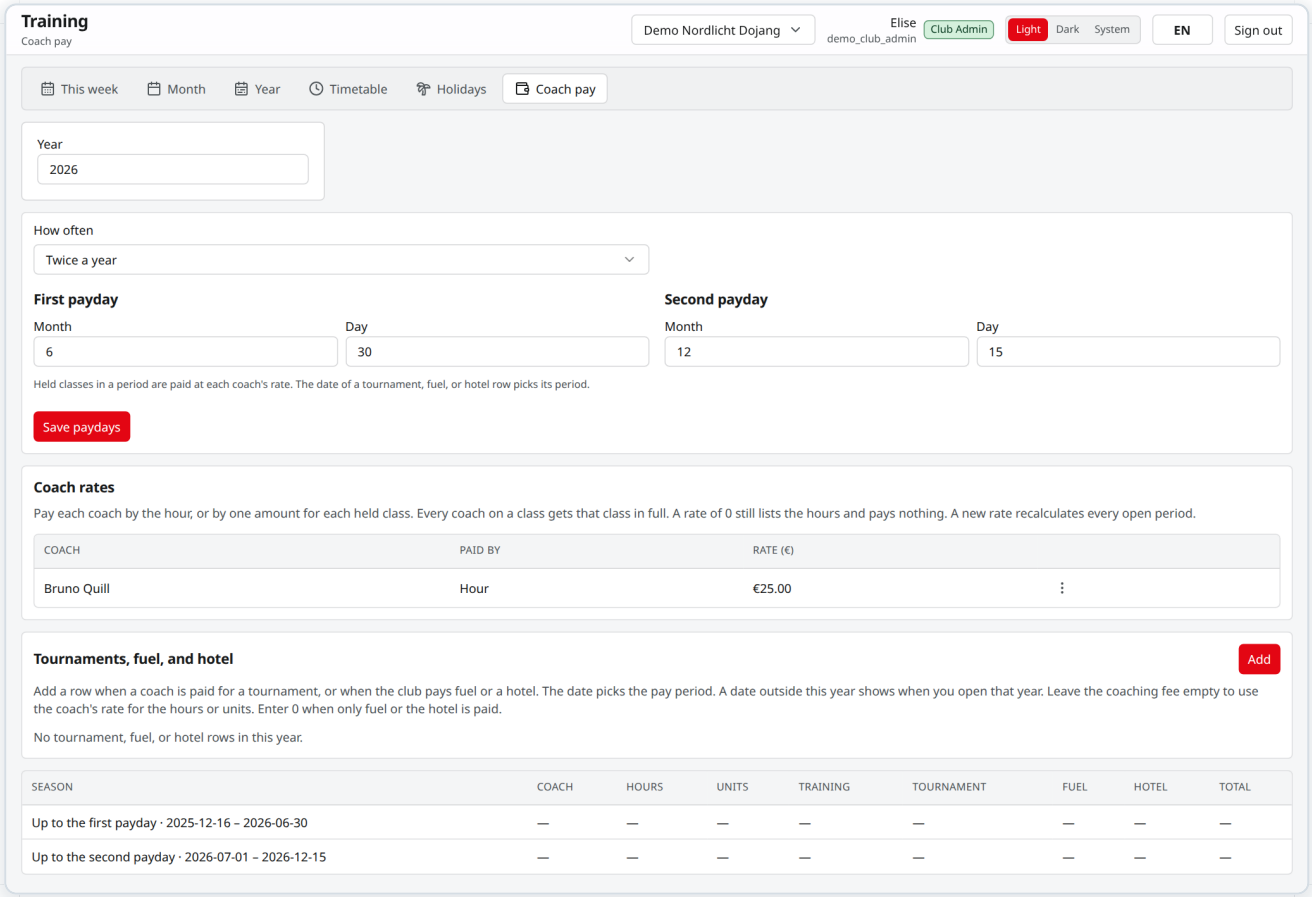

Figure 38 · Coach pay

> GOOD TO KNOW
>
> Only held classes (roll saved) are paid. Every coach listed on a class gets that class in full.

6.6 Promotion rules and belt tests

Promotion says how many training hours a student needs before the next grade. Hours are counted from the student's last grade.

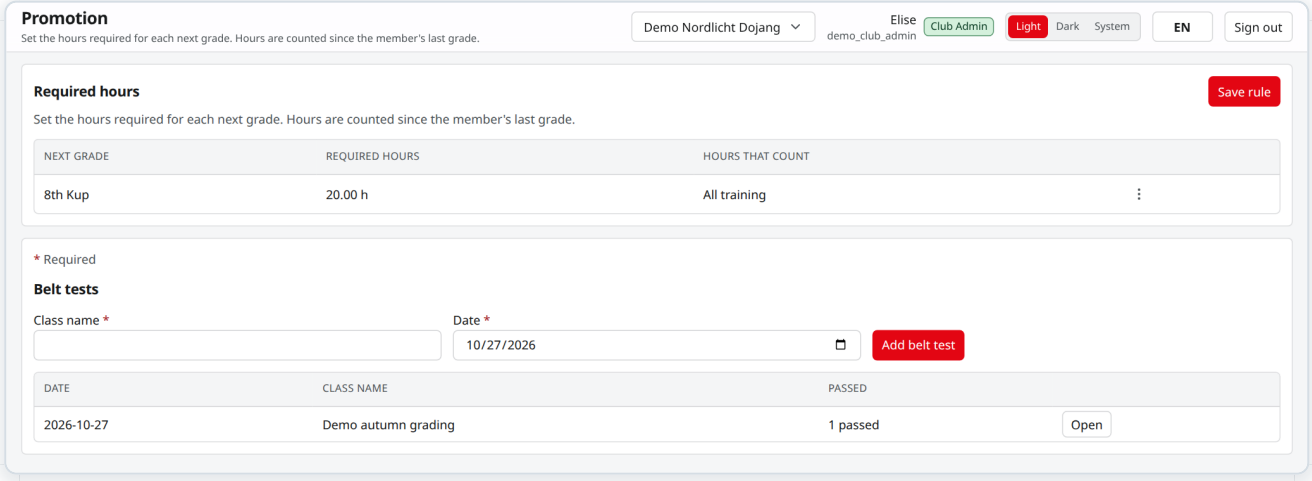

Figure 39 · Promotion rules

▶ To set a rule:

1. Choose the **Next grade**.
2. Enter the **Required hours**.
3. Under **Hours that count**, choose **All training** or one kind of class.
4. Click **Save rule**.

▶ To run a belt test:

1. Under **Belt tests**, enter the name and **Date** and click **Add belt test**.
2. Click **Open**. Candidates show their **Hours** and whether they are **Ready** or **Short**.
3. On the day, click **Pass** or **Fail** for each candidate.

✔ A pass records the new grade on the member's **Grades** tab.

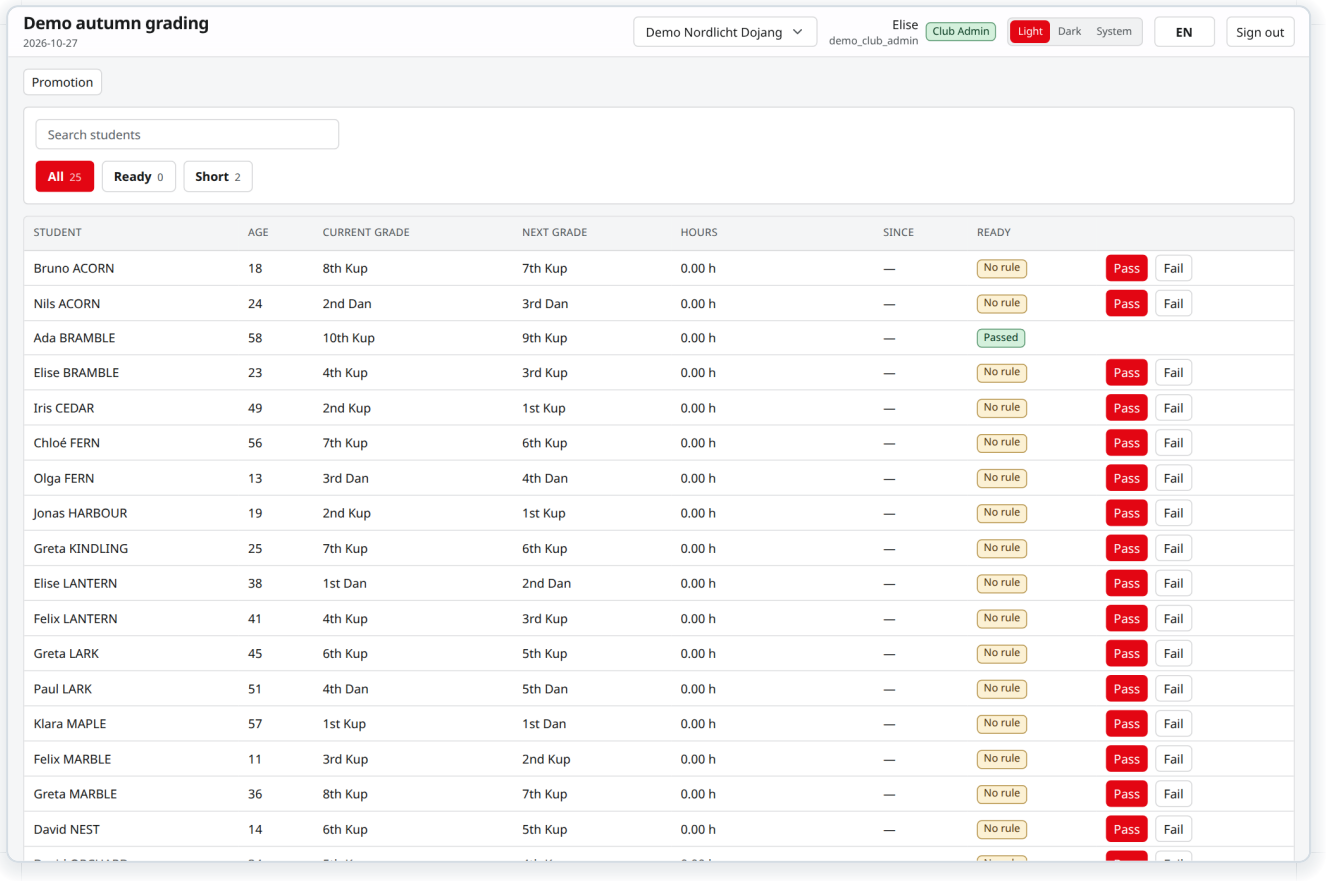

Figure 40 · A belt test

7

Club admin: teams and competition

Club admin | Coach | Competition module

Teams appears under **Competition** when the LTF has switched on **Competition**. A member can be on more than one team. Coaches can open these pages. The clothing list and the electronic-gear switches are for club admins.

7.1 Teams

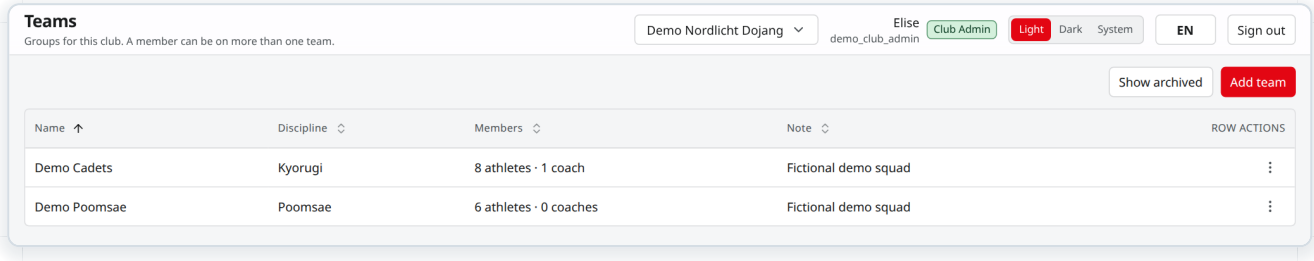

Figure 41 · The teams list

1. Open **Teams** and click **Add team**. The form opens in a side panel.
2. Enter **Name**. Choose **Kyorugi** or **Poomsae**. Click **Save**.
3. Open the team. **Manage members** adds and removes people. Each person is **Athlete** or **Coach**. Coaches are listed first.
4. On the sheet, open **Competition**. Enter **Competition date** and **Competition name**, then click **Add competition**. Age classes use that date's year. **Remove competition** clears the date, the name and the category set. The squad, the weights and the pairs stay.
5. **Quick weigh-in** records a weight for the whole squad on one date. A blank weight is skipped. **CSV** and **PDF** download the sheet.
6. For poomsae, **Pairs and teams** builds pairs and teams of three.
7. **Duplicate** copies the current squad onto a new team. Height and weight stay on each person.
8. **History** opens **Team history**: who was on the squad on the date you pick, and who was added or removed.

On **Members**, **Not on a team** lists members who are not on a team.

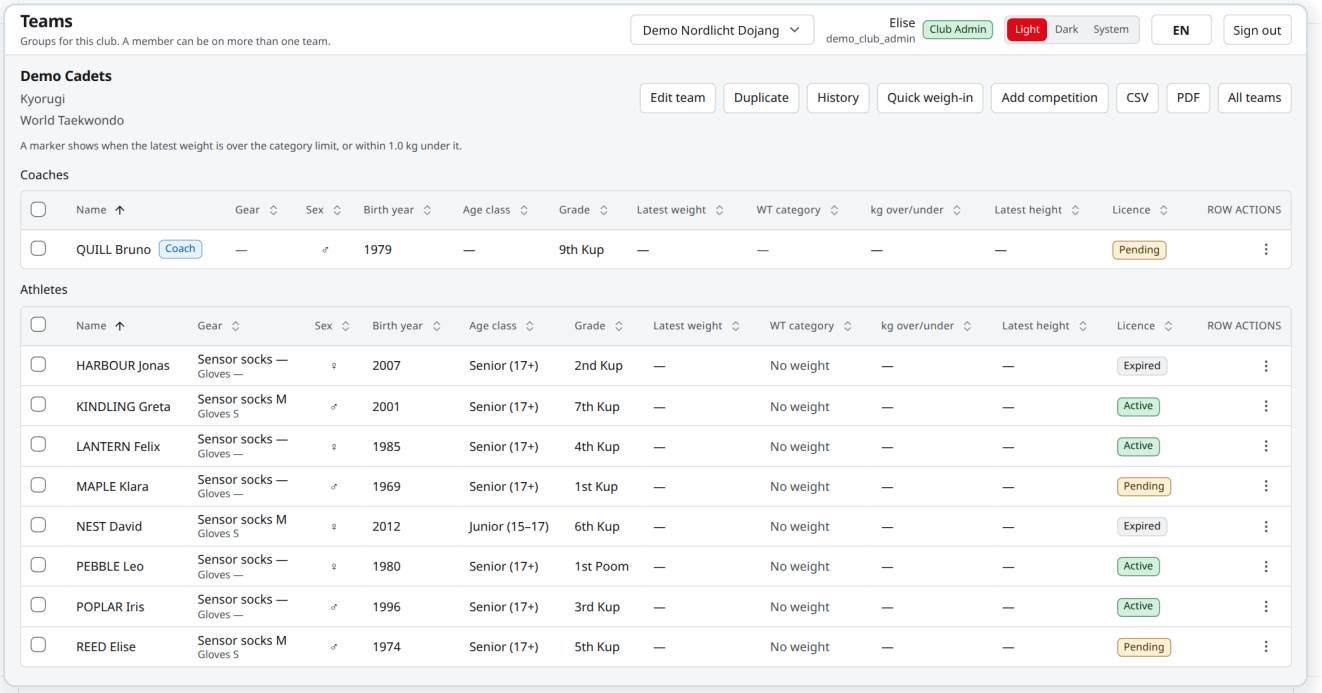

Figure 42 · The team sheet

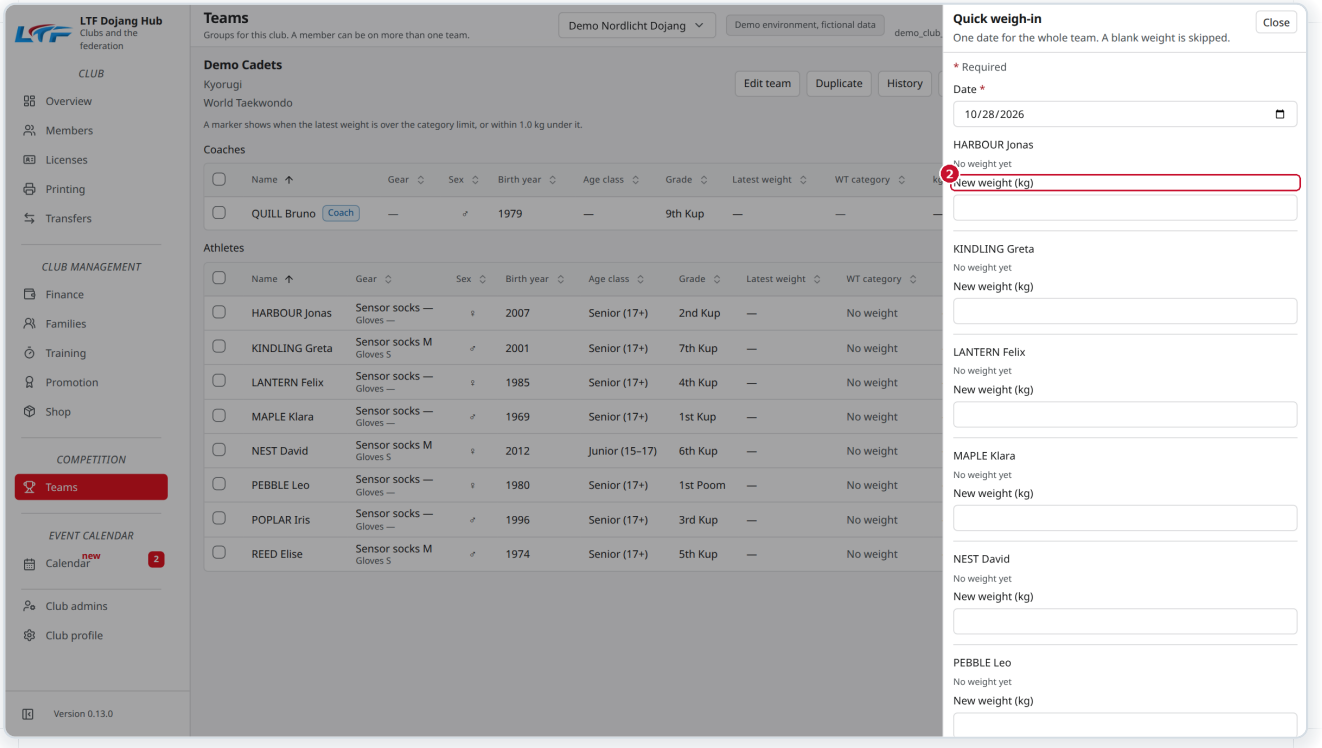

Figure 43 · Quick weigh-in for the squad

7.2 Height and weight

On the team sheet, expand a person and open **Height & weight**.
Record a dated weight, height, or both. Only this club can see it. Click **Add measurement** and record a dated weight, a height, or both. Only this club can see the measurements. They are not printed on the license card.

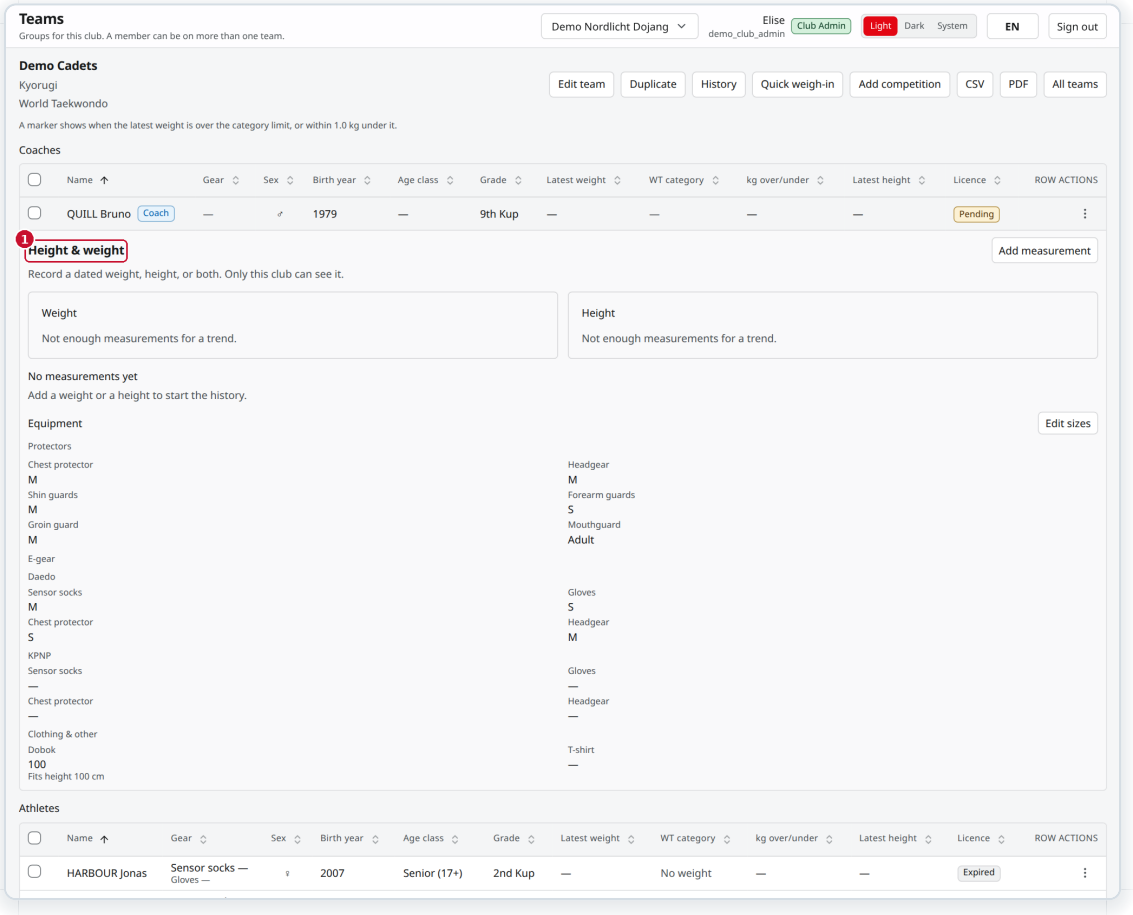

Figure 44 · Height and weight on the team sheet

7.3 Equipment sizes

Sizes are kept in three groups: **Protectors**, **E-gear** and **Clothing & other**. On the member's overview, **Equipment** leads to **Edit sizes**. The same summary is on the team sheet.

The club decides which clothes it orders. Open **Club profile** › **Equipment sizes**. Under **Equipment sizes**, click **Add item** and enter the sizes you actually buy.
Clothes this club orders, such as a dobok, club shirt, hoodie, or tracksuit. Protectors and electronic gear stay on eac

Under **Electronic gear**, switch **Daedo** or **KPNP** off if the club does not use that brand.
Turn off a brand this club does not use. Sizes already stored on members stay. Sizes already stored on members stay, including when the brand is switched off.

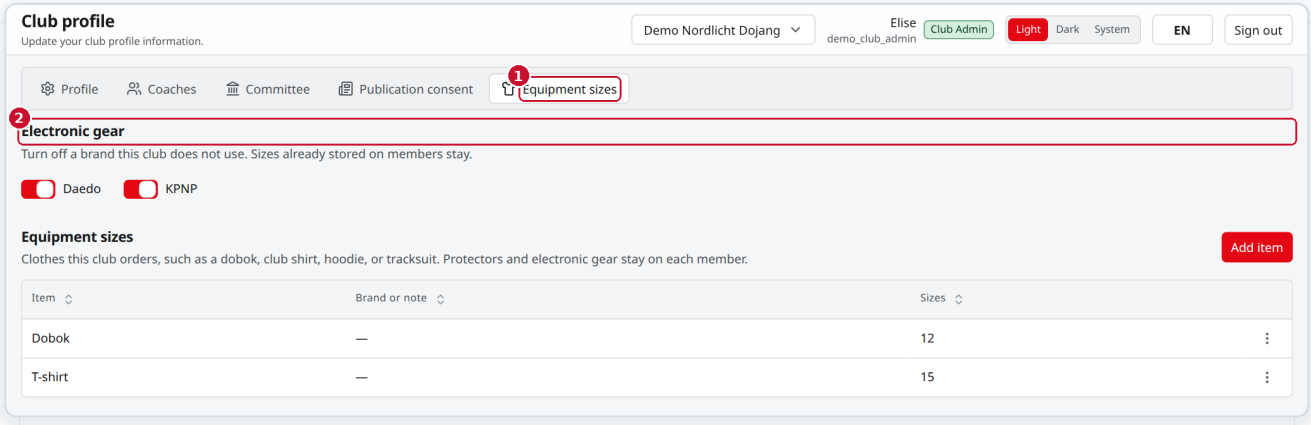

Figure 45 · Clothing sizes and electronic-gear brands

8

Club admin: the club shop

Club admin | Club management module

Shop sells doboks, belts and protectors at the club desk. It has three tabs: **Sell**, **Items** and **Sales**.

8.1 Adding an item

1. Open **Items** and click **Add item**.
2. Tap **Photo** to take a photo with your phone.
3. Enter **Name**, **Category**, **Purchase price** and **Sale price**.
4. Tick **Count stock for this item** if you want the app to stop selling when the shelf is empty.
5. Click **Save**.
6. Under **Sizes**, add each size with its own prices and the number **On the shelf now**. **Warn below** flags low stock.

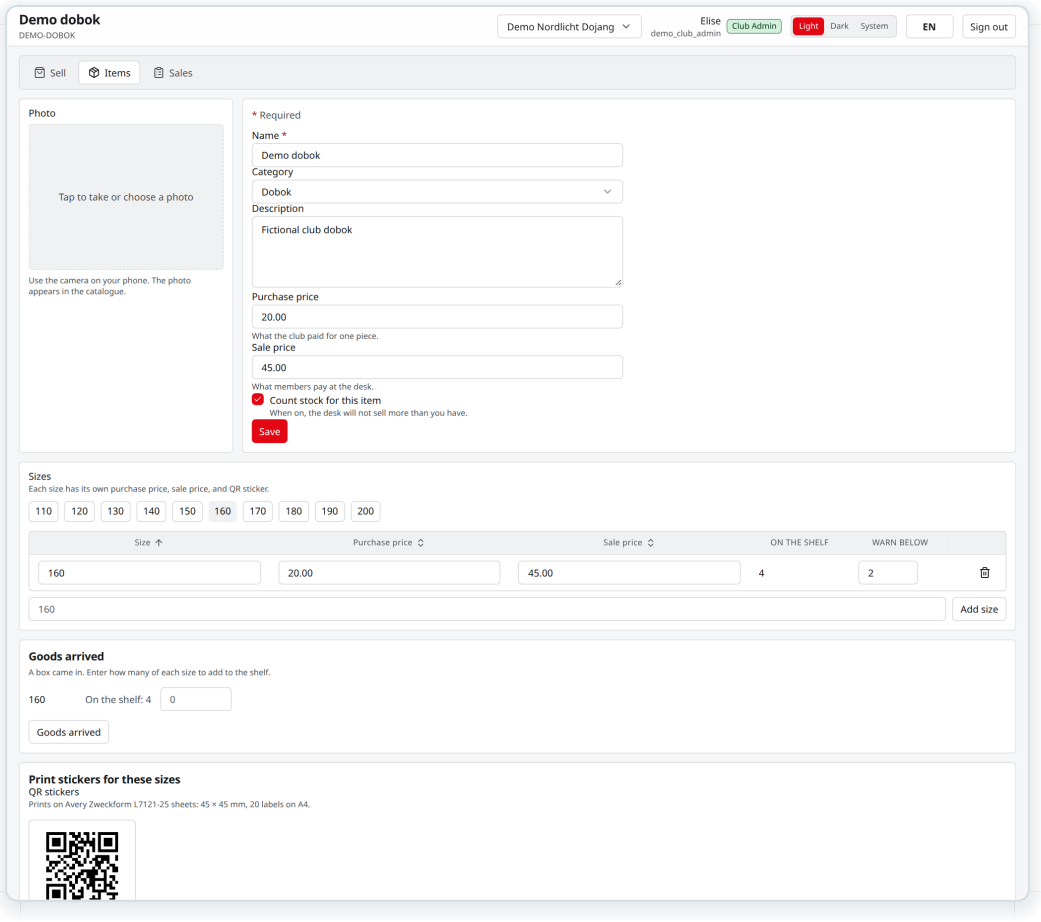

Figure 46 · Editing an item with sizes

When a box of goods arrives, open the item and use **Goods arrived**. Then **Print stickers for these sizes** prints QR stickers on Avery Zweckform L7121-25 sheets.

8.2 Selling at the desk

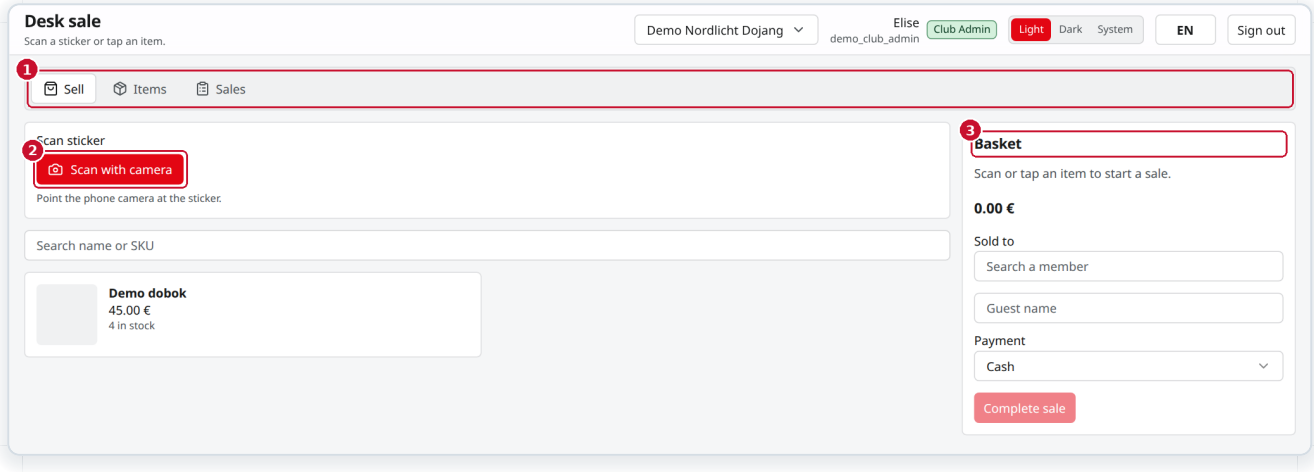

Figure 47 · The desk sale

1. Shop tabs.
2. **Scan with camera** – scan the QR sticker on the item.
3. **Basket**

1. Open **Sell**. Scan the sticker or tap the item and its size.
2. Under **Sold to**, search the member, or choose **Walk-in / guest**.
3. Choose **Cash**, **Card**, **Other** or **Pay later**.
4. Click **Complete sale**.

Unpaid sales wait in **Sales** until you click **Paid cash** or **Paid card**.

8.3 Counting stock

Before a stock count, click **Print count sheet** on **Items** and then **Take count sheet and print**. Tick the printed sheet against the cupboard. **Print catalogue** prints a price list for the notice board.

9

Calendar

All roles Event calendar module

The calendar is shared by the LTF and all clubs. Each event decides who can see it.

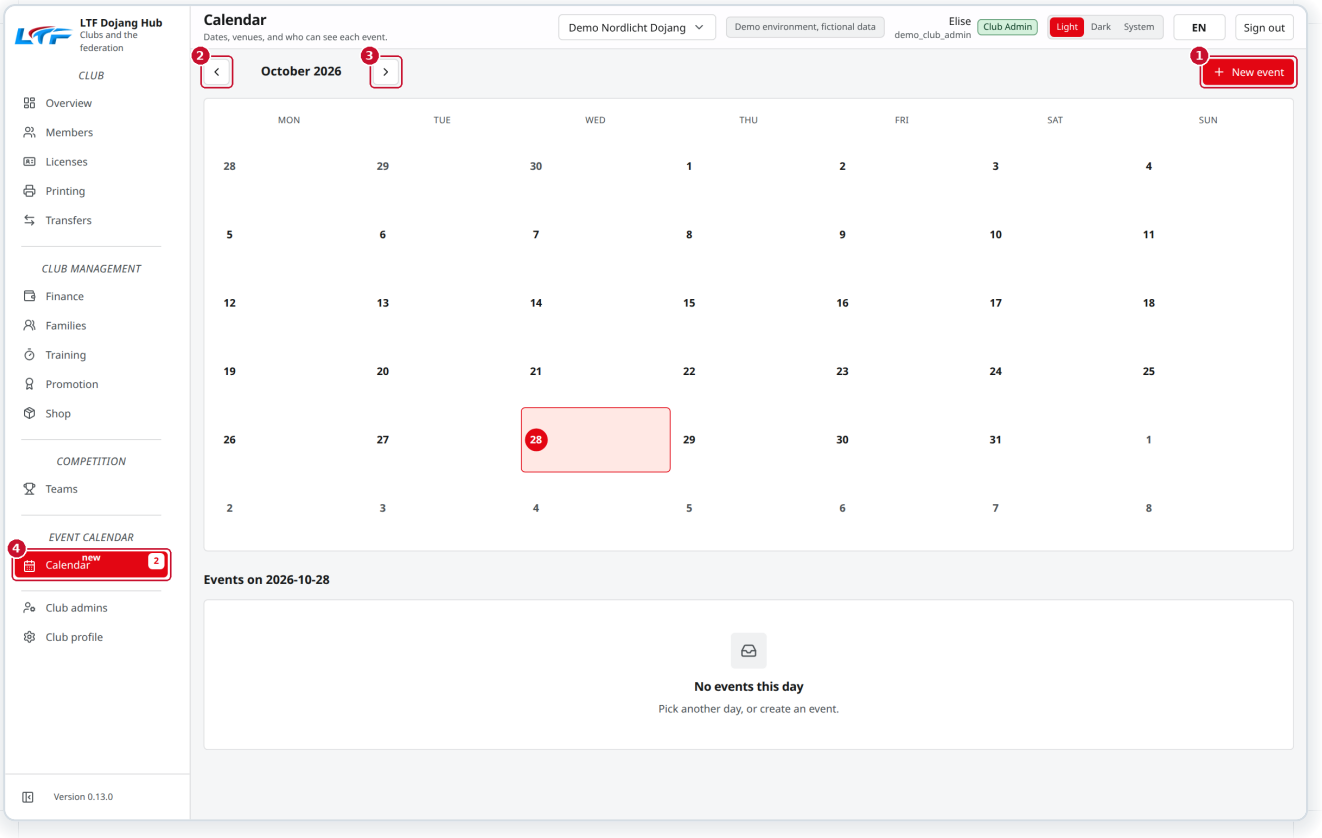

Figure 48 · The calendar

1. **New event**
2. **Previous month**
3. **Next month**
4. In the menu, the number counts upcoming events; **new** means there are events you have not opened yet.

9.1 Creating an event

1. Click **New event**.
2. Enter **Title**, **Starts** and **Ends** (or tick **All day**), **Venue** and **Address**.
3. Choose the **Kind**: **General**, **Kyorugi** or **Poomsae**.
4. Under **Who can see this**, choose who sees it (table below).
5. Click **Save event**.

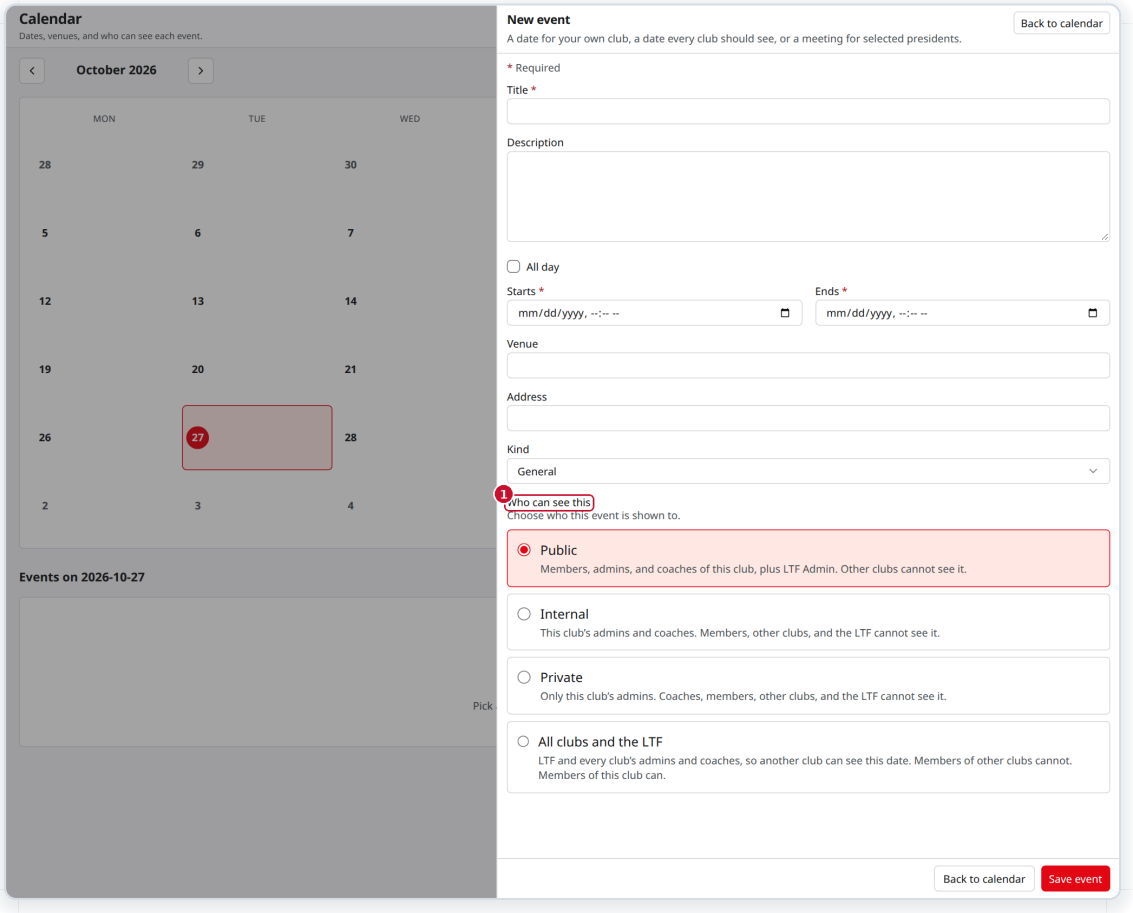

Figure 49 · A new club event

1 **Who can see this** – the description under each choice tells you exactly who will see the event.

Choice	Club event: who sees it	LTF event: who sees it
Public	members, admins and coaches of this club, plus LTF Admin	everyone signed in
Internal	this club's admins and coaches	LTF Admin, LTF Finance, club admins and coaches
Private	this club's admins only	LTF Admins only
All clubs and the LTF	LTF and every club's admins and coaches, plus this club's members	LTF and every club's admins and coaches
Club presidents	–	LTF Admins and the current president of each club ticked under **Concerned clubs**

GOOD TO KNOW

The descriptions on screen also mention members. A member sees an event only with a login, and only when the visibility includes members. See Roles (p. 12). Parents do not sign in.

TIP

Planning a club tournament? Use **All clubs and the LTF** so other clubs see the date early and avoid clashes.

9.2 Reminders

Open an event, choose a date in **Remind me on** and click **Save reminder**. On that day a reminder pops up when you are in the app. Click **Snooze for a day** or **Got it**. **Remove reminder** removes it.

10

Club admin: club profile, committee and admins

Club admin

Club profile has four tabs. When the competition module is on, **Equipment sizes** is a further tab. See Equipment sizes (p. 47).

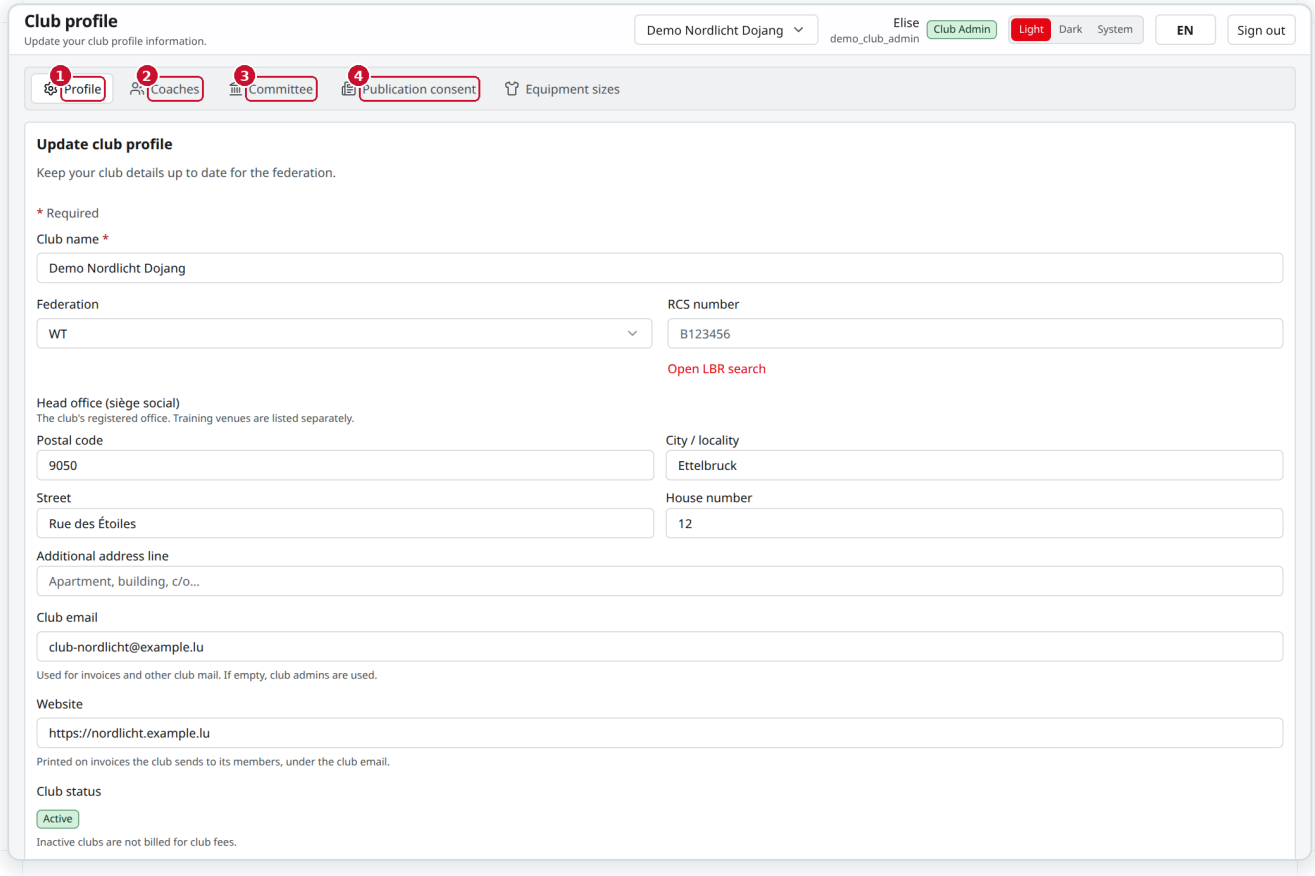

Figure 50 · Club profile

1. **Profile** – address, email, website, IBAN, language.
2. **Coaches**
3. **Committee**
4. **Publication consent**

10.1 Profile

Keep the **Club email**, **Website**, **IBAN** and **Communication language** correct: they are printed on the invoices you send to members, and the LTF writes to you in that language. **Communication language** can be English, Français, Deutsch, or Lëtzebuergesch.

Invoices and other federation emails are sent in this language. Emails and PDFs use the language chosen for that person, otherwise this language, otherwise English. French says licence. German says Lizenz. In German the income statement is Gewinn- und Verlustrechnung. The official subsidy lists stay in French.

Set **Federation** to **WT** or **ITF**. Enter the **RCS number** when the club has one, for example B123456. **Head office (siège social)** is the registered office, not a training hall. It uses the same Luxembourg address lookup as a member address: street, number, postcode and locality stay separate. See The club record (p. 22).

Training venues lists the halls where the club trains. Click **Add venue**, enter a name and an address, and save. A venue is not the head office.

Modules and prices shows what the federation charges this club for each module. The amount is an estimate. You can read it even when a module is off. You cannot change the price here. A minimum that is not higher than a flat price is not shown. The price you pay is the same.

Under **Logos**, upload the logos used on invoices, cards and screens. After you choose a file, the page shows a preview. While it loads, it says **Loading logo preview**.

Click **Save club**.

10.2 Coaches

1. Open **Coaches**.
2. Click a member on the left, then click the **Coaches** box on the right.
3. If the member has no email yet, enter one in **Email for their sign-in** and click **Add**. The coach receives a welcome email to set a password.
4. Tick **Qualité+** for coaches who belong in the Qualité+ file.

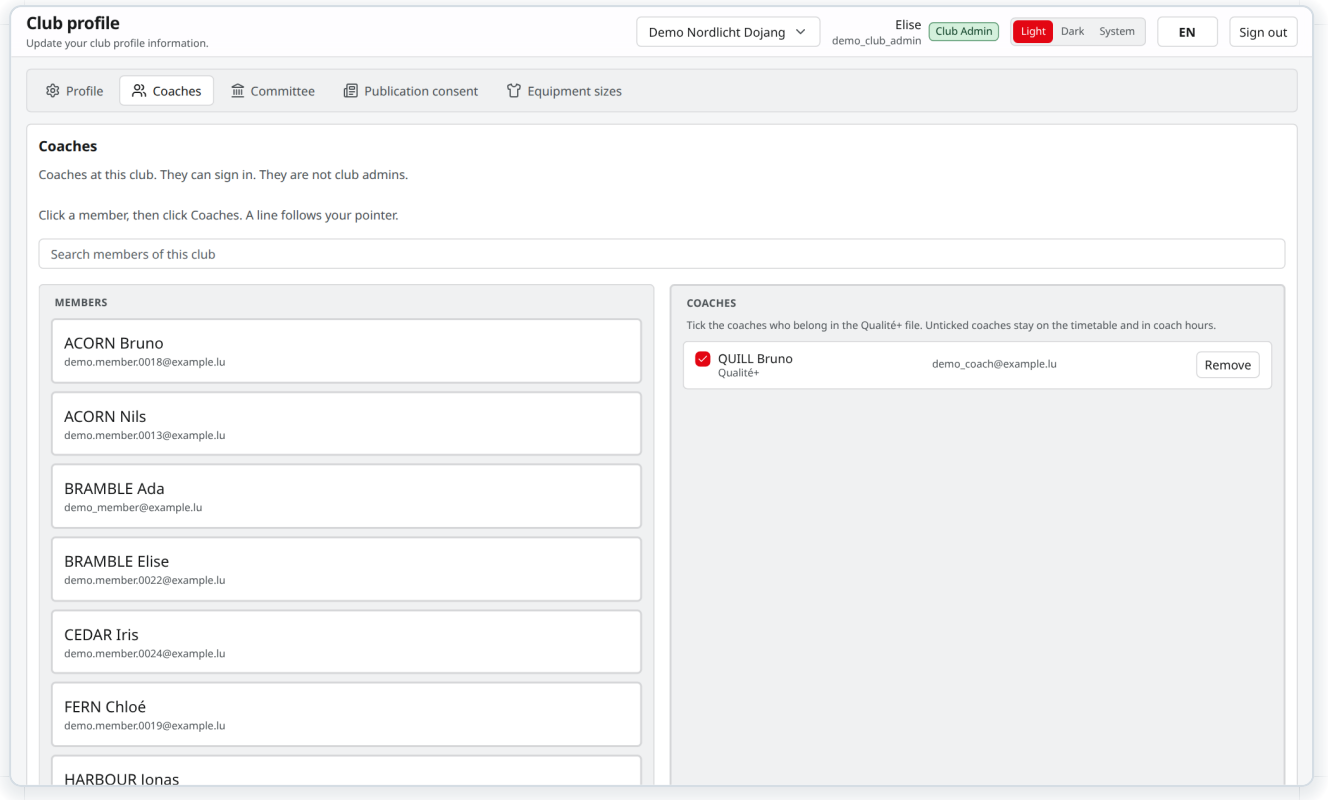

Figure 51 · Coaches

> GOOD TO KNOW
>
> Coaches must be active adult members of your own club. **Remove** removes the coach role; the person stays a member.

10.3 Committee

The committee decides who may record payments, and its president receives meetings for club presidents.

1. Open **Committee**. If needed, click **Create committee**.
2. Under **Offices**, choose an office such as President, enter **Starts** and click **Add office**.
3. Click the office, then click the member who holds it.

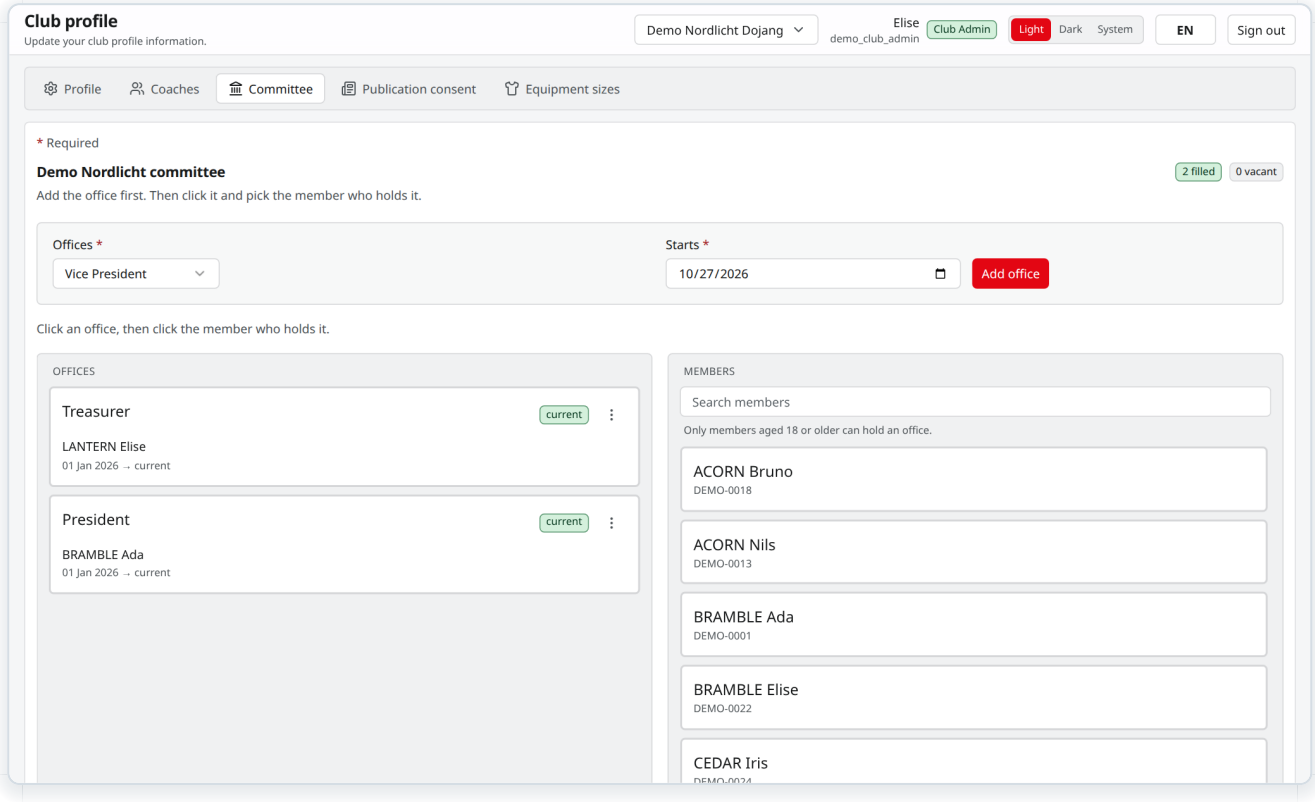

Figure 52 · The club committee

To correct an office that already has a holder, open the row menu and click **Edit**. The panel is **Edit office**. The person field already shows the current holder, family name then given name, even when that person is not on the first page of members. Saving without a change keeps that person. A new office still starts empty, on **Choose a member.**.

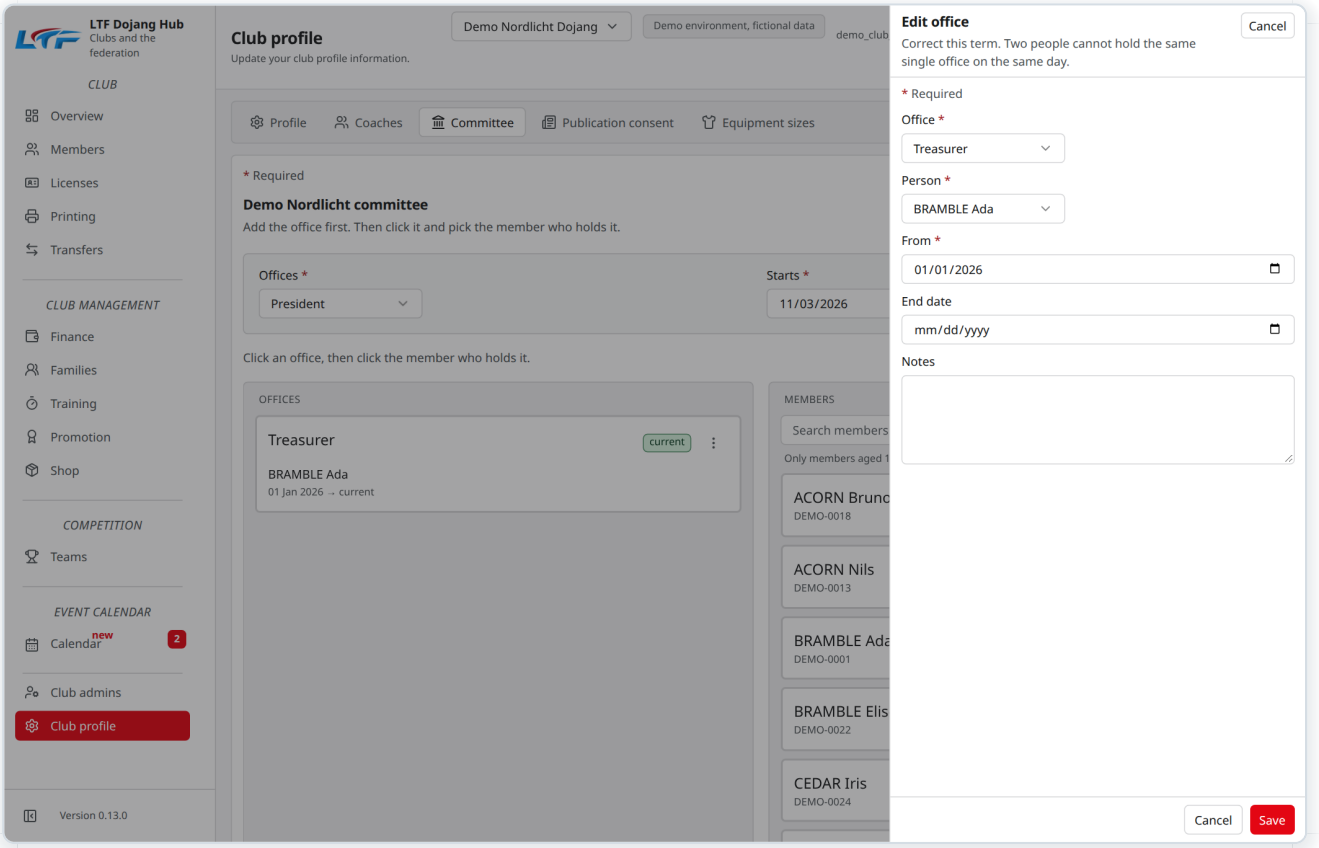

Figure 53 · Edit office, with the current holder already filled in

1 **Person** – family name, then given name. The current holder is already filled in.

To hand an office to the next person, open **Committee history**. In the row menu click **Replace**. The panel is **Hand over this office**. Choose the new person and the date of the election.
On this date the new person takes the office. The previous person stops the same day. Click **Save**.

To close an office without naming a successor, use **End term**.
From this date the office is vacant. The person holds it only on the days before.

The federation committee page works the same way. LTF Admin opens it from **Committee**. Handing over a federation office can search every adult, including someone with no club. People under 18 and inactive members are left out.

Linking a login to a member who already holds a federation office opens the desks that office is mapped to. In the usual map, President opens LTF Admin in full and LTF Finance as view only, and Treasurer the other way around. Changing or clearing that login moves or closes those desks. A parked import receives no desk. An inactive member still receives the desks the map allows. A contact needs a login before a desk is linked. Club offices do not open a federation desk.

> WATCH OUT
>
> When the treasurer changes, update the committee **before** the next payment run. Without a current office nobody in the club can record payments.

10.4 Publication consent

Publication consent shows a grid of members and channels (website, print media, Facebook, Instagram…). Each tick is saved immediately. Before posting photos, tick the channels and download **PDF members** to get the list of members who must not be shown.

10.5 Club admins

Club admins decides who runs the club in the app.

1. Open **Club admins**. Click your club on the right to list its members.
2. Click a member, then click the club again.
3. If the member has no login yet, enter an email under **Email for the new login**. A welcome email is sent. The invited person sets an email and a password on Your first password (p. 9).

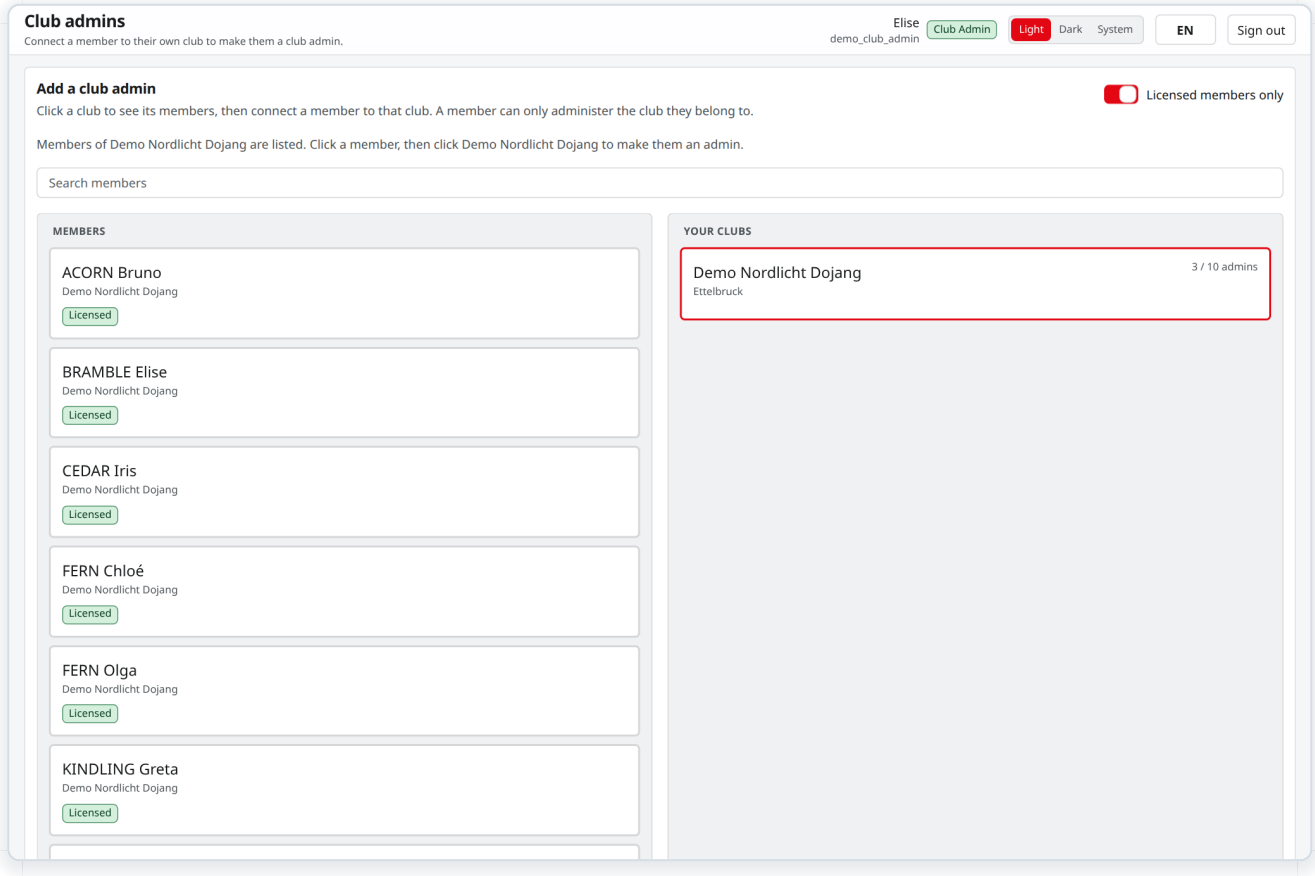

Figure 54 · Club admins

Under **Current admins** you can remove someone who should no longer administer the club. **Licensed members only** limits the list to members with a valid license.

The row menu can send the link again: **Send invitation to set password** if that person has not chosen a password yet, or **Send password reset email** if they have. You can also copy the link. The same actions are on the LTF's club-admins page. See Clubs and club admins (p. 59).

11

The club year at a glance

A checklist for the busy volunteer. Each line links to the section that explains it.

When	Task	Section
Summer	Update committee, coaches, club profile	Committee (p. 55)
Before the season	Timetable, holidays, promotion rules	Timetable (p. 40)
Before a competition	Team sheet, weigh-in, equipment sizes	Teams (p. 45)
September	Fees and family rebates	Membership fees (p. 31)
September	Order licenses for all athletes	Ordering licenses (p. 24)
September	Pay the LTF invoice	Paying the LTF (p. 34)
Once paid	Print license cards	Printing cards (p. 26)
By 30 September	Subsidy file	Subsidies (p. 37)
October	Bill membership fees	Billing (p. 31)
Every class	Take the roll	Taking the roll (p. 15)
Monthly	Record payments, import the bank statement	Bank (p. 36)
Before a grading	Belt test	Promotion (p. 43)
Year end	Reports for the general assembly	Reports (p. 36)

12

LTF Admin

LTF Admin

The federation menu, under **LTF management**, contains **Overview**, **Clubs**, **Club admins**, **Transfers**, **Members**, **Parked members**, **National team**, **Licenses**, **License cards**, **Printing**, **License types** and **Settings**, plus **Committee** and **Calendar**.

12.1 Federation overview

The overview counts clubs, members and licenses, and its action queue lists clubs without an admin, pending transfers with a fee and members waiting for a license.

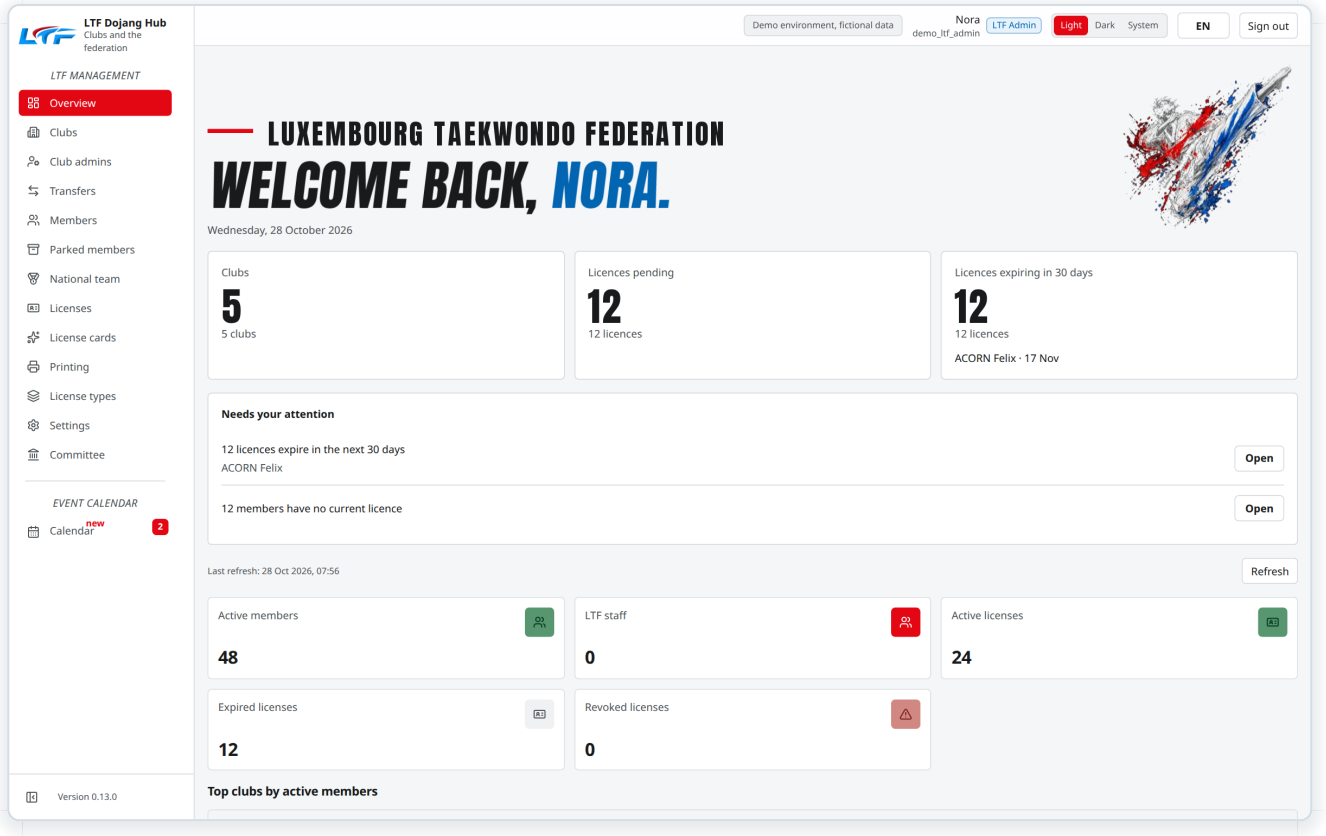

Figure 55 · The LTF overview

12.2 Clubs and club admins

Clubs lists all clubs. Open a club to edit its details, upload its logos (for invoices, printing and screens) and see its members.

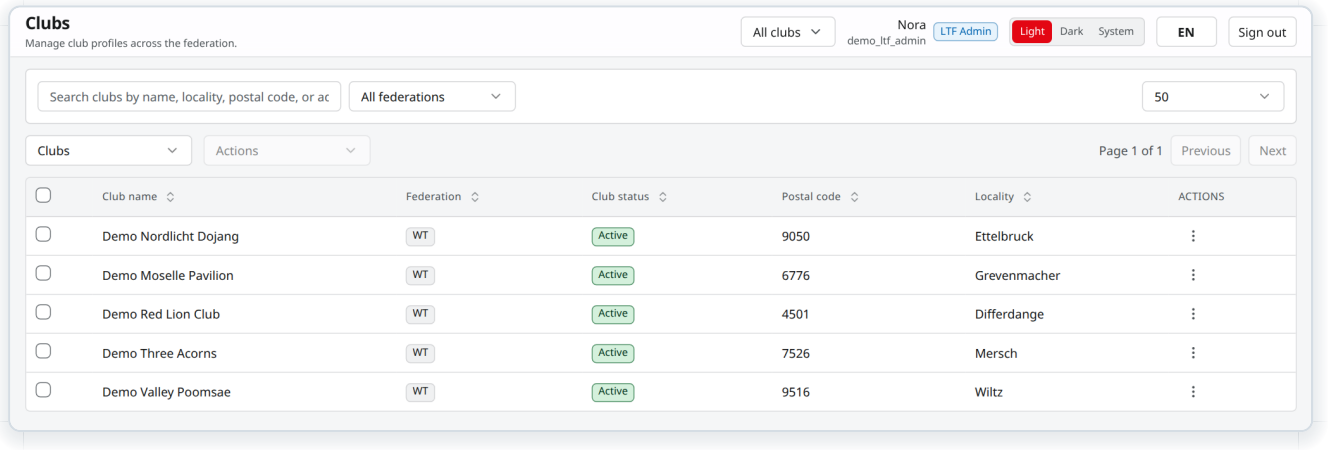

Figure 56 · All clubs

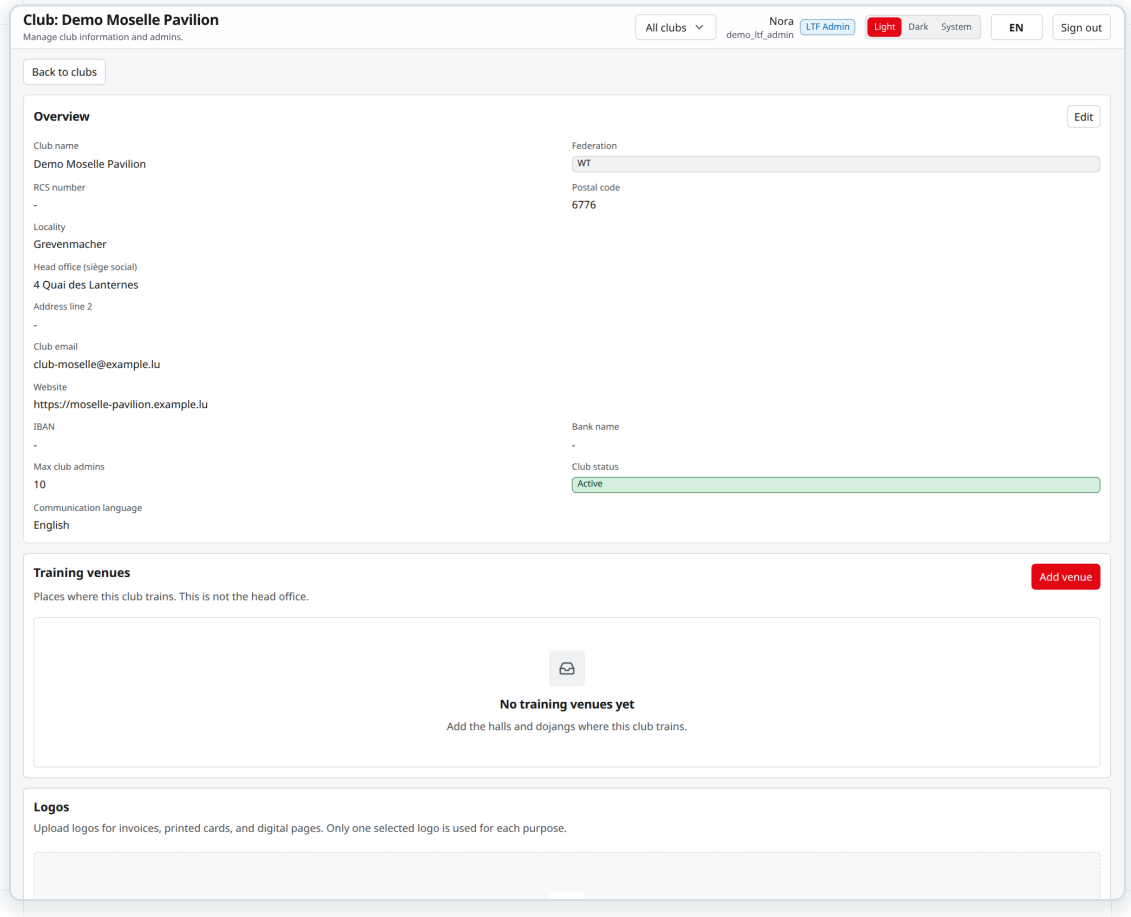

Figure 57 · A club seen by the LTF

On the club's page, set **Federation** to **WT** or **ITF**, and the **RCS number** when you have one (for example B123456). **Head office (siège social)** uses the Luxembourg address lookup. **Training venues** lists training halls and is not the head office. The same fields are on the club's own Profile (p. 53).

After you upload a logo, the page shows a preview. While it loads, it says **Loading logo preview**.

Club admins works like the club page described in Club admins (p. 57), but for every club. The row menu sends a link again: **Send invitation to set password** or **Copy invitation link** when the person has not chosen a password yet, and **Send password reset email** or **Copy password reset link** when they have. Copying does not need an email address. Sending does. Each invitation link works once. See Your first password (p. 9).

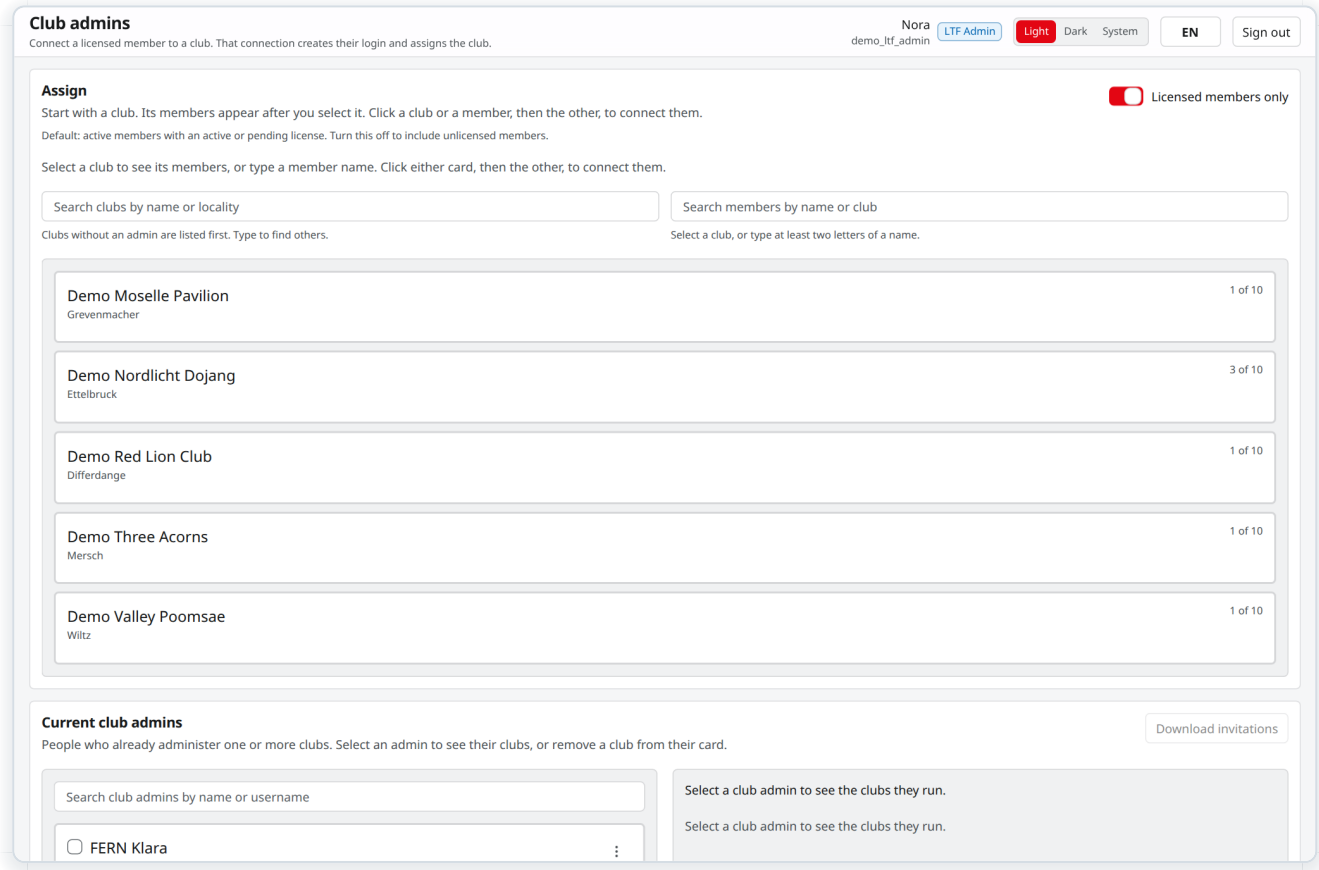

Figure 58 · Club admins for every club

12.3 Members, licenses and transfers

- **Members** and **Licenses** show all clubs at once; use the club panel at the top to narrow down. Click a column heading to sort. On the license list, **Edit** and **Delete** are in **Row actions**, and edit opens a side panel.
- Filter members with **LTF staff** to see federation staff. A person with no club is shown as **No club**. **Add LTF staff** opens a side panel. Leave the club on **No club** to license them as LTF staff, with no club order and no club invoice. **Issue license** issues the license for the year you choose. The current year is active at once. A past staff license expires like a club license and then shows as expired.
- **Parked members** lists people saved during an import until you assign a club and a sex, or delete the row. **People saved from an import until you assign a club and a gender, or delete them.** They are not in a club list, a license, a card, a team or a count. See First-run setup (p. 70).
- **Transfers** lists recent club changes, transfers with a fee and possible club tourists – members who changed club unusually often.

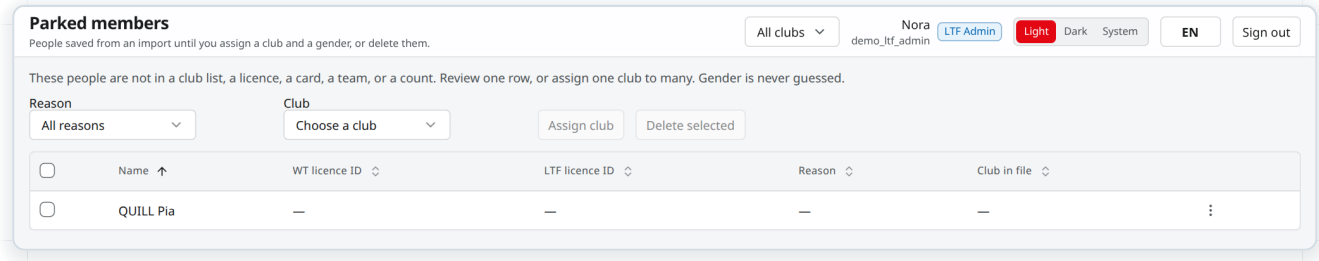

Figure 59 · Parked members waiting for a club

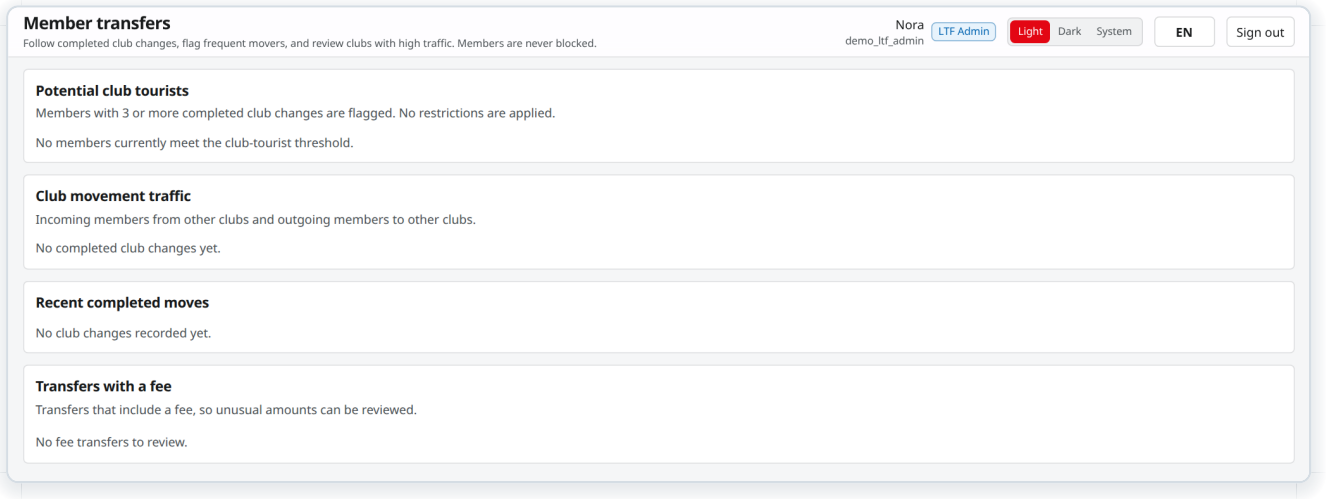

Figure 60 · Federation transfers

12.4 License cards

License cards holds the card templates. Open a template in the designer to place the photo, name, grade, license number and QR code. The row menu also sets the default, saves a copy, exports, or deletes the template. Publish a version and set it as default: club admins print with it. **Printing** groups **Card print jobs** and **Printer profiles** the same way as the club dashboard. Print jobs lists every club's jobs; preview, download and delete are in the row menu. Printer profiles stores the X/Y offsets of known printers.

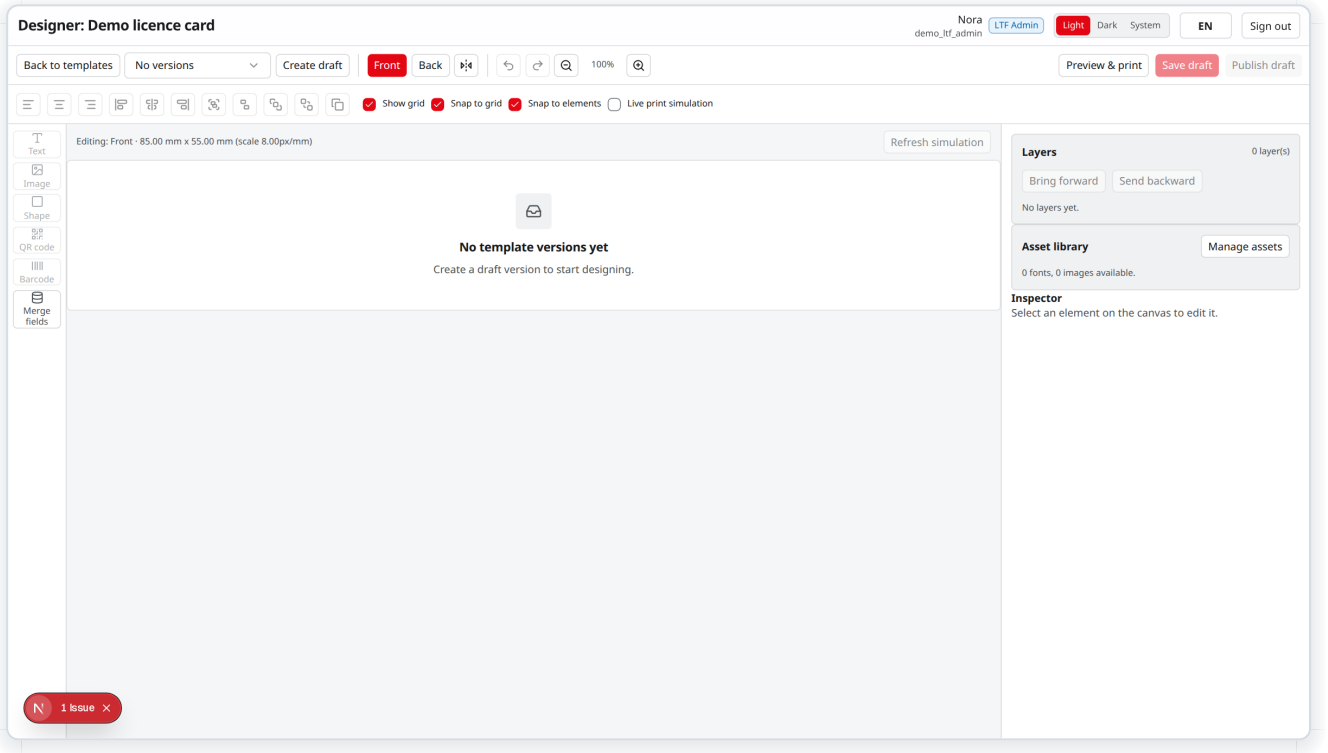

Figure 61 · The card designer

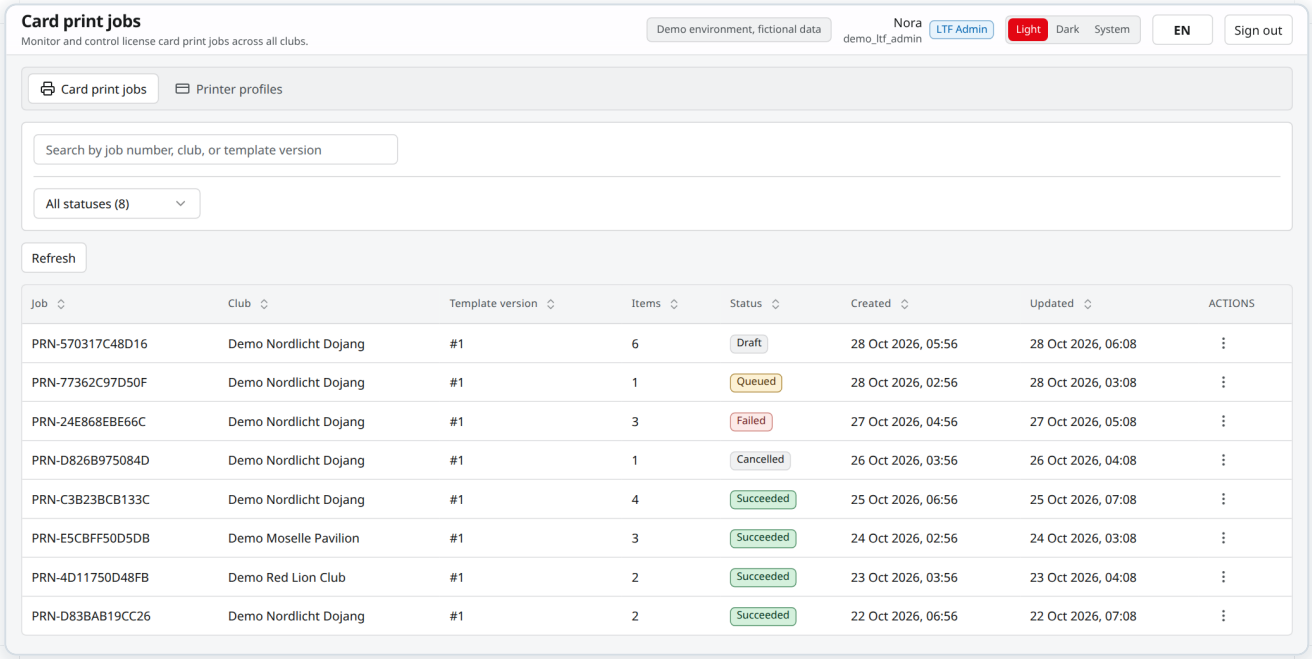

Figure 62 · Print jobs from every club

12.5 National team

National team is the federation's squad desk. LTF Admin can change it. LTF Finance can open the same desk and only read it. Clubs do not see this page. On a club member they only see **National team**, with the squad and the season, and not this staff file.

The page has three parts: **Selections**, **Staff** and **Levels and season**. Filters use **Season**, **Squad** and **Club**. Forms open in a side panel.

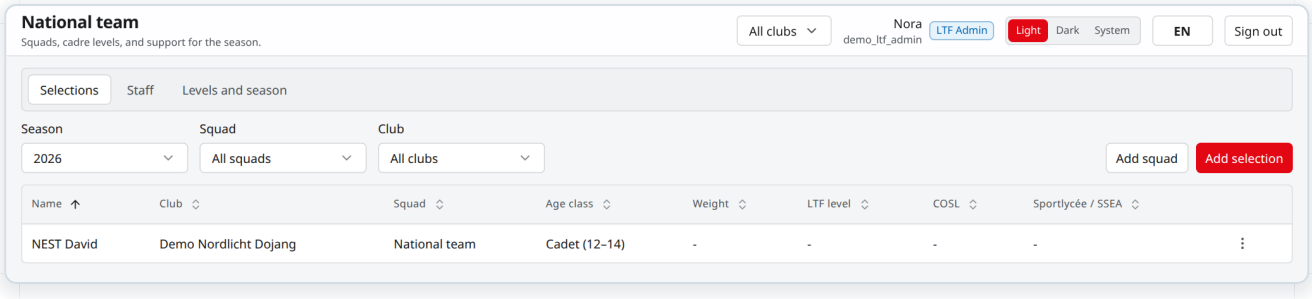

Figure 63 · The national team desk

Selections. **Add squad** adds a squad.
A new squad is for Kyorugi. Poomsae squads are not part of this version. **Add selection** adds an athlete from a club for the season. Set **Age class**. The classes include **Pupils** and **Minimes**, which are regional and not World Taekwondo divisions, plus **Cadet**, **Junior** and **Senior**. **Weight** may be left empty. Status is recorded as **LTF level**, **COSL** and **Sportlycée / SSEA** (Sportlycée or SSEA).

Staff. Open **Staff** and click **Add staff**. Roles include **National coach**, **Physiotherapist** and **Photographer**. The name and the role are what a club is allowed to know. The private staff file stays on this desk.

Levels and season. **Levels and season** holds the cadre levels and the season dates. **Save season dates** stores the start and end. **One squad at a time** keeps an athlete on one squad at a time.

12.6 Federation settings

Settings holds the federation address and IBAN, the **Club-tourist threshold** and the import option **Rewrite LUX- to LTF- on the LTF license ID when members are imported**. It also holds the federation's **RCS number**. The address uses the Luxembourg lookup.
Registered office of the federation. Lookup fills streets in Luxembourg. Other addresses stay manual.

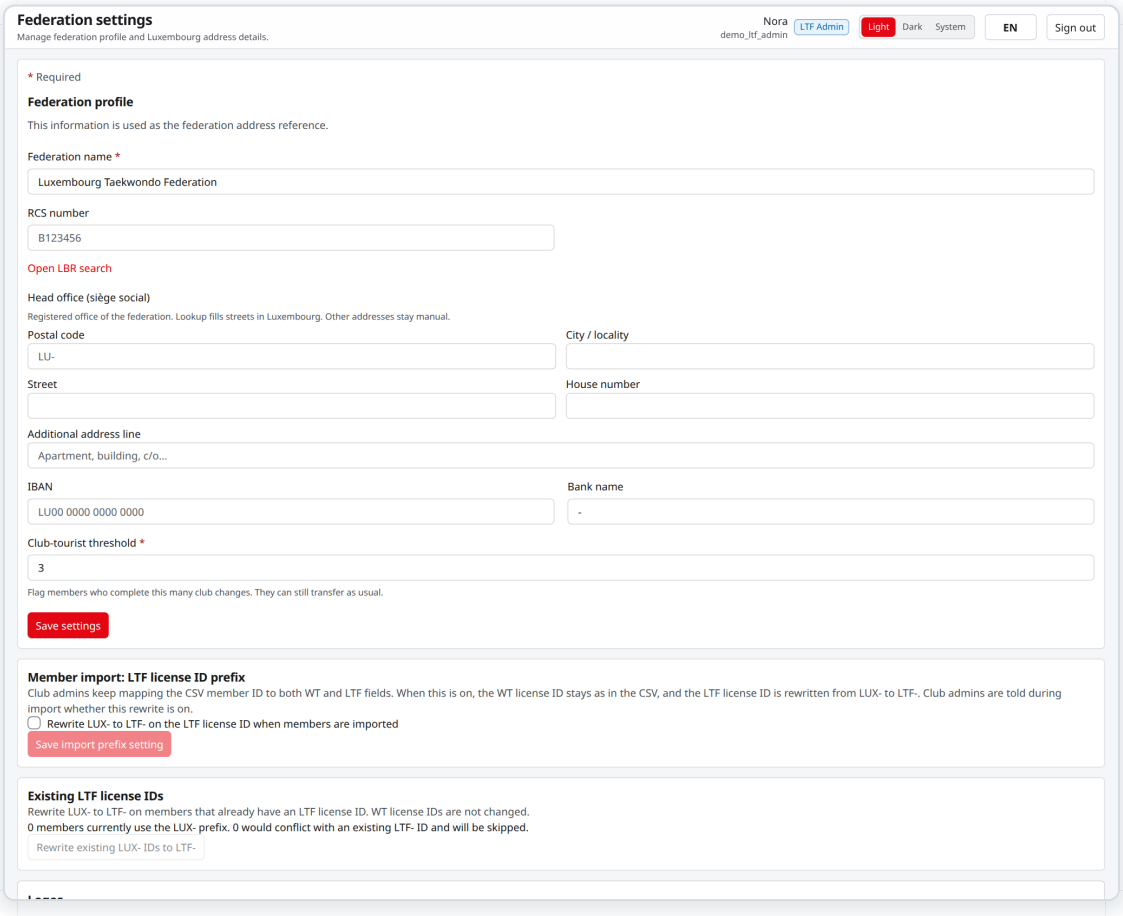

Figure 64 · Federation settings

13

LTF Finance

LTF Finance

The finance menu contains **Overview**, **Orders**, **Invoices**, **Payments**, **Income**, **Expenses**, **Bank**, **Reports**, **Audit log** and **Settings**.

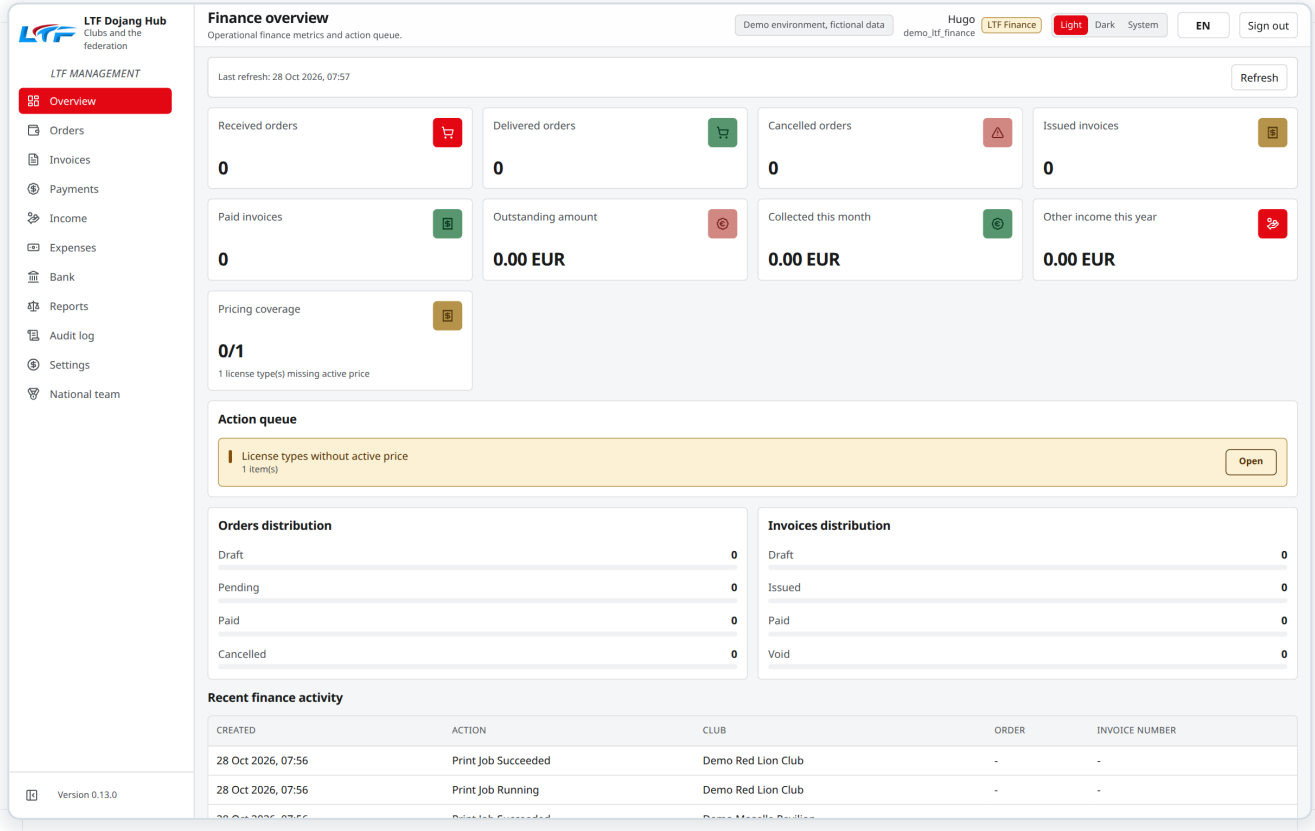

Figure 65 · The finance overview

13.1 License prices and ordering windows

In **Settings**, the tab **License types** defines each type and its **Current-year order window** and **Next-year preorder window**. **License prices** stores prices with history: a new price applies from its **Price effective from** date.

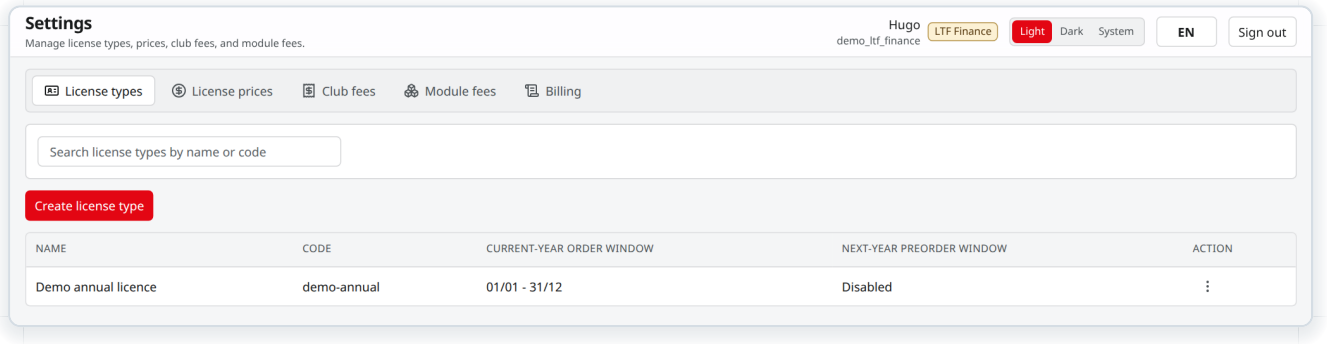

Figure 66 · License settings

13.2 Club fees

Club fees lists what the LTF charges clubs (affiliation, insurance…), **Annual**, **Per member**, **Per event** or **One-off**. On the **Billing** tab, choose the **Billing year**, the fees and the clubs, and click **Create invoices for 2026**. A club already invoiced for that year is skipped, so you can run it again safely. **Repeat this billing** repeats the billing monthly or yearly.

Module fees is the yearly price for **Club management** and the event calendar. **Module fees** Click **Add module fee**, choose the module, then **Flat amount per year** or **Per active member**, and an amount. **Minimum fee** is optional: the club pays at least that amount when the calculated price is lower. When that minimum is not higher than a flat price, **Modules and prices** on the club profile does not show it. The amount charged is the same, and this editor still shows the field. A new price starts on the date you choose. Invoices already sent stay as they are.
A module fee is billed only for active clubs that have that module switched on. A club already invoiced for the year is s
admins can read the estimate on their profile. They cannot edit it, and an unpaid invoice does not switch the module off.

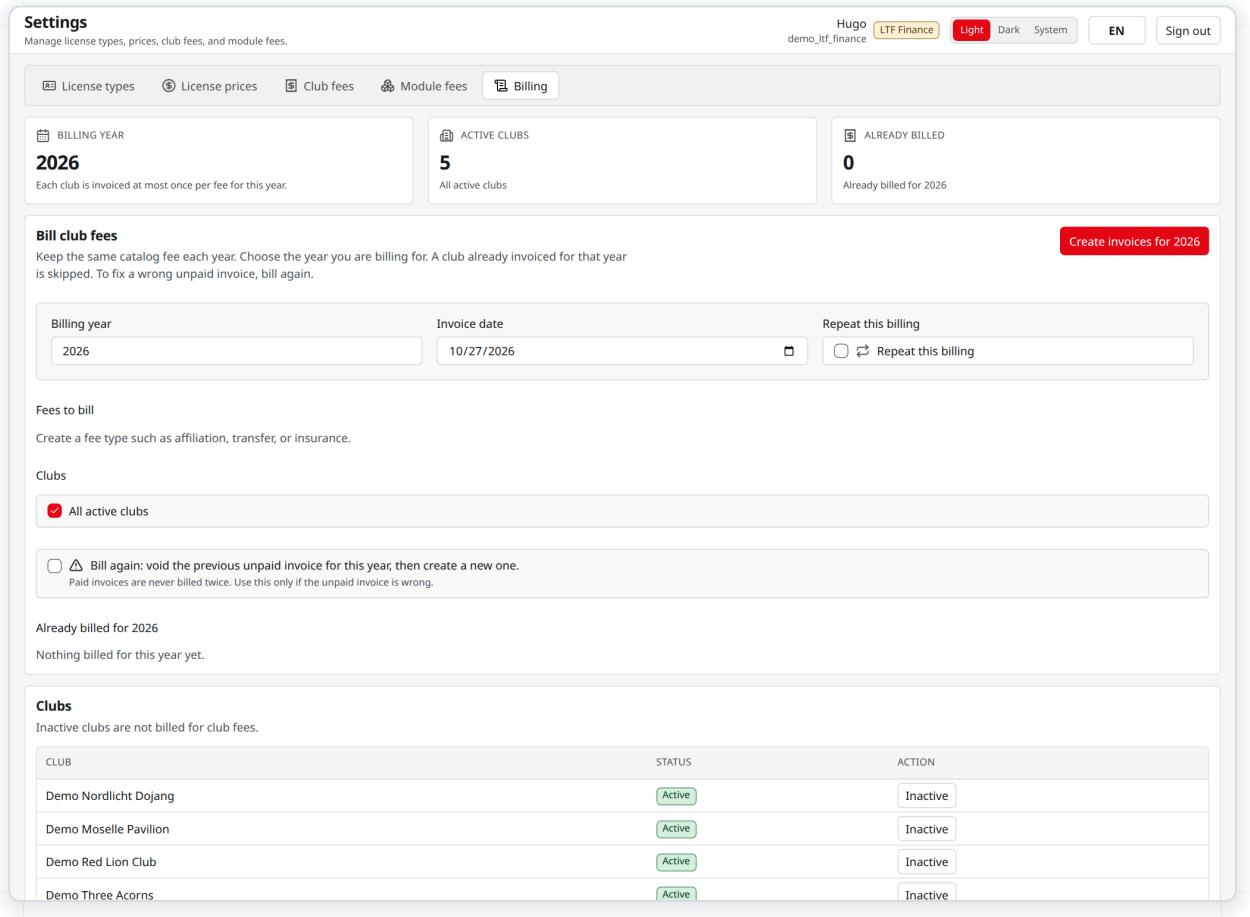

Figure 67 · Billing club fees

13.3 Invoices, payments and credit notes

1. Open **Invoices** and click an invoice.
2. When the club's transfer has arrived, click **Record payment**. Paid licenses become active.
3. To reduce what a club owes, enter a **Credit amount** and **Reason** and click **Add credit note**.
4. To chase an unpaid invoice, click **Send reminder**. **Last reminder** shows when you last did.

The total in the invoice email matches the total on the PDF. A paid invoice says the amount paid. An invoice that is not paid says the amount due. That includes a license invoice marked paid in the same step as the email. A reminder states the amount still due, not the original total. The words follow the club's language, or the language chosen for that person, and otherwise English.

On **Orders**, **Invoices**, and **Payments**, search stays on the page and **Status** opens as a small panel. **Reset filters** returns it to all. Those lists do not tick rows. See Ordering licenses (p. 24).

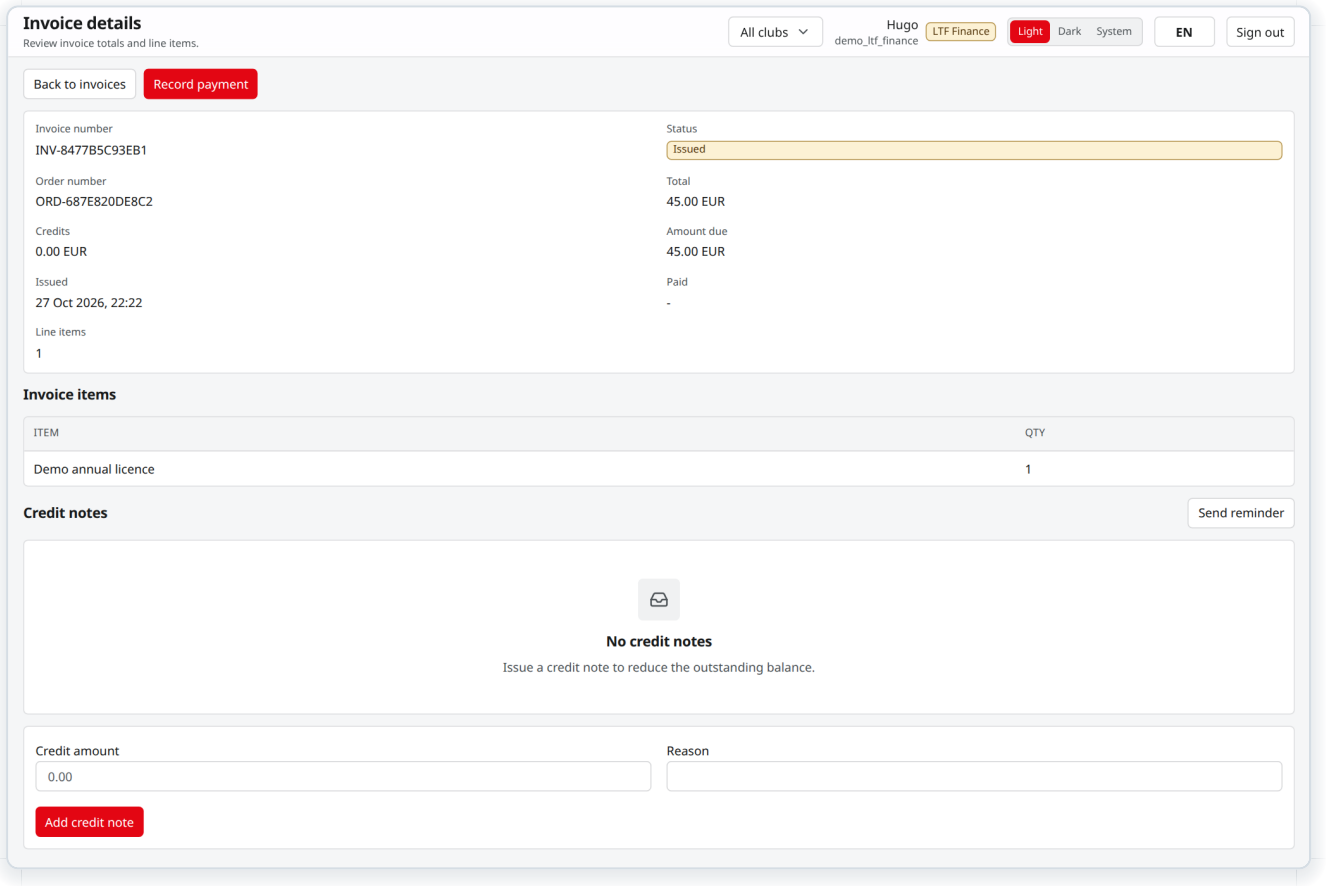

Figure 68 · Invoice details with credit notes

13.4 Federation books

Income, **Expenses**, **Bank** and **Reports** work like the club pages in Club admin: money (p. 30), for the federation's own accounts. **Audit log** records who changed what.

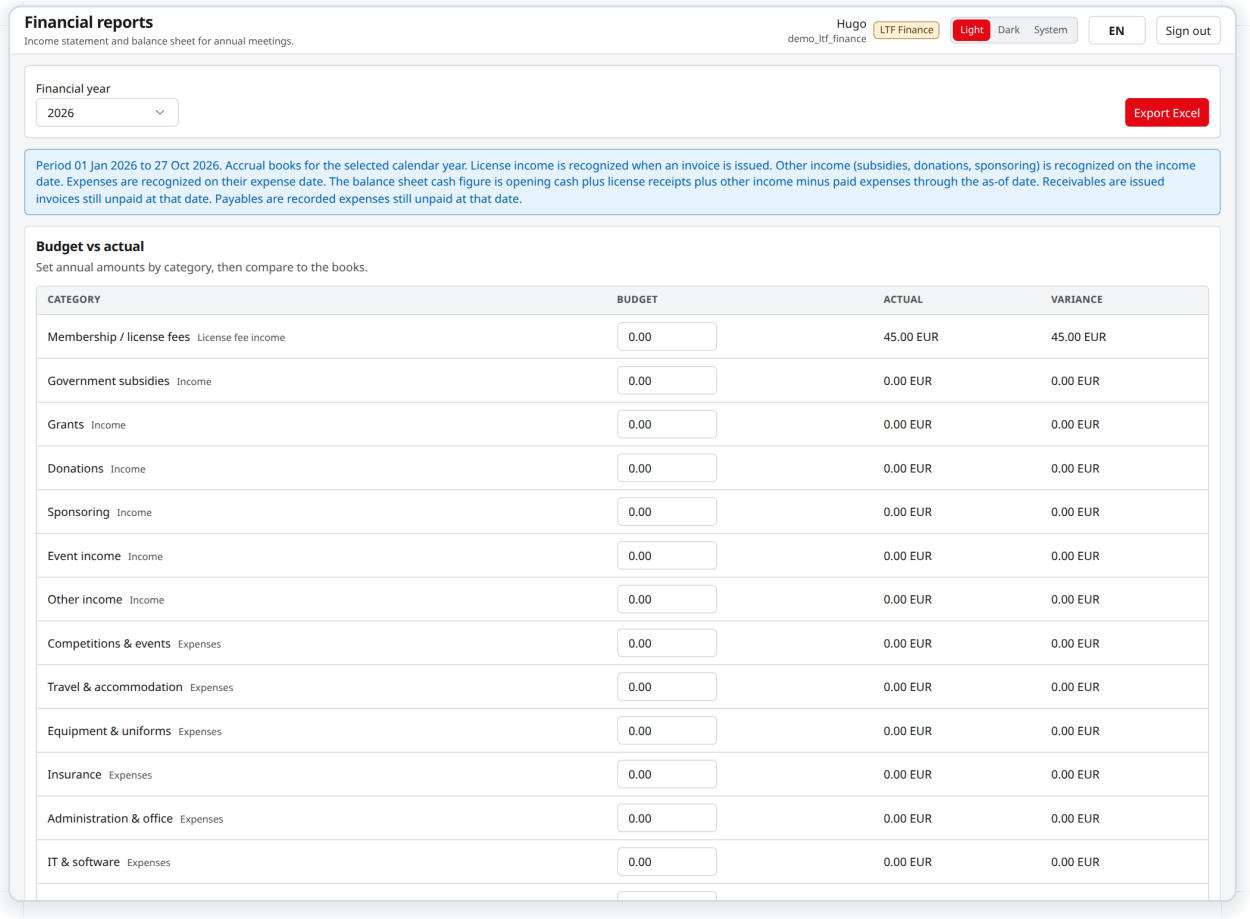

Figure 69 · Federation reports

14

Modules (technical administrator)

Superuser

The technical administrator opens the **Ops console**. Under Modules, a signed product code from the LTF is entered and redeemed, and each club is given the modules it may use. The catalogue also lists modules that are not shipped yet, such as federation inventory and tournaments; they cannot be switched on. Switching a module on is separate from its price. Prices for club management and the calendar are module fees (p. 66). An unpaid module invoice does not switch the module off.

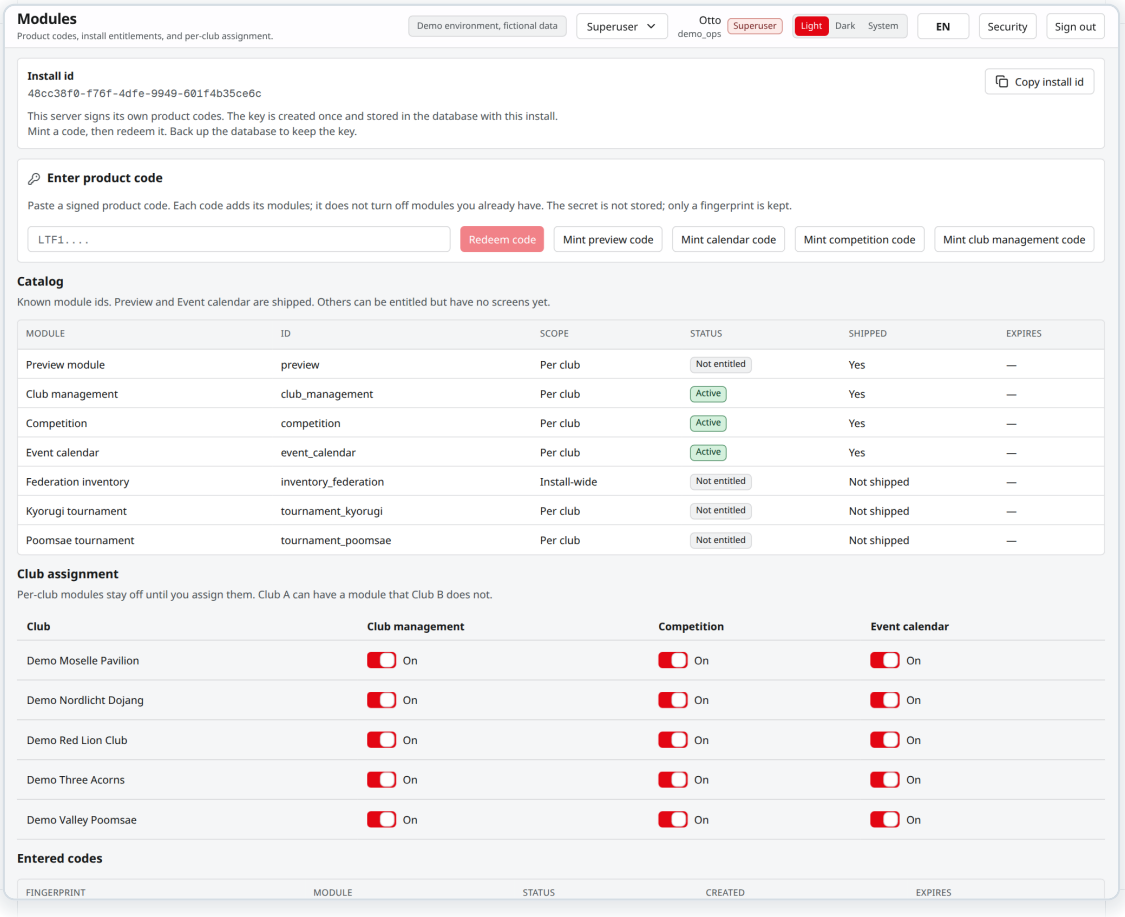

Figure 70 · Ops – modules

14.1 First-run setup

First-run setup is for a superuser, once, before the federation works in the app. It is not the club wizard in Importing members (p. 20). It is hidden on the demonstration installation, and it locks when you finish.

Open the ops console. If setup is still open, the overview sends you to this page, and a banner offers **Finish setup**. **Import clubs, then members and LTF staff, then club admins. Nothing is emailed.**

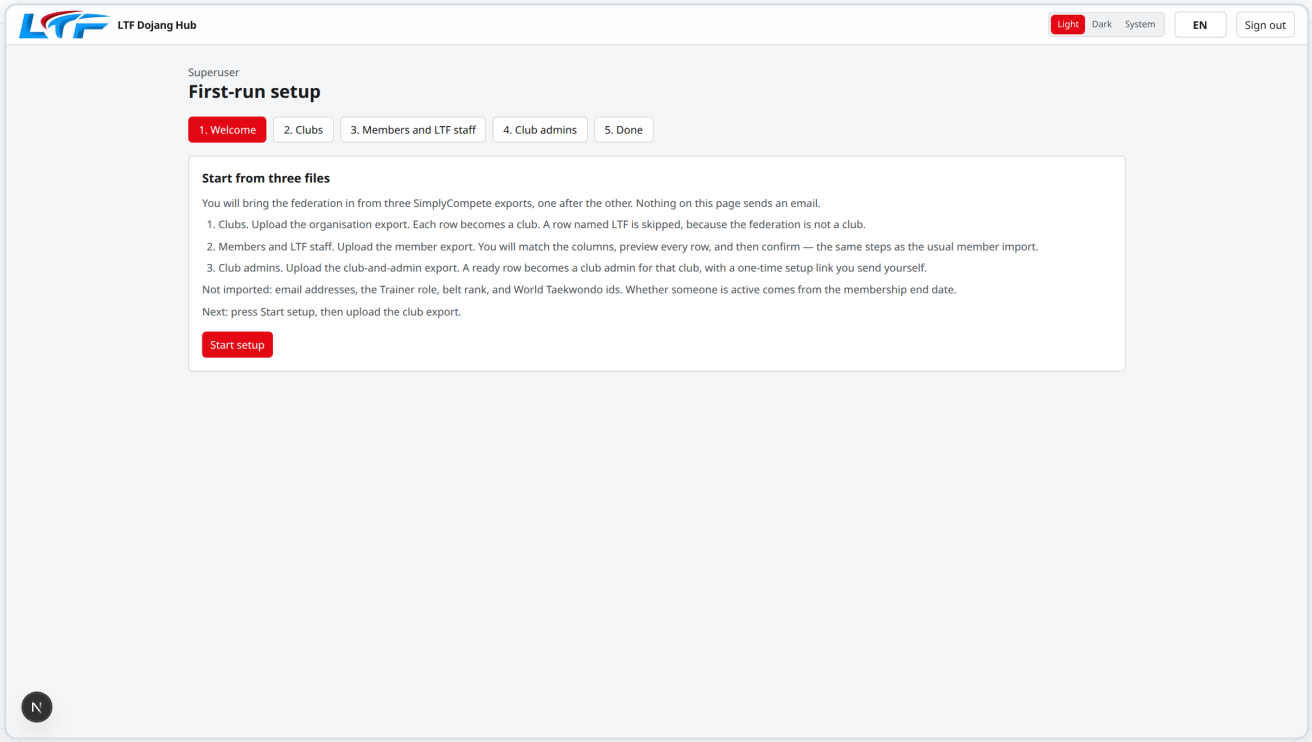

Figure 71 · First-run setup

You bring in three files, in order. Nothing on this page sends an email, and email addresses in the files are ignored. **Email addresses are not imported**

1. **Clubs**. Upload the club export. A row named LTF is not created as a club. Federation (WT or ITF) is only a guess from the name: change it if it is wrong. An RCS number is optional; if you type one, use the form B123456. Click **Confirm clubs**.
2. **Members and LTF staff**. Upload the member export. Map the columns, preview, then confirm — the same rhythm as the club import, but this is not that wizard. Map the Member ID column to both the WT license id and the LTF license id. Auto-map does that. Leave Email unmapped. If **Rewrite LUX- to LTF- on the LTF license ID when members are imported** is on, LUX- becomes LTF- on the LTF id only. Active or inactive follows the membership end year, not a separate column. This year or a later year, and a blank date, are **Active**. An earlier year is **Inactive**, and the person is still imported. If the end date cannot be read, choose **Active** or **Inactive**, or park the row. Do not guess.
3. Park a row when the club cell is empty, the club is not one you imported, or the end date cannot be read. Click **Park**, or **Park all unresolved** for every row that can be parked. The status is **Parked**. For an empty club cell, **No club yet** is a real choice and parks that person for later. **LTF staff** is the choice when the person belongs to the federation rather than a club. You may confirm while parked rows remain. **Confirm is blocked until every red row is resolved, parked, or skipped.** Click **Confirm members**.
4. **Club admins**. Upload the club-and-admin export. A ready row becomes a club admin linked to the member from the previous step. Click **Confirm club admins**. Nothing is emailed. **Copy link** copies one person's link. **Download all links (CSV)** downloads them all.

Each link works once, for 7 days. Send each person only their own link.

> WATCH OUT
>
> **This file contains live login links. Anyone who has it can take over these accounts until the links are used or expire (7 days). Don't email it as a whole, send each person only their own link, and delete the file afterwards.**

1. Click **Finish setup**.
   Setup is locked. Your superuser account is now an LTF admin. These numbers are what was saved.
   Send each club admin only their own link. They open Your first password (p. 9).

Parked people are reviewed later under **Parked members**. They stay out of club lists, licenses, cards, teams and counts until then.

15

Questions and troubleshooting

I can't sign in.

Check the username (it is not always your email) and the password. If the page says your email isn't verified, see Verifying your email (p. 10). If you forgot your password, see Forgotten password (p. 10).

Can members or parents sign in?

Parents cannot. A member aged 16 or over can sign in after a club admin or the LTF creates a login. Nothing is emailed. Younger members have no login. The club keeps the data up to date.

A menu item described here is missing.

Your role or your club's modules do not include it. See Roles (p. 12) and Modules (p. 13).

I see the wrong club.

Open **Selected club** at the top of the page. It is a small panel. Choose the club, or search with **Search clubs** when the list is long. Every page then shows that club. See The screen at a glance (p. 11).

“Only the president, vice president, treasurer…” appears when I record a payment.

You do not hold a current committee office. Ask the president to update the Committee (p. 55).

A household is “Blocked” in billing.

Read the reason in the row. Usually a child needs a bill recipient (see Families (p. 30)) or no membership fee is set (see Membership fees (p. 31)).

I can't choose a license type when ordering.

The reason is written next to the type: the ordering window is closed, there is no price, or the members already have that license. Windows and prices are set by LTF Finance.

The printed card is shifted.

Print at 100 % and use a printer profile with the right offset (see Printing license cards (p. 26)).

Dates look like mm/dd/yyyy.

Date fields follow your browser's language settings. Set your browser to English (United Kingdom), Luxembourgish, German or French to see day/month/year.

The roll shows nobody.

On a new class, add students under **Add students** and save. Next time, set them as **Usual students** in the **Timetable**.

The calendar menu shows a number.

It is the number of upcoming events you can see. The word **new** appears when some of them are new to you.

Where are my data protection rights?

If you have a login, use the page described in Privacy and your data (p. 10). Members and parents ask their club or the LTF, who can export or correct their data.

Can we pay online?

Yes. On an LTF invoice that the club still has to pay, **Pay now** opens the card provider's page. It shows the invoice number and the amount still open. You enter the card and confirm, and the app then says the payment succeeded and the licenses are activated. If you go back without paying, nothing is charged. Afterwards the button names the desk you left, for example **Back to club dashboard**, **Back to LTF dashboard**, **Back to finance dashboard**, **Back to your account** or **Back to ops**. A club invoice sent to a member is not paid here. You can still pay by bank transfer. See Paying the LTF (p. 34).

Glossary

Words used in this manual, with the English and Luxembourgish labels from the screenshots. The app can also be set to French or German. The German and French manuals use the English screenshots, so they quote the English labels.

Term	Screen label (English)	Screen label (Lëtzebuergesch)	What it means
Already on	Already on	Scho un	Modules already switched on for the club. A bundle is listed here only when that bundle itself was bought.
Bank reconciliation	Bank	Bank	Matching an uploaded bank statement with the payments and entries in the books.
Belt test	Belt tests	Gürtelprüfungen	Grading session where candidates pass or fail; a pass records the new grade.
Billing	Billing	Facturatioun	Issuing the membership invoices of a year, or one round of them.
Blocked household	Blocked	Blockéiert	Household that cannot be billed yet, for example no bill recipient for a child.
Club admin	Club Admin	Club Admin	A person who runs the club in the app. Made by another club admin or by the LTF.
Club tourist	Club-tourist threshold	Club-Tourist-Schwellwert	Member flagged by the LTF after many club changes; transfers still work.
Coach	Coach	Coach	Adult member who teaches. Sees the training week and takes the roll; more coach features are planned.
Committee office	Committee	Comité	President, treasurer, secretary… Only current office holders may record payments.
Contact person	Contact persons	Kontaktpersounen	Parent, guardian or emergency contact stored in the club record.
Credit note	Credit notes	Gutschréften	Document that reduces what is owed on an invoice.
Desk	Desks	Schreifdëscher	One login can hold more than one desk. The header list switches between them. With one desk, the header stays a plain role label. A view-only desk can read and cannot save.
Desk sale	Shop	Buttek	Sale of club equipment at the club desk, paid now or later.
EQF level	Qualification	Qualifikatioun	Coach qualification level used for coach points (1 to 6, with 2 bis).
Family	Families	Familljen	Members billed together on one invoice, with family rebates by rank.

Term	Screen label (English)	Screen label (Lëtzebuergesch)	What it means
First-run setup	First-run setup	Éischt Ariichtung	Superuser import of clubs, members and club admins before daily use. Nothing is emailed. Not the club import wizard.
Import	Import members	Memberen importéieren	Creating or updating many members at once from a CSV file. Empty cells do not clear values already stored. Not the federation's first-run setup.
Licence	Licenses	Lizenzen	Yearly LTF licence an athlete needs to train and compete. Pending until the LTF has been paid.
Licence card	License cards	Lizenzkaarten	Printed card with photo, grade, licence number and QR code.
Licence fee	License fee	Lizenzkäschten	Amount the club charges a member for their LTF licence, once per season, normally on the first bill of the season.
LTF Admin	LTF Admin	LTF Admin	Federation office. Manages clubs, licences, cards, the national team and the federation calendar.
LTF Finance	LTF Finance	LTF Finance	Federation treasurer. Prices, invoices to clubs, payments and federation books.
Médico sportif	Médico sportif	Médico sportif	Sports medical check-up; its date is kept in the club record.
Member	Member	Member	Athlete of a club. A club admin can create a login from age 16. Parents have no login. The club keeps the data.
Membership fee	Fees	Cotisatiounen	The club's yearly dues, set in the price list and charged on each billing.
Module	—	—	Part of the app switched on per club by the LTF, such as club management, the event calendar or competition. An unpaid module invoice does not switch it off.
Module fee	Module fees	Modulkäschten	Yearly price LTF Finance sets for club management and the event calendar, as a flat amount or per active member. Club admins can read the estimate.
National team	National team	Nationalequipe	Federation desk for squads, age class, weight and staff. Clubs see only a read-only badge with the squad and the season.
Promotion rule	Promotion	Promotioun	Training hours required before the next grade, counted from the last grade.
Publication consent	Publication consent	Publikatiouns-Accord	Whether a member's photo may appear on the website, in print or on social media.
Qualité+	Qualité+ estimate	Qualité+ Schätzung	Ministry grant per licensed athlete under 16; the app estimates €150 each.

Term	Screen label (English)	Screen label (Lëtzebuergesch)	What it means
Roll	Take the roll	Präsenz huelen	Attendance list of one class. Saving it marks the class as held.
Subsidy file	Subsidies	Subsiden	Yearly application to the ministry via MyGuichet; the app prepares the lists.
Team	Teams	Ekippen	Club squad for Kyorugi or Poomsae, under the competition module. Roster, weigh-in, poomsae groups and history.
Transfer	Transfers	Transferen	Move of a member from one club to another; the receiving club must accept.
Usual students	Usual students	Gewéinlech Schüler	Students pre-selected on every roll of a weekly class.
Visibility	Who can see this	Wie dat gesäit	Who can see a calendar event: public, internal, private, all clubs, presidents.
